CAREER AND TECHNOLOGY STUDIES

PROGRAM PHILOSOPHY/RATIONALE

Through Career and Technology Studies (CTS), secondary education in Alberta is responding to the many challenges of modern society, helping young people develop daily living skills, and nurturing a flexible, well-qualified work force.

In Canada's information society, characterized by rapid change in the social and economic environment, students must be confident in their ability to respond to change and successfully meet the challenges they face in their own personal and work lives. In particular, they must make decisions about what they will do when they finish high school. Many students will enter the work force, others will continue their education. All students face the challenges of growing independence and responsibility, and of entering the highly competitive workplace and/or post-secondary programs.

Secondary schools also face challenges. They must deliver, on a consistent basis, high quality, cost-effective programs that students, parents and community find credible and relevant.

CTS helps schools and students meet these challenges. Schools can respond more efficiently and effectively to student and community needs and expectations by using the opportunities in the CTS curriculum to design courses and access school, community and distance learning resources. Students can develop the confidence they need as they move into adult roles by assuming increased

CSB: 96 06 07

responsibility for their learning; cultivating their individual talents, interests and abilities; and defining and acting on their goals.

As an important component of basic education in Alberta secondary schools, CTS promotes students' achievement by setting clear expectations and recognizing students' success. Students in CTS develop competencies—that is, the knowledge, skills and attitudes students must demonstrate, or what they know and can do.

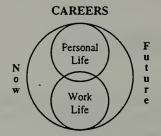

These competencies can be applied now and in the future as students make a smooth transition into adult roles in the family, community, workplace and/or further education. To help ensure this transition for students, clearly stated expectations and standards have been defined with the assistance of teachers, business and industry representatives and post-secondary educators.

CTS offers all students important learning opportunities. Regardless of the particular area of study chosen, students in CTS will:

- develop skills that they can apply in their daily lives now and in the future
- refine career-planning skills
- develop technology-related skills
- enhance employability skills
- apply and reinforce learnings developed in other subject areas.

In CTS, students build skills they can apply in their everyday lives. For example, in the CTS program, particularly at the introductory levels, students have the opportunity to improve their ability to make sound consumer decisions, and to appreciate environmental and safety precautions.

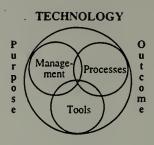

A career encompasses more than activities related to a person's job or occupation; it involves one's personal life in both local and global contexts; e.g., as a family member, a friend, a community volunteer, a citizen.

The integration of careers throughout the CTS program helps students make effective career decisions and target their efforts. Students in CTS will have the opportunity to expand their knowledge about careers, occupations and job opportunities and the education and/or training requirements involved. As well, they will recognize the need for lifelong learning.

Students in CTS will have the opportunity to use and apply technology and systems effectively and efficiently, which involves:

- a decision regarding which processes and procedures best suit the task at hand
- the appropriate selection and skilled use of the tools or resources that are available
- an assessment of and management of the impact the use of the technology may have on themselves, on others and on the environment.

Integrated throughout CTS are employability skills, those basic competencies that help students develop their personal management and social skills. Personal management skills are improved as students take increased responsibility for their learning, design innovative solutions to problems or challenges, and manage resources effectively and efficiently. Students' social skills improve through learning experiences that require them to work effectively with others, demonstrate teamwork and leadership, and maintain high standards in safety and accountability.

Further enhancing the employability skills, CTS reinforces and enhances learnings developed in core and other complementary courses. The curriculum emphasizes, as appropriate, the effective application of communication and numeracy skills.

Finally, in addition to the common outcomes described above, those students who focus on a particular area of study will develop career-specific competencies that support entry into the workplace and/or related post-secondary programs. Career-specific competencies can involve understanding and applying appropriate terminology, processes and technologies related to a specific career, occupation or job.

GENERAL LEARNER EXPECTATIONS

General learner expectations describe the basic competencies that are integrated throughout the CTS program.

Within an applied context that is relevant to personal goals, aptitudes and abilities, the student in Career and Technology Studies will:

- demonstrate the basic knowledge, skills and attitudes necessary for achievement and fulfillment in personal life
- develop an action plan that relates personal interests, abilities and aptitudes to career opportunities and requirements
- use technology effectively, linking and applying available tools, management and processes to produce a desired outcome
- develop personal management skills by:
 - linking theory and practice, using resources, tools, technology and processes responsibly and efficiently (managing learning)
 - applying effective and innovative decisionmaking and problem-solving strategies in the design, production, marketing and consumption of goods and services (being innovative)
 - selecting relevant, goal-related activities, ranking them in order of importance, allocating necessary time, and preparing and following schedules (managing resources)

- improve social interaction skills by:
 - demonstrating flexibility and cooperative work and communication behaviors (working with others)
 - participating as a team member by working cooperatively with others and contributing to the group with ideas, suggestions and effort (teamwork and leadership)
 - demonstrating high standards of diligence, attendance and punctuality, following safe procedures consistently, and recognizing and eliminating potential hazards (demonstrating responsibility)
- demonstrate appropriate verbal, written, composition, summarization and presentation skills
- use basic computation and measurement principles accurately and efficiently.

PROGRAM ORGANIZATION

CURRICULUM STRUCTURE

Career and Technology Studies is organized into strands and modules.

Strands in CTS define competencies that help students:

- build daily living skills
- investigate career options
- use technology (managing, processes, tools) effectively and efficiently
- prepare for entry into the workplace and/or related post-secondary programs.

In general, strands relate to selected industry sectors that offer positive occupational opportunities for students. Some occupational opportunities require further education after high school, and some allow direct entry into the workplace. The industry sectors encompass both goods-producing industries, such as agriculture, manufacturing and construction, and service-producing industries, such as business services, health services, and finance and insurance services.

Modules are the building blocks for each strand. They define what a student is expected to know and be able to do (exit-level *competencies*). Modules also specify prerequisites and facility and instructional parameters, where necessary.

The competencies a student must demonstrate to achieve success in a module are defined through the module learner expectations. Senior high school students who can demonstrate the module learner expectations (i.e., have the designated competencies) will qualify for one credit towards their high school diploma.

Module learner expectations are a culmination of the *specific learner expectations*, which provide a more detailed framework for instruction. They define the scope and depth of knowledge, skills and attitudes the student should acquire. The following chart shows the 22 strands that comprise the CTS program and the number of modules available in each strand.

	Strand	No. of Modules
1.	Agriculture	31
2.	Career Transitions	23
3.	Communication Technology	32
4.	Community Health	31
5.	Construction Technologies	46
6.	Cosmetology	58
7.	Design Studies	31
8.	Electro-Technologies	37
9.	Energy and Mines	27
10.	Enterprise and Innovation	8
11.	Fabrication Studies	41
12.	Fashion Studies	29
13.	Financial Management	15
14.	Foods	37
15.	Forestry	21
16.	Information Processing	43
17.	Legal Studies	13
18.	Logistics	12
19.	Management and Marketing	21
20.	Mechanics	53
21.	Tourism Studies	24
22.	Wildlife	17

Note: As of September 1996, all 22 strands are available for optional implementation in Alberta junior and high schools. Provincial implementation of all strands is scheduled for September 1997.

LEVELS OF ACHIEVEMENT

Modules are organized into three levels of achievement: introductory, intermediate and advanced. As students progress through the levels, they will be expected to meet higher standards and demonstrate increased degree of competence, both in the general learner expectations and the module learner expectations.

Introductory level modules help students build daily living skills and form the basis for further learning. Introductory modules are developed for students who have no previous experience in the strand.

Intermediate level modules build on the competencies developed at the introductory level. They provide a broader perspective, helping students recognize the wide range of related career opportunities available within the strand.

Advanced level modules demand a higher level of expertise and help prepare students for entry into the workplace or a related post-secondary program.

The following illustrates the relative emphasis on the aspects of career planning at each of the levels.

TYPES OF COMPETENCE

Two types of competence are defined within the CTS program: basic and career-specific.

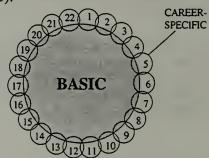

Basic Competencies are generic to any career area and are developed within each module. Basic competencies include:

- personal management; e.g., managing learning, being innovative, ethics, managing resources
- social; e.g., communication, teamwork, leadership and service, and demonstrating responsibility (safety and accountability).

Career-specific Competencies relate to a particular strand. These competencies build daily living skills at the introductory levels and support the smooth transition to the workplace and/or post-secondary programs at the intermediate and advanced levels.

The following model shows the relationship of these two types of competencies within the 22 strands of CTS (numbers refer to the chart on page A.5):

CURRICULUM AND ASSESSMENT STANDARDS

CURRICULUM STANDARDS

Curriculum standards in CTS define what students must know and be able do. Curriculum standards are expressed through general learner expectations for CTS, and through module and specific learner expectations for each strand.

ASSESSMENT STANDARDS

Assessment standards define how the student's performance will be judged. In CTS, each assessment standards defines the conditions and criteria to be used for assessing the competencies defined in each module learner expectation. Students must fully meet each assessment standard, including all of the criteria and conditions defined for the module. Assessment standards are in draft form, as are tools and weightings, and will be validated 1994–97.

Teachers throughout the province will be able to ensure students receive a fair and reliable assessment. Students will use the assessment standards to guide their efforts, ensuring they participate more effectively and successfully in the learning and assessment process. Standards at advanced levels are as much as possible linked to workplace and post-secondary entry-level requirements.

The following pages describe the Community Health strand in the Career and Technology Studies program.

COMMUNITY HEALTH

STRAND RATIONALE

Although the family continues to be the primary source of support and nurture for individuals, much is changing. Shifts in the economy, social behaviours and expectations, and changes in technology and communication present new challenges to individuals, families and communities.

Life in the 21st century with emerging medical technologies and new directions in health will require skills and knowledge that will enhance the ability of individuals and families to be effective and productive both at home and in the outside world.

To meet these challenges, students will need the competencies required to attain and maintain good health and strong families and communities.

The World Health Organization defines health as "a state of physical, mental and social well-being and not merely the absence of disease or infirmity". Good health is more than personal wellness and self discipline. It also involves getting along with others, a personal sense of control, the ability to cope with stress, minimizing health risks, and supporting meaningful work, a clean safe environment and maintaining positive relationships with family and friends.

Within the philosophy of Career and Technology Studies, Community Health will provide opportunities for students to:

- develop and use knowledge, skills and attitudes to enable them to assume a responsible and holistic approach to healthy living
- enhance personal, family and community wellbeing throughout their lifespan, by promoting healthy lifestyles
- develop abilities, confidence and flexibility as they become aware of and prepared for the challenging and rewarding array of career choices in the health care area
- review and assess existing social, physical, economic and cultural conditions affecting the wellness of individuals, families, and communities in the world today
- study, practise and achieve competencies related to the healthy development and care of individuals throughout the lifespan
- become knowledgeable and responsible health consumers
- demonstrate critical thinking skills, responsible decision-making, and management skills in dealing with personal and community health care challenges

¹ Principles of the World Health Organization, The World Health Organization, 1947

- demonstrate flexible, cooperative work behaviour and effective communication and leadership skills
- transfer and apply competencies developed in other courses, hobbies, interests, volunteer activities or work
- demonstrate efficient use of technologies and understand how they influence individual, family life and community health.
- become continuous learners throughout their life.

STRAND ORGANIZATION

DEVELOPMENT MODEL

The Community Health model below identifies the major components of the program which will be included in each module:

- knowledge, skills and attitudes
- · content themes
- integrating concepts
- learning contexts.

Knowledge, Skills and Attitudes

Each module includes learner expectations to develop personal growth and prepare for the future. Each module contains learning experiences identifying the basic and career-specific competencies students are expected to develop.

Themes

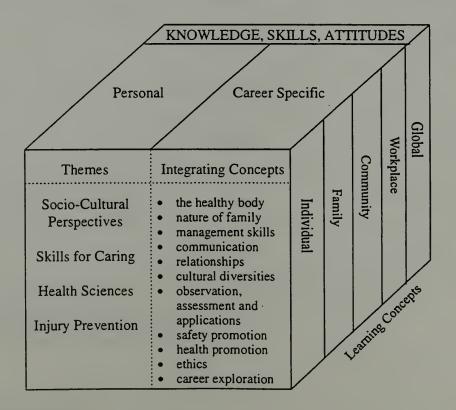

Themes provide the structure for Community Health. Modules within themes may be linked together into meaningful courses to help teachers and students choose appropriate activities based on interest, needs and resources.

Integrating Concepts

The integrating concepts are incorporated into each module to ensure the learning activities are relevant and meaningful.

Learning Contexts

The learning contexts, represented on the right face of the model, foster the development of competencies to enhance the individual, family, community, workplace and global environment.

LEVELS

As with all other CTS strands, Community Health is organized into three levels of learning: introductory, intermediate and advanced.

Introductory level modules help students build a foundation of knowledge, skills and attitudes to promote healthy lifestyles. Learning experiences begin at a concrete level and help students accept personal responsibility for family and health.

Intermediate level modules emphasize career awareness and job exploration and provide opportunities for students to develop their knowledge, skills and attitudes within the family and health areas.

Advanced level modules allow career preparation and provide opportunities for students to develop more specialized knowledge, skills and attitudes relevant to further education or the workplace in health/family careers.

The levels framework challenges students, encourages continuous learning and provides new and exciting opportunities at each level.

[†] This module is also offered in Career Transitions.

^{*} Scheduled optional implementation, September 1996.

MODULE DESCRIPTIONS

MODULE CMH101: Family Dynamics

Students examine family structures, roles and responsibilities involved in meeting the demands of today's society. They study family patterns from the past and determine how these influence family life now and in the future.

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CMH104: Caring for Children

This module identifies the rights and responsibilities of the caregiver (babysitter) and the families. Students focus on accident prevention and handling emergencies. Students qualify for a certificate if they meet the competencies as specified by the credentialling agency.

MODULE CMH105: Child Development

Students examine the needs and behaviours of children in various stages of development, and demonstrate management and caregiving skills applicable to each stage. Various community facilities are identified. Students observe how different centres meet the needs of the children and the family. Students are encouraged to take this module to explore their interest in working with young children.

MODULE CMH106: Home Care I

As an introduction to home care, the student will study the roles, rights and responsibilities, communication and management skills necessary for providing care. To further the understanding of home care, students gain an understanding of the promotion and maintenance of the integumentary system. Community support resources are identified.

MODULE CMH108: Perspectives on Health

This module identifies the determinants of good health and examines how they affect well-being. The student will discuss the shared roles, rights and responsibilities of health services and the changing trends in health.

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CTR121: Career Transitions

Students develop practical safety-related knowledge, skills and attitudes including certification in emergency first aid.

MODULE CMH201: Adolescent Health Issues

Further to the examination of adolescent development, this module explores and examines various health issues that are interesting to the modern adolescent teen. Community resources available to teenagers are identified.

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CMH202: Perspectives on Marriage

Students examine relationships and related issues as they apply to marital relationships. Students acquire life skills that will help them now and in the future.

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CMH203: Community Volunteerism

Through exploration and participation, students examine and demonstrate the roles of effective volunteers.

MODULE CMH205: Day Care I

Students investigate the roles and responsibilities of a childcare worker, and develop communication and observation skills. Students develop skills to assist in the physical, social, emotional and intellectual development of children from birth to age six. If students successfully complete Day Care I and Day Care II, two practicum modules and are 16 years of age, they are eligible for a Level I Orientation Qualification Certificate.

MODULE CMH206: Home Care II: Personal Care Services

Students identify and demonstrate the skills necessary to provide personal care services, recognizing the impact on the individual and family members. A project module from Career Transitions in a community care facility will enhance student learning in this area.

MODULE CMH207: Sensory Challenges

This module examines sensory challenges and the impact on the individual and on family dynamics. Community resources and technologies that are available are identified. Students have an opportunity to study communication skills for sensory challenged individuals. Accessing the volunteer module or completing a project module from Career Transitions will enhance student learning in this area.

MODULE CMH208: Anatomy, Physiology and Pathology (Respiration)

Through study of the anatomy, physiology and pathology of the respiratory system, students gain an appreciation of practising a healthy lifestyle, and acquire the knowledge and skills to deal with respiratory conditions as they affect the individual, family and friends. Community support resources are identified.

MODULE CMH209: Anatomy, Physiology Pathology (Circulation)

Through study of the anatomy, physiology and pathology of the circulatory system, students gain an appreciation of practising a healthy lifestyle, and acquire the knowledge and skills to deal with circulatory conditions as they affect the individual, family and friends. Community support resources are identified.

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CMH210: Anatomy, Physiology and Pathology (Muscular/Skeletal)

Through study of the anatomy, physiology and pathology of the muscular/skeletal system, students gain an appreciation of practising a healthy lifestyle, and acquire the knowledge and skills to deal with muscular/skeletal conditions as they affect the individual, family and friends. Community support resources are identified.

MODULE CMH211: Complementary Therapies

Students examine complementary therapies, their foundations, applications, costs, ethical issues and prediction for the future.

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CMH212: First Aid/CPR

Students study first-aid skills and demonstrate techniques and procedures for dealing with emergency situations. Students qualify for a Standard First Aid certificate when they meet the competencies specified by the credentialling agency. Instructors must be certified First-Aid/CPR Instructors (school or community).

MODULE CMH213: Sports First Aid I

Students learn about the different aspects of sports injuries, first-aid care and prevention of athletic injuries. Upon successful completion of this module, the student is eligible to receive an Athletic First Aid certificate from the Sports Medicine Council of Alberta.

MODULE CMH301: Family Issues

This module examines changes that occur within a family and the required adjustments family members must make. Cultural diversities are investigated and community resources are identified.

This module includes concepts which may be particularly sensitive to students; parents or community members.

MODULE CMH302: Parenting

Students examine parenting and the issues involved with parenting. This module helps students appreciate current family dynamics and enhances future parenting skills. Students are encouraged to have a foundation in child development and care as offered in Child Development (CMH105).

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CMH303: Aging

Students gain an understanding of the issues involved with the aging process and the impact on the individual, the family and the community. Students identify community resources and recognize the importance of seniors as a resource to the community.

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CMH304: Pre- and Post-natal Care

This module focuses on the impact of pregnancy on physical, mental and social well-being. It emphasizes the significance of pre-natal, labour, delivery and post-natal care.

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CMH305: Day Care II

Day Care I and a practicum in a day care centre are prerequisites for this module. Students continue to study the development and care of children, focusing on the importance of play and guiding behaviour. Successful completion of Day Care I and II, and two practicum modules will qualify the student to receive a Level I Orientation Qualification certificate.

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CMH306: Home Care III: Special Conditions

This module addresses care as it relates to special conditions, special treatments, loss, long term care and the palliative process. A project module from Career Transitions in a community care facility will enrich student learning in this area.

This module includes concepts which may be particularly sensitive to students, parents or community members.

MODULE CMH307: Challenged Individuals

Students recognize the diversity of experiences facing individuals who are physically and/or mentally challenged. Community resources for these individuals are identified.

MODULE CMH308: Anatomy, Physiology, Pathology (Digestion/Elimination)

Through study of the anatomy, physiology, pathology and treatment of the digestive and elimination systems, students gain an appreciation of practising a healthy lifestyle and acquire the knowledge and skills to deal with digestive and elimination conditions as they affect the individual, family and friends. Community support resources are identified.

MODULE CMH309: Anatomy, Physiology, Pathology (Nervous/ Endocrine)

Through study of the anatomy, physiology and pathology of the nervous/endocrine system, students gain an appreciation of practising a healthy lifestyle, and acquire the knowledge and skills to deal with nervous/endocrine conditions as they affect the individual, family and friends. Community support resources are identified.

Module CMH310: Mental Health

Students study the parameters of mental wellbeing and the causes, signs, symptoms and treatment of mental illness. The focus is on preventive measures and the impact on the individual, peers, family and community. Community support resources are identified.

MODULE CMH311: Advances in Medical Technology

This module focuses on the social, emotional and economic impact of medical technology. Related ethical issues are also examined.

MODULE CMH312: First Aid/CPR for Infants and Children

Students identify a child-safe environment and recognize life-threatening emergencies or medical conditions and demonstrate appropriate first-aid procedures. Potential community workers, recreation leaders and caregivers are encouraged to take this module. Students qualify for an Emergency Child Care certificate (Canadian Red Cross) or a Standard First Aid in Child Care certificate (St. John Ambulance) when they meet the required competencies specified by the credentialling agency. Instructors must be certified First Aid/CPR instructors with a child care instructor designation.

MODULE CMH313: Sports First Aid II

Students focus on the application of knowledge, skills and techniques to enhance athletic performance, to recognize common athletic injuries and to assist in rehabilitation. A project module from Career Transitions will enhance student learning in this area.

SECTION C: PLANNING FOR INSTRUCTION

CTS provides increased opportunity for junior and senior high schools to design courses based on the needs and interests of their students and the circumstances within the school and community. Some strands may be appropriately introduced at the junior high school level. Other strands are more appropriately introduced at the senior high school level or to Grade 9 students. Refer to this section for recommendations regarding the Community Health strand, or the CTS Manual for Administrators, Counsellors and Teachers for a summary of the recommended grade levels for each strand.

PLANNING FOR CTS

Defining Courses

Schools determine which strands and modules will be offered in a particular school, and will combine modules into courses.

Each module was designed for approximately 25 hours of instruction. However, this time frame is only a guideline to facilitate planning. The CTS curricula are competency based, and the student may take more or less time to gain the designated competencies within each module.

A course will usually consist of modules primarily from the same strand but, where appropriate, may include modules from two or more strands. Refer to the CTS Manual for Administrators, Counsellors and Teachers for more information on course names and course codes.

Module selection and sequencing must consider the module parameters, which define:

- prerequisite and corequisites (entry-level competencies)
- instructional qualifications, if specialized

CSB: 96 06 07

equipment and facility requirements, if specialized.

The module parameters are defined for each module in Sections D, E and F of this Guide.

Degree of Flexibility

The CTS program, while designed using the modular structure to facilitate flexible time-tabling and instructional delivery, does not mandate the degree of flexibility a school or teacher will offer. The teacher and school will determine the degree of flexibility available to the student. Within the instructional plan established by the school, the student may:

- be given the opportunity to progress at a rate that is personally challenging
- have increased opportunity to select modules that develop competencies he or she finds most relevant.

Integrating Basic Competencies

Basic competencies are integrated throughout the CTS program and within each module. Selected basic competencies will be emphasized within a module, depending on the nature of the career-specific competencies defined for the module.

Section G (Assessment Tools) of this Guide provides a description of student behaviours expected at each of the four developmental stages defined for the basic competencies.

Assessment of basic competencies could include input and reflection involving the student, teacher(s), peers and others. Description of the observed behaviour could be provided through a competency profile for the module. Positive, ongoing interaction between the student and teacher will support motivation for student growth and improvement.

The basic competencies related to teamwork, responsibility, ethics, service and communication should be emphasized in Community Health modules at the intermediate advanced level where community-based activities and projects would be encouraged.

Assessment of student achievement on the basic competencies is integrated throughout the other module learner expectations.

Portfolios

When planning for instruction and assessments, consider a portfolio as an excellent tool to provide evidence of a student's effort, progress and achievements.

Portfolios will aid students in identifying skills and interests to enhance their lifestyle and provide direction into a profession. They also provide the receiving teacher, employer and/or post-secondary institutions documentation of a student's accomplishments. The make-up and evaluation of the portfolio should be a collaborative agreement between the student and the teacher.

Assessing Student Achievement

Assessing the student's competency is a process of gathering information by way of observations of process, product and student interaction.

Where appropriate, assessment tools have been defined to assist the teacher and student in the assessment. Section G (Assessment Tools) of this Guide to Standards and Implementation will provide copies of the various tools (worksheets, checklists, sample questions, etc.).

A suggested emphasis for each assessment standard has also been established. The emphasis provides a guideline to help teachers determine time allocation and/or a percentage grade for students.

Recognizing Student Achievement

At the high school level, successful demonstration of the exit-level competencies in a module qualifies the student for one credit. Refer to Section A of this Guide for more detailed information about how curriculum and assessment standards are defined in CTS. Refer to the CTS Manual for Administrators, Counsellors and Teachers for more information on how student achievement can be recognized and reported at the school and provincial levels.

Resources

A comprehensive resource base, including print, software and audio-visual, has been identified to support the Community Health strand. It is intended that these resources will form the basis of a resource centre, encouraging teachers and students to access a wide selection of resources and other information sources throughout the learning process. Unless otherwise noted, these resources are considered to be suitable for both junior and senior high school students.

Authorized resources may be obtained from the Learning Resources Distributing Centre or directly from the publisher or distributor. Refer to Section I (Learning Resources Guide) of this Guide for the complete resource list including curriculum correlations and resource annotations. Additional sources refer to non-commercial or government agencies that offer resources that may be of assistance in this strand.

In addition to the resources, sample Student Learning Guides will be available. These samples, designed for individual student or small group use, provide an instructional plan for selected modules and include the following components:

- Why take this module?
- What are the entry-level competencies?
- What are the exit-level competencies?
- What resources may be accessed?
- What assignments/activities must be completed?
- What are the time lines?
- How will the final mark be calculated?

Sample Student Learning Guides for Community Health will be validated and expanded over the 1995–96 school year.

Copies of these sample learning guides will be available, by request, from the CTS Unit in print and/or disk format (Microsoft Word).

PLANNING FOR COMMUNITY HEALTH

The following suggestions are provided to assist teachers and school and school system administrators as they plan to deliver modules from the Community Health strand.

Sensitive Issues

Modules and concepts developed in this strand must be dealt with in a sensitive manner. Concepts such as family history, cultural diversities, sexuality, dealing with emergency, loss and personal contact in caregiving must be treated with care. Teachers will need to be sensitive and respectful of family and community values. Parents must be advised prior to the start of human sexuality instruction of their right to exempt their child from the module. Accessing school or community trained personnel or offering alternative assignments may assist the teacher in presenting these topics.

Teachers and administrators should also review provincial and system policies related to sensitive issues. The following modules contain topics which can be particularly sensitive: CMH101, CMH108, CMH201, CMH202, CMH209, CMH211, CMH301, CMH302, CMH303, CMH304, CMH305 and CMH306.

Related Legislation

Instructors of Community Health must be aware of the issues addressed in the Occupational Health and Safety Acts and Emergency Medical Aid Act as well as other provincial and federal health legislation. In the module Perspectives on Health CMH108, students study the legislation related to health services. Day Care II, CMH305, students examine the Day Care Regulations that have been developed to ensure the safety and well-being of children and staff.

Safety

CSB: 96 06 07

Health promotion and illness/injury prevention are integral concepts integrated throughout the Community Health strand. Instructors should make every effort to provide a safe environment for their students. Instructors must also teach the skills necessary to ensure the health and safety of the student as a caregiver and the clients. Safety precautions include gloves, goggles, masks,

gowns, hand-washing, first-aid procedures, appropriate body mechanics, etc.

Qualifications for Module Delivery

Responsibility for instructional planning and delivery of modules in Community Health will be assumed by Alberta Certified Teachers having expertise in the classroom as well as family and health service experiences. The following chart outlines qualifications for module delivery in Community Health modules.

MODULE	QUALIFICATIONS FOR MODULE DELIVERY	
	Recommended	Required
CMH104 Caring for Children	Standard First Aid Certificate	
CMH206 Home Care II	Home care skill training	
CMH207 Sensory Challenges		American Sign Language or Braille
CMH212 First Aid/CPR		First Aid/CPR Instructor
CMH213 Sports First Aid	Athletic First Aid Certificate	
CMH306 Home Care III		Home care skill training
CMH312 First Aid/CPR Children and Infants		First Aid/CPR Instructor with a child care instructor designation.

Refer to specific module parameters for information regarding qualifications for module delivery and to the credentialling opportunities chart shown in section H. It should be noted that instructors may be accessed from the community or other school resources personnel.

Selecting Modules

The scope and sequence chart in Section B provides an overview of the Community Health modules, indicating prerequisites and theme areas. Brief descriptions of the modules follow the scope and sequence chart in Section B.

Course planning should take into consideration module sequences that link with both physical and human resources present in the school and community.

Teachers should be aware of the linkages of Community Health with the junior and senior high science, health, sports medicine and CALM program. In particular, there is a close link between biology and intermediate and advanced level modules in the Health Science theme. Charts outlining these linkages are shown in section H. Community Health is designed to give the students practical applications to enhance and complement the learnings in these courses. With collaborative, cooperative planning at the school level, the students will benefit from meaningful learning experiences.

To increase the time necessary to expand or enhance learnings, the student can access project modules from Career Transitions. In addition, practicum modules from Career Transitions are designed to provide opportunities to meet the requirements to attain a credential available from credentialling agencies external to the school. Credentialling opportunities available in Community Health are listed in Section H, pages 22 and 23.

Note: Selected modules require that the student have access to an instructor with certification or special training. Where this is necessary it is noted in the module parameters.

Community Health for Junior High School Students

The introductory level modules may be offered in part or in whole at the junior high level. As each school and community will vary in terms of available resources, it is important to access potential support networks prior to selecting module sequences.

The number of modules will vary according to the time available. Modules may be combined into courses and offered within a school year or over a span of a few years. Junior high students may not complete all the learner expectations in all the modules.

Suggested module selection for junior high schools would be:

- Caring for Children
- Child Development
- Family Dynamics

In addition, these modules could be combined with introductory modules from Foods, Fashion Studies and/or Financial Management.

Community Health for Senior High School Students

All introductory, intermediate and advanced modules may be offered to senior high students. The following are a few examples of module groupings into sample courses:

3 credit introductory course with a Health Service focus:

- Perspectives on Health
- Child Development
- Personal Safety Management

3 credit introductory course with a Family Studies focus:

- Family Dynamics
- Adolescent Health Issues
- Perspectives on Marriage

The following are examples of module groupings for a course with a Health Service focus.

5 credits (no previous experience)	Perspectives on Health Respiration Circulation
Health Service	Muscular/Skeletal
Focus	First Aid/CPR

5 credits Health Services Focus	Home Care I & II Sports First Aid Sensory Challenges
	Complementary Therapies or Community Volunteerism or Sports First Aid I

Health Service Focus	Home Care III Digestion/Elimination
(5 credits)	Nervous/Endocrine Challenged Individuals or Advances in Medical Technology or Sports First Aid II

Sample groupings of modules for a Family Studies focus follow.

5 credits (no previous	Family Dynamics Perspectives on Marriage
experience) Family Studies Focus	Child Development Community Volunteerism Adolescent Health Issues

5 credits Day Care I & practicum
Family Studies Day Care II & practicum
Focus First Aid/CPR for Infants and
Children

Family Studies Family Issues

Family Studies
Focus

(5 credits)

Family Issues
Mental Health
Parenting
Pre- and Post-Natal Care
Aging

Project modules from Career Transitions for additional credit will enhance the learnings in Home Care and Sports First Aid.

Organizing for Learning

A "learn by doing" approach is recommended for the Community Health strand. Essentially, the teacher's role will become that of guide and partner in the learning process. The "learn by doing" approach requires the teacher to be facilitator and coach, rather than subject-based expert, as students actively participate in learning by doing and discovering.

Small group instruction is a good way to foster learning by doing and discovering. Small groups enable students to be active participants in learning, and develop independent and responsible learning habits. As students work in small group situations they will share information, solve problems, develop consensus, and help each other learn content and processes.

The community is a major stakeholder in education and can be an effective partner in the learning process. The use of community members and resources should be integrated into course planning. Business, industry and government agencies offer a wide range of services and resources, as do local clubs, service groups and institutions. When planning for the use of community resources, teachers should ensure that related presentations and/or activities:

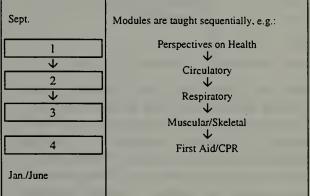

- are consistent with student knowledge and skill levels
- demonstrate sound pedagogy

- are exemplary of approved health and safety standards
- provide a balanced approach to curriculum topics and related issues.

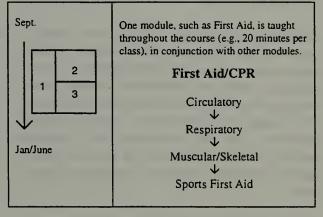

Before selecting modules, teachers should check the module parameters outlined in each module (see Sections D, E and F of this Guide). These module parameters describe:

- prerequisite or corequisite modules
- facility and equipment requirements, if required, and
- instructional qualifications, if required.

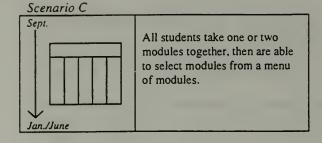

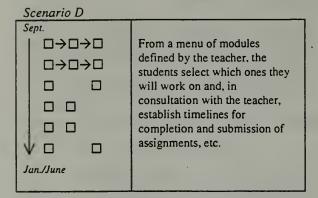

Teachers can also allow students to progress at a rate that is personally challenging; e.g.:

Plans for instruction must address social, economic and environmental perspectives related to the family and health. Provide opportunities for students to become involved in learning experiences that reflect a broad understanding of related issues and alternatives. Presentations of course content that reflect a singular or narrow view are not consistent with learner expectations and must be avoided.

As in all CTS strands, students will identify, explore and prepare for future career opportunities. It is recommended that course planning include the integration of relevant career investigations throughout each module, rather than as a singular or isolated study. Career profiles, interviews and job shadowing will acquaint students with the many technical and professional careers associated with the Community Health field.

Addressing Safety in Off-campus Excursions

Field excursions are recommended and should be an important part of teaching and learning throughout the Community Health strand. Safety must be a prime consideration in planning offcampus learning experiences. Both teachers and students should engage in activities commensurate with their level of training and ability. Adequate instructional support, guidance and supervision must be provided at all times. Local jurisdiction and school policies must be understood and observed by principals, teachers, parents, supervisors and students.

Preparation and Risk Anticipation

The preparation stage is the most important part of any off-campus excursion. At this stage of planning, potential risks can be anticipated and either avoided or moderated. The preparation stage should focus attention on:

- trip administration, including the use of parental permission forms, health information forms, school/system authorization forms and accident report forms
- a review of laws and regulations relevant to the excursion and activities that will be undertaken
- study of the site to which the trip is being conducted, and the identification of potential hazards and risks
- determination of group size and the level of supervision that will be required (e.g., supervisor/student ratio)
- a briefing of parents, school administrators, government/industry authorities or others who should be informed in the event of an accident regarding itineraries, participants and emergency response plans
- pre-trip logistics, including transportation, equipment, facility and departure date considerations
- student preparation, including background knowledge and experience, mental and physical preparedness, and training in specific skill areas, and the appropriate ethical responsibilities and behavioural expectations at the designated site.

On-site Risk Management

Safety and risk management involves exercising situation-specific judgement throughout the course of an off-campus excursion. Judgement is the product of experience, and may include recognizing factors such as dangers imposed by equipment, a decline in physical strength, or a more challenging task. Many of the hazard recognition skills can be taught in the classroom in the preparation stage.

A significant aspect of on-site risk management is group management. Teachers can exercise appropriate group management strategies by focusing attention on:

- pacing and observation distance, including speed of travel, rest stops, distance travelled and maintaining safe distance for observations
- group control, including position of leader, regrouping procedures, signal systems and buddy systems
- the establishment of group rules and norms
- clearly defined task allocations for each student
- objective hazard recognition on the site, including machinery and equipment.

Identifying Linkages

Section H of this Guide describes linkages within CTS strands.

Note that project modules from the Career Transitions strand may be combined with modules from Community Health to provide increased opportunity for students to develop expertise and refine their competencies.

Improved Smooth Transitions to the Workplace and/or Post-secondary Programs

Refer to Section H of this Guide for potential transitions students may make into:

- the workplace
- related post-secondary programs or other avenues for further learning.

MODULE CURRICULUM AND ASSESSMENT STANDARDS: SECTION D: INTRODUCTORY LEVEL

The following pages define the curriculum and assessment standards for the introductory level of Community Health.

Introductory level modules help students build daily living skills and form the basis for further learning. Introductory modules are developed for students who have no previous experience in the strand.

Module learner expectations define the competencies a student must demonstrate to achieve success in a module. Assessment standards define the conditions and criteria to be used for assessing the competencies defined in the module learner expectations. These assessment standards and the accompanying assessment tools are in draft form and will be validated for September 1997.

Specific learner expectations provide a detailed framework for instruction and help students build the competencies defined in the module learner expectations. Additional information and suggestions for instruction are provided in the Notes column; teachers may wish to use this space to record their ideas for instruction or student projects.

Module CMH101:	Family Dynamics	D.3
	Caring for Children	
	Child Development	
	Home Care I	
	Perspectives on Health	
	Personal Safety Management	

MODULE CMH101: FAMILY DYNAMICS

Level:

Introductory

Theme:

Sociocultural Perspectives

Prerequisite:

None

Students examine family structures, roles and responsibilities involved in meeting the demands of today's society. They study family and health patterns from the past to determine how these influence family life now and in the future.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
describe historical and contemporary families, and their importance in society as a basic social	a presentation in which the student compares today's family with a historical family (a minimum of a 20 year gap) and predicts the effect of current trends on the family of the future as to:	30
institution	 family structures roles and responsibilities family traditions decision making and authority patterns family functions. 	
	Assessment Tool CMH101–1: Presentation/Reports: Families – Past, Present and Future Standard	
	Performance rating of I on each criteria	
demonstrate effective communication skills appropriate to resolving family conflicts	 applied problem solving in which the student using a minimum of three scenarios (TBD) applies the criteria of effective communication to resolve family conflicts. 	20
	Assessment Tool CMH101–2: Conflict Resolution Assessment Guide CMH101–3: Conflict Resolution: Sample Scenarios	
4	Standard Performance rating of 1 on each criteria	

MODULE CMH101: FAMILY DYNAMICS (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
develop a health action plan based upon a	presenting an individual health summary (past and present) of self or of another.	30
summary of past and present health history	Assessment Tool CMH101—4: Presentation/Report: Health Summary	
	Standard Performance rating of 1 on each criteria	
	applying the individual health summary in the development of a plan to maintain or improve health for the future.	
	Assessment Tool CMHPAPW: Personal Action Plan Worksheet	
	Standard All sections have been completed appropriately	
assess the effect of personal career choices	completion of an analysis of Career Choices Worksheet.	20
on: - self - family - friends	Assessment Tool CMH101-5: Career Choices Assessment Guide CMH101-6: Career Choices: Sample	
- school/community	Standard Performance rating of 1	
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

MODULE CMH101: FAMILY DYNAMICS (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
Nature of the Family	compare and contrast definitions of the historical and contemporary family and its various structures	Historical family resources; e.g., museums, archives, documentaries, media families.
	 research and analyze rights and responsibilities of family members: to each other to family as a whole to the community for health and safety 	 health/safety in the home environment. role of the family re: family care responsibilities. effect on personal life and family of personal health/safety decisions (substance abuse, physical abuse).
	assess the uniqueness of a family (taking into consideration socioeconomic conditions and cultural differences), as related to: family traditions family structures decision making and authority patterns family functions family life cycle stages roles in one's career family job impact of gender stereotypes	Families Today. Photos, essays, videos, family heirlooms. Interview.
	provide examples of changes that have occurred and are occurring to the traditional family and predict future trends	Trends such as: telecommunications self employment job sharing flex time arrangement stay-at-home parent two-income families family size increased life expectancy.
Building Healthy Families		
Communications	assess the importance of communication in the building of healthy family relationships: sending a clear message effective listening barriers to communication.	Role playing Communication dyads Mediators Case studies Conflict resolution Families Today.

MODULE CMH101: FAMILY DYNAMICS (continued)

Concept	Specific Learner Expectations	Notes
Building Healthy Families Communications (continued)	 demonstrate communication skills to resolve conflicts awareness (identify the problem) setting limits argument (identify and evaluate the alternatives) negotiation (choose the best solution) follow-up (implement and evaluate the solution) 	
Observation, Assessment and Application	 research a family health history, documenting genetic lineages to various diseases research and write a health history, including: immunization records medical history including medical conditions, childhood diseases, hospitalization and surgery inherited diseases and predisposition to health problems develop a Personal Action Plan which may promote well being throughout the lifespan. 	Teachers are reminded to be sensitive to the needs of individual students - for some, this may be a difficult assignment. A letter should be sent to parents explaining the purpose of this assignment. An alternative case study or family tree should be available. E.g.: asthma, epilepsy, diabetes, allergies, sickle cell anemia, Tay- Sachs disease.
Career Exploration	define, using the CTS definition of careers, the influence of personal life choices on: - family members throughout the life cycle - friends - community.	

MODULE CMH104: CARING FOR CHILDREN

Level:

Introductory

Theme:

Skills for Caring

Prerequisite:

None

Module Parameters: It is recommended that the student have access to instruction from an

individual with a Standard First Aid certificate

This module identifies the rights and responsibilities of the caregiver (babysitter) and the families. Students focus on accident prevention and handling emergencies. (Students qualify for a certificate if they meet the competencies as specified by the credentialling agency.)

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Standards (Draft)	Suggested Emphasis
The student will: • identify the rights and responsibilities of the babysitter/caregiver, his or her family and the	 Assessment of student achievement will be based on: identifying the rights and responsibilities of the caregiver, his or her family and the employer. Assessment Tool CMH104-1: Child Care Worksheet 	10
employerdemonstrate the skills	Standard Performance rating of 1 practical experiences in which the student:	50
required for child care, including: - infant caregiving skills	 demonstrates five infant caregiving skills prepares and presents food for a child of a specific age group demonstrates basic first aid skills. 	
 food selection and presentation first aid skills 	Assessment Tool CMH104–2: Child Care Skills Checklist Standard As stated on the tool	

MODULE CMH104: CARING FOR CHILDREN (continued)

Module Learner Expectations	Assessment Criteria and Standards (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify appropriate solutions to babysitting problems	appropriate solutions to three common babysitting behavioral problems and two emergency situations.	20
	Assessment Tool CMHSAW: Scenario Assessment Worksheet CMH104-3: Babysitting: Sample Scenarios	
	Standard Performance rating of 3	
	a concept test consisting of questions on all aspects of child care.	10
	Assessment Tool CMH104-4: St. John Ambulance, Canadian Red Cross Babysitter (or other agencies) exam or teacher-developed exam	
	Standard Performance rating as required for certification or 14/20 on CMH test	
assess personal competencies in	assessment of personal competencies following a practical child care experience.	10
providing child care	Assessment Tool CMH104–1: Child Care Worksheet	
	Standard Performance rating of 1	
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

MODULE CMH104: CARING FOR CHILDREN (continued)

Concept	Specific Learner Expectations	Notes
Management	 list the rights and responsibilities of babysitters/caregivers, their family and the employer outline babysitting as a business including: how to get a job reference check expertise expected dates and times location transportation wage describe strategies babysitters can use to handle potential abuse using the basic guidelines for getting along with children (calm and consistent, in control, honest and fair), identify common babysitting problems and evaluate possible solutions. 	• Temper tantrums, fighting, shyness, fears, play.
Observation, Assessment and Application	 demonstrate the basic skills of infant care: picking up a baby holding, changing, feeding, putting to bed describe and/or demonstrate the procedures for accident prevention and handling emergencies: general first aid procedures for: bleeding, rescue breathing, choking, poisoning, burns, head and bone injuries, foreign objects, bites and stings, blisters, frostbite, hypothermia, fainting, shock, heatstroke, seizures, splinters, sprains unusual circumstances such as fire, illness, strangers, child abuse accessing emergency health care. 	Babysitter Safety Course Materials.

MODULE CMH104: CARING FOR CHILDREN (continued)

Concept	Specific Learner Expectations	Notes
Safety and Health Promotion	 The student should: list strategies to make eating safe and enjoyable for babies, toddlers and pre-schoolers identify safe and appropriate toys, activities and equipment for infants to six years categorize safe and appropriate toys, activities and equipment for infants to six years explain how to create a safe inside and outside environment: child-proof the home family fire escape plan 	Create a babysitter's "cope kit".
Career Exploration	an assessment of personal knowledge, skills and attitudes in the area of child care.	

MODULE CMH105: CHILD DEVELOPMENT

Level:

Introductory

Theme:

Skills for Caring

Prerequisite:

None

Students examine the needs and behaviours of children in various stages of development and demonstrate management and caregiving skills applicable to each stage. Various community care facilities are identified. Students observe how different centres meet the needs of the children and family.

Students are encouraged to take this module to explore their interest in working with young children.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
• identify the physical, mental and social development of children, ages 0-6, and describe the appropriate care of each stage	a presentation that outlines the development of children and describes the needs of children in relation to their age and developmental stage. Assessment Tool CMH105-1: Presentation/Report: Child Development	25
	Standard Performance rating of I	
identify appropriate solutions to problems in child care	 applied problem solving in which the student: provides appropriate solutions to three scenarios showing the need for routines and boundaries in child care provides appropriate solutions to three scenarios depicting emergency situations. 	20
	Assessment Tool CMHSAW: Scenario Assessment Worksheet CMH105–2: Child Development: Sample Scenarios	
27 -	Standard Performance rating of 1 on each scenario	

MODULE CMH105: CHILD DEVELOPMENT (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
	 practical problem-solving experiences in which the student: plans a one day menu suitable for a young child prepares and evaluates one meal for a child evaluates a toy or activity suitable for a young child charts clothing needs and costs for one season. 	35
	Assessment Tool CMH105–3: Child Development Tasks Standard	
	Performance rating of 1	
identify child-focused community resources	identifying community resources available and evaluating how they meet the needs of children.	10
and evaluate the programs based on individual child and	· Assessment Tool CMHCRA: Child Community Resources Assessment	
family needs	Standard Performance rating of 1	
discuss related career interests	investigating a career associated with community child care.	10
	Assessment Tool CMHCRA: Child Community Resources Assessment	
	Standard Performance rating of 1	
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

MODULE CMH105: CHILD DEVELOPMENT (continued)

Concept	Specific Learner Expectations	Notes
The Healthy Body	 identify the physical, mental and social development of: infants toddlers preschoolers school-aged children special needs children describe the needs of children in relation to their developmental behaviours. 	Erikson's stages of emotional development. Piaget's stages of cognitive development. Kohlberg's stages of moral development.
Observation, Assessment and Applications	 describe the need for love and security to promote healthy development describe the need for routines and boundaries and evaluate various strategies that could be used recognize the importance of nutritious foods and establishing health dietary habits early in a child's life identify the type and amount of clothing required by a small child discuss the environmental and economic issues related to children's clothing describe how children learn through play cite examples of toys or activities that will help children develop physically, mentally and socially categorize play activities according to a child's age and stage of development. 	Discuss the need to recognize cultural diversities as they affect child development and care. Select and prepare nutritious, safe foods for small children. Collect pictures of clothing suitable for a child, give costs and reasons for buying. diapers uni-sex clothing second-hand clothing Create a toy or design an activity and evaluate the product based on a child's needs and interests.
Health and Safety Promotion	 outline strategies to provide a clean, safe environment to prevent illness and injury demonstrate common sense in handling an emergent situation. 	

MODULE CMH105: CHILD DEVELOPMENT (continued)

Concept	Specific Learner Expectations	Notes
Community Support Facilities	 The student should: identify the community resources available to meet the needs of young children, including: child care options recreation education support groups. 	Stay-at-home parent, day home, daycare, nanny, after-school program
Career Exploration .	assess one or more occupations associated with a community child focused resource as to: duties, education/training required, employment opportunities, salary and benefits.	Registered day home provider, daycare worker, professional nanny service, early childhood educator, community after-school program supervisory or volunteer, children's book author, toy designer, community health worker.

MODULE CMH106: HOME CARE I

Level: Introductory

Theme: Skills for Caring

As an introduction to home care, the student will study the roles, rights and responsibilities, communication and management skills necessary for providing care.

To further the understanding of home care, students gain an understanding of the promotion and maintenance of the integumentary system. Community support resources are identified.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • assess the impact on the individual and family when home care is required	Assessment of student achievement will be based on an applied problem solving activity in which the student analyzes three scenarios, to assess the impact on the individual and family when home care is required.	15
	Assessment Tool CMHSAW: Scenario Assessment Worksheet CMH106-1: Home Care Sample Scenarios Standard Performance rating of 1	
describe the management of home care with respect to: roles, rights and responsibilities of caregivers support resources available	 a presentation/report in which the student: describes a minimum of five roles and rights/responsibilities of caregivers describes five support resources available describes three alternatives for respite care for the primary caregiver. Assessment Tool CMH106-2: Home Care Management Tasks 	15
importance of providing respite care for the primary caregiver	Standard Performance rating of I	

MODULE CMH106: HOME CARE I (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on	
identify and describe factors related to the promotion and maintenance of a healthy	a concept test consisting of a minimum of 30 questions indicating knowledge of the anatomy, physiology, pathology and care of the integumentary system.	20
integumentary system	Assessment Tool CMH106-3: Concept Test: Integumentary Sample Questions	
	Standard Performance rating of 50%	
	practical activity in which student demonstrates skin care needs and promotion of healthy skin.	10
	Assessment Tool CMHHCSA-1: Home Care Skills Assessment	
	Standard Performance rating of 3	
demonstrate procedures in the provision of effective home care	 practical activities in which the student demonstrates: three environmental adaptations three equipment adaptations aseptic techniques taking and recording vital signs applications of hot and cold treatments (dry and moist) 	40
	moist) - application of simple sterile dressings - proper body mechanics.	
7-37-24	Assessment Tool CMHHCSA-1: Home Care Skills Assessment	
-	Standard Performance rating of 3	
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

MODULE CMH106: HOME CARE I (continued)

Concept	Specific Learner Expectations	Notes
The Nature of the Family	 The student should: examine situations that require adaptations in the home to care for a family member assess how home health care affects family dynamics 	Early discharges Home care for challenged individuals.
	 identify basic needs and assess the level of care required considering lifespan stages and cultural diversities assess resources within the family to meet these needs 	E.g.: nutrition, grooming and hygiene, physical. social and emotional comfort.
	assess availability of community health resources which provide additional support services.	 Home care - private agencies. Rehab. Nursing. Housekeeping.
Management	 explain the roles, rights and responsibilities of a caregiver in the home considering: individual values promoting independence communication with the individual, family members and members of the health team personal grooming, hygiene, nutrition ensuring a safe and comfortable environment personal services basic housekeeping tasks ethical and legal responsibilities assess the importance of maintaining the personal well-being of the caregiver assess the importance of providing respite care to the primary caregiver. 	Cultural diversities. Lifespan stages. Banking, appointments, groceries, mail, pet care, prescriptions, transportation. Care for the caregiver.
The Healthy Body	identify and understand the basic anatomy and physiology of the integumentary system—differentiating the layers, underlying tissues, accessory organs and appendages	Diagrams, models

MODULE CMH106: HOME CARE I (continued)

Concept	Specific Learner Expectations	Notes
The Healthy Body (continued)	The student should: Iist the signs and symptoms, possible treatments and prevention of a variety of skin disorders.	 Consider: acne. impetigo, chickenpox. measles, athlete's foot, skin cancer, etc. Diagram, poster, demonstration (massage, back rub, partial bath, manicure).
Assessment and Application	 describe how to adapt the environment and equipment employ and evaluate proper aseptic techniques with regard to handwashing, cleaning and maintaining supplies and equipment, proper use and disposal of barrier devices define the importance of and demonstrate proper techniques for taking and recording vital signs 	 Cultural Diversities. Individual's personality. Lifespan stages. Universal precautions. Gloves. Masks. etc.
	 identify and analyze various situations that may require applications of hot and cold treatments and dressings as may be prescribed by a health care professional demonstrate the application of hot and cold treatments (dry and moist) and of dressings (simple, sterile) identify the principles of and demonstrate proper body mechanics when performing tasks and/or personal care: lifting, pulling, pushing assisting with body positioning, transferring lifting devices, mechanical aids, safety devices. 	Physiotherapist.

MODULE CMH108: PERSPECTIVES ON HEALTH

Level:

Introductory

Theme:

Health Sciences

Recommended

Corequisite:

None

This module identifies the determinants of good health and examines how they affect well-being. The student will discuss the shared roles, rights and responsibilities of health services and the changing trends in health.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
 The student will: identify the determinants of health and describe how they affect all dimensions of well- 	Assessment of student achievement will be based on: applied problem-solving activity in which the student analyzes a scenario to determine how all dimensions of well-being are affected by the determinants of good health.	10
being	Assessment Tool CMHSAW: Scenario Assessment Worksheet CMH108–1: Perspectives on Health: Sample Scenarios Standard Performance rating of 1	
describe the physical make-up of the human body	 a concept test consisting of a minimum of ten questions in each of the following categories: cells, tissues, organs and body cavities structure and function of the body systems interdependence between the various body systems common medical/anatomical terms disease classification. 	20
	Assessment Tool CMH108–2: Concept Test: Health Sample Questions	
A	Standard Performance rating of 50%	

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: describe how health involves shared roles, rights and responsibilities between the individual and societies	 Assessment of student achievement will be based on: a research report indicating the roles, rights and responsibilities of the government, community, family and the individual for health services. Assessment Tool CMH108-3: Health Services Responsibilities 	40
analyze a current health issue that focuses on the changes in health services	Standard Performance rating of 1 an analysis of two current issues related to health services. Assessment Tool CMH108-4: Issues in Health Services CMH108-5: Issues in Health Services: Sample Scenarios	30
demonstrate basic competencies.	Standard Performance rating of 1 on each issue observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

Concept	Specific Learner Expectations	Notes
The Healthy Body	 The student should: define health WHO definition giving examples of what is meant by physical, mental and social well-being 	
-	develop examples that demonstrate the relationship between physical, social and mental well-being and the overall health of an individual	CALM resources. Scenarios.

Concept	Specific Learner Expectations	Notes
The Healthy Body (continued)	The student should: identify and discuss the determinants of health which are: social and economic environments physical environments biological endowment health services (healthy child development is crucial and factors contributing to child development are included in each category) ssess various cultural differences as they affect health; e.g., blood transfusion circumcision breast feeding immunization restricted genetic pool	Reference the Canadian health Care System – Wilson. Teachers are reminded to be sensitive to the needs of individual students – for some this may be a difficult assignment.
	demonstrate a basic understanding of the physical make-up of the human body: cells, tissues, organs and body cavities structure and function of the 10 body systems interrelationship between the various body systems common medical/anatomical terms: planes directional terms common prefixes, suffixes, root words disease classification	Diagrams, worksheets, overheads. School Nurse. Biology resources. Videos.
Nature of the Health System	examine the role of the federal government in the provision of health services, including: – principles of the 1984 Canada Health Act: 1. public administration 2. comprehensiveness 3. universality 4. portability 5. accessibility – education, health promotion – research – global responsibilities – pension plans – setting standards	WHO, immigration travel.

Concept	Specific Learner Expectations	Notes
Nature of the Health System (continued)	 identify the role of the provincial government in the provision of health services in the following areas: Alberta Health Care Insurance regulation of health professionals Regional Health Authorities Occupational Health and Safety Family and Social Services Specialty clinics 	STD clinics, AADAC.
	 identify the role of the community in the provision of health services through: voluntary agencies special interest groups 	
	identify the role of private industry in the provision of health services, including: physicians nursing physical therapy occupational therapy respiratory therapy alternative (complementary) medicine nutritionists and dietitians home care specialty clinics sports medicine eye care clinics diagnostic facilities abortion vendors pharmacies medical suppliers private insurance	Travel, school, medication, ambulance.

Concept	Specific Learner Expectations	Notes
Nature of the Health System (continued)	 The student should: identify the role of the family in the provision of good health identify the individual's rights and responsibilities in accessing health services. 	Consumer Rights (1989) (4): 1. right to be informed 2. right to be respected as the individual with the major responsibility for his/her own health care 3. right to participate in decision making affecting his/her health 4. right to equal access to health care regardless of the individual's economic status, sex, age, creed, ethnic origin and location. • lifestyle responsibilities • avoiding fraud,
The Changing Focus of Health	describe how the focus of health is changing.	from organ specific treatment to a more holistic approach less paternalistic self-care is encouraged involvement of the family health promotion and education pharmacology.
Ethics/ Professionalism	analyze ethical/professional issues related to health services.	reproductive technology Smart card confidentiality organ transplants the right to live/die medical research.

MODULE CTR121: PERSONAL SAFETY MANAGEMENT

Level:

Introductory

Theme:

Job Safety Skills

Prerequisite:

None

Module Parameters:

Access to personal protective equipment and emergency first aid materials;

access to safety specialists and certificated first aid instructors

Students develop practical safety-related knowledge, skills and attitudes including certification in emergency first aid.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
 identify and describe: health and safety stakeholders legislation relating to health and safety hazards; e.g., offices careers in safety 	 report or presentation on occupational health and safety, including: health and safety stakeholders legislation relating to health and safety hazards; e.g., offices careers in safety. Assessment Tool Generic Rubric: Presentations/Reports 	5 5 10 5
demonstrate basic health and safety practices including: - burn prevention - use of personal protective equipment (PPE) - back care	 presenting a personal health and safety plan and demonstrating safe practices: burn protection personal protective equipment back care. Assessment Tool Basic Competencies Reference Guide Generic Rubric: Presentations/Reports 	10 10 10
develop and implement personal health and safety plan	 meeting the standards specified on a test based on: Workers' Compensation Board Occupational Health and Safety Workplace Hazardous Materials Information System Materials Safety Data Sheets. Assessment Tool CTR121/221/321: Job Safety Skills Modules CTR121-3: Occupational Health and Safety Multiple Choice Test 	20

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • successfully complete a course in emergency first aid (EFA)	Assessment of student achievement will be based on: successful completion of an EFA course	25
demonstrate basic competencies.	 observations of individual effort and interpersonal interaction during the instructional period, emphasizing: managing resources teamwork, leadership and service demonstrating responsibility. 	Integrated throughout
•	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

Concept	Specific Learner Expectations	Notes
Stakeholders	 The student should: define "stakeholders" and identify them in the context of workplace and worker safety define "worker" and "employer" describe the rights and responsibilities of workers and employers explain the role of Workers' Compensation Board (WCB) describe the procedure for filing a claim complete a claim form accurately complete report, using WCB accident forms: employer and employee 	Use resource persons from WCB, an injured speaker. Use actual claim scenarios.
Legislation	 identify information sources about health and safety related to the workplace explain the responsibility of each major stakeholder in a typical workplace locate general and specific information in the legislation regarding major topics. 	Obtain from Queen's Printer: General safety regulations Occupational Health and Safety Act. Subscription to OH&S.

Concept	Specific Learner Expectations	Notes
Terms and Procedures	 The student should: describe the three phases of dealing with a hazard (identification, evaluation and control) explain and use terms related to health and safety; e.g., "hazard", "risk", "accident", "injury" explain the progressive steps in a prevention strategy (hazard, exposure, injury). 	
Commitment	demonstrate a proactive personal commitment toward improvement of health and safety.	
Costs	 identify direct and indirect costs of injuries to Alberta workers explain the reasons why young workers have a disproportionate claim rate. 	
Workplace Hazardous Materials Information System (WHMIS)	 define and explain the basic purpose of WHMIS legislation identify ways workers can receive information about chemical hazards explain how: hazardous chemicals can enter the body principle routes of entry into the body locate and list specific information found on a Material Safety Data Sheet (MSDS). 	Reference: WHMIS Handbook. See Canadian edition (WHMIS) (scriptographic series).

Concept	Specific Learner Expectations	Notes
Hazards	 The student should: define "health" and the aims of occupational health identify and describe the following categories of occupational hazards: physical biological chemical attitudinal list and explain internal and external factors affecting a worker's health status investigate and list potential hazards found in the home, in school or in a workplace. 	
Workplace Safety	 identify and list hazards within a work environment; e.g., office construction site retail child care centres health centres fitness centres describe potential consequences of hazards left unattended recognize appropriate corrective actions demonstrate ability to communicate information appropriately about a hazard and hazard prevention practices to others; e.g., teacher, parent, employer, employees 	Use video: Office Safety: It's a Jungle in There.
	 develop a plan to safely address potential hazards found in a selected workplace. 	

Concept	Specific Learner Expectations	Notes
	The student should:	
Burn Prevention	identify and describe the types and operation of smoke and heat detectors	
	describe the role of detectors in preventing burn injuries or death	
	explain the need for sprinkler systems and their role in reducing injuries, damage and death	
	design an emergency fire escape route for home, school or workplace.	
Personal Protective Equipment	identify and match specific types of personal protective equipment (PPE) to specific hazards	Each trade may have specific PPE. Consult with tradespersons,
	distinguish the specific uses of safety gloves, goggles and face shields	local business, Occupational Health and Safety (OH&S) and
	describe the two types of PPE available to protect against hearing loss	WCB personnel.
	describe the two types of respirators and explain when each should be used	
	list kinds of fall protection devices	
	list different types of special protective clothing and equipment specific to a work site.	
Back Care	label major regions and structures of the spinal column	
	define "chronic" and "acute" back injuries	
	list major causes of back problem	
	identify common back disorders	
	demonstrate appropriate body mechanics for lifting, moving, etc.	
	identify the advantages of participating in a back maintenance program.	

Concept	Specific Learner Expectations	Notes
First Aid	 The student should: participate in a recognized emergency first aid course including CPR; e.g., St. John or Red Cross. 	Various certification programs are available. First-aid certification is normally valid for two years only. Consult with St. John or Red Cross agency. See Community Health CMH109: First Aid.
Careers in Safety	identify and describe potential career paths relating to workplace safety.	Consult with WCB, OH&S, safety and health care professionals.

MODULE CURRICULUM AND ASSESSMENT STANDARDS:

SECTION E: INTERMEDIATE LEVEL

The following pages define the curriculum and assessment standards for the intermediate level of Community Health.

Intermediate level modules help students build on the competencies developed at the introductory level and focus on developing more complex competencies. They provide a broader perspective, helping students recognize the wide range of related career opportunities available within the strand.

Module CMH201:	Adolescent Health Issues	E.3
Module CMH202:	Perspectives on Marriage	E.7
Module CMH203:	Community Volunteerism	E.11
Module CMH205:	Day Care I	E.15
Module CMH206:	Home Care II: Personal Care Services	E.21
Module CMH207:	Sensory Challenges	E.27
Module CMH208:	Anatomy, Physiology, Pathology (Respiration)	
Module CMH209:	Anatomy, Physiology, Pathology (Circulation)	
Module CMH210:	Anatomy, Physiology, Pathology (Muscular/Skeletal)	
Module CMH211:	Complementary Therapies	
Module CMH212:	First Aid/CPR	
Module CMH213:	Sports First Aid I	E.51

MODULE CMH201: ADOLESCENT HEALTH ISSUES

Level: Intermediate

Theme: Sociocultural Perspectives

Prerequisite: None

Further to the examination of adolescent development, this module explores and examines various health issues that are interesting to the modern adolescent teen. Community resources available to teenagers are identified.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: compare and contrast contemporary adolescents with	Assessment of student achievement will be based on: presents a comparison of contemporary adolescents with adolescents of a previous era or a different culture.	20
adolescents of a previous era or a different culture	Assessment Tool CMH201–1: Presentations/Reports: Adolescents Standard Performance rating of 2	
identify and describe issues affecting the well- being of the adolescent	a presentation/report on one adolescent health issue. Assessment Tool CHM201-2: Research Process: Adolescent Health Issues Standard Performance rating of 2	40
identify and evaluate community resources that are available for adolescents	identifying and evaluating a minimum of five community resources available for adolescents. Assessment Tool	10
describe a Personal Action Plan that will promote well-being throughout the lifespan	applied problem solving in which the student addresses an adolescent issue and develops a Personal Action Plan that will promote well-being throughout the lifespan. Assessment Tool CMHPAPW: Personal Action Plan Worksheet Standard All sections have been completed appropriately	20

MODULE CMH201: ADOLESCENT HEALTH ISSUES (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • identify career opportunities related to	Assessment of student achievement will be based on: a report in which the student researches three potential careers related to adolescent health issues.	10
adolescent health issues	Assessment Tool CMH–Careers: Career Profiles	
	Standard Three career profiles, all sections completed for each profile	
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

Concept	. Specific Learner Expectations	Notes
Healthy Adolescents	The student should: define adolescence and related concepts such as: maturity puberty teenager juvenile youth compare the various viewpoints of adolescence from the perspectives of theorists assess current perceptions of adolescents, giving reasons why these perceptions exist and ways teenagers can dispel or perpetuate these perceptions.	Psychology and child development text books. Energetic, assertive, drive toward independence, loyal, enthusiastic, pampered, spoiled, irresponsible, immoral, cynical, rebellious,
		hedonistic.

MODULE CMH201: ADOLESCENT HEALTH ISSUES (continued)

Concept	Specific Learner Expectations	Notes
Application	 The student should: compare and contrast adolescents of today to adolescents of previous eras: colonial adolescents roaring 20s jitterbug era rock'n roll 50s "hippie", "flower children" generation X. 	Develop a comparative chart, dress, music. education, sexuality, leisure time. role expectations.
Cultural Diversities	compare and contrast expectations of adolescents in a multicultural framework.	Exchange students.
Observation and Assessment	 identify concerns and issues of the adolescent considering the interrelatedness of all dimensions of well-being; e.g.; physical; e.g., weight control—underweight/overweight tanning salons substance use/abuse smokeless tobacco, cigarettes tattooing and body piercing. intellectual; e.g., concerns beyond school grades post-secondary decisions graduation grief grades versus part-time work. emotional; e.g., depression anxiety, stress family concerns—effects of divorce, separation, step families suicide. spiritual; e.g., cults Satanism religious influences positive/negative. 	Eating disorders. Steroid use. Alcohol, drugs, prescription drugs.

MODULE CMH201: ADOLESCENT HEALTH ISSUES (continued)

Concept	Specific Learner Expectations	Notes
Observation and Assessment (continued)	 identify concerns and issues of the adolescent considering the interrelatedness of all dimensions of well-being; e.g.: social; e.g., peer expectations/ perceptions STDs teen pregnancy, teen parenting—dating/ relationship abuse teen/parent conflict teen runaways juvenile delinquency. research and present adolescent health issues assess the predominance of the issue as related to adolescents of today review current literature dealing with the issue discuss how the issue affects all dimensions of well-being examine and identify community resources available to adolescents address the health issue by preparing a personal action plan that will promote health throughout the lifespan. 	This research may be teacher directed. student directed or a combination. In may be good to establish criteria for class to research the first topic as a class (teacher directed) before having students research one topic each. It oselect the topic, have an anonymous poll of topics students are most interested in (or a vote) and focus on these.
Career Exploration	 link the issues of adolescents to potential health career opportunities, e.g.: social workers counsellors coaches recreational directors probation officers police pastoral occupations. 	May occur as part of research and report presentations.

MODULE CMH202: PERSPECTIVES ON MARRIAGE

Level: Intermediate

Theme: Sociocultural Perspectives

Prerequisite: None

Students examine relationships and related issues as they apply to marital relationships. Students acquire life skills that will help them now and in the future.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Assessment Criteria and Conditions (Draft)	Suggested Emphasis
Assessment of student achievement will be based on:	
 a concept test consisting of a minimum of: 10 questions on factors affecting healthy marriages 5 questions on legal implications for marriage 3 questions on healthy/unhealthy and abusive relationships. 	20
Assessment Tool CMH202–1: Sample Questions: Marriage	
Standard Performance rating of 50%	
an applied problem solving activity in which the student, using a minimum of two scenarios, analyzes issues affecting marriages today.	20
Assessment Tool CMHSAW: Scenario Assessment Worksheet CMH202–2: Marriages Today: Sample Scenarios	
Standard Performance rating of 2	
a report describing a personal philosophy of marriage, focusing on priorities and giving reasons for your choices.	30
Assessment Tool CMH202-3: Presentations/Reports: Marriage Standard Performance rating of 2	
	 Assessment of student achievement will be based on: a concept test consisting of a minimum of:

MODULE CMH202: PERSPECTIVES ON MARRIAGE (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: describe the resource management necessary when planning a	Assessment of student achievement will be based on: a presentation describing the management of resources (time, money, human) necessary to plan a marriage ceremony.	30
marriage ceremony	Assessment Tool CMH202-4: Research Process: A Marriage Ceremony Standard Performance rating of 2	
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

Concept	Specific Learner Expectations	Notes
Nature of Relationships	 The student should: identify factors to be considered when contemplating marriage identify factors that lead to healthy marriages 	 cultural diversity financial in-laws careers parenting familial expectations.
	distinguish between healthy, unhealthy and abusive relationships	Complete a reflective report based on past and current relationships and future expectations.
	examine legal procedures of getting married, living common-law, annulments, divorce and remarriage, marriage contracts, group marriages, wills.	Newspaper articles social trends.

MODULE CMH202: PERSPECTIVES ON MARRIAGE (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
Application	define and defend lifestyle choices of remaining single, marrying, or other alternatives	(Consider functions, cultural, societal and religious reasons, and legal issues).
	using current research, analyze issues in relationships today	Coming of Age in Alberta. Premier's Council publication.
	 develop a personal philosophy of marriage, prioritizing and giving reasons for your choices, considering the following: religion social cultural fidelity goals children family careers 	
	describe how a personal philosophy may change during different stages of the lifespan	
	present ideas for adjustments in the early period of marriage to determine individual roles and ways of handling finances, in-laws, work, and differences.	
Management	determine the management of resources necessary when planning a marriage ceremony, e.g.: – plan a wedding including; ceremony, reception, wedding attire, invitations, flowers, decorations, favours, food and beverage, photography and/or videos, transportation, music and wedding day grooming, honeymoon and your first home.	Consider cultural contexts. Guest speaker, wedding consultant or use bridal magazines.
Career Exploration	re-examine own marriage philosophy and confirm or make changes explaining the decision.	

MODULE CMH203: COMMUNITY VOLUNTEERISM

Level: Intermediate

Theme: Sociocultural Perspectives

Prerequisite: None

Through exploration and participation, students examine and demonstrate the roles of effective volunteers.

Note: All student release forms required by the school must be in place.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
perform assigned tasks and responsibilities efficiently and effectively as a volunteer	 a portfolio including: job description outlining duties and expectations of the volunteer and the beneficiary placement assessment individual effort interpersonal interactions resource management health and safety. Assessment Tool CMH203-1: Portfolio Assessment: Community Volunteerism 	70
	Standard Performance rating of 2)	
analyze personal performance	 prepare a personal assessment of a volunteer experience including: assessment of present competencies personal action plan for improving competencies. 	20
	Assessment Tool CMH203–1: Portfolio Assessment: Community Volunteerism	
,	Standard Performance rating of 2	

MODULE CMH203: COMMUNITY VOLUNTEERISM (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • identify and describe careers related to the volunteer experience	Assessment of student achievement will be based on: completion of a personal assessment of a volunteer experience as a link to career opportunities.	10
	Assessment Tool CMH203–1: Portfolio Assessment Community Volunteerism Standard Performance rating 2	
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

Concept	Specific Learner Expectations	Notes
Volunteerism	The student should: • define volunteerism	Volunteer work is done by persons of any age who give of their time, talents and energy to help others.
	describe the personal reward of volunteering self esteem learning résumé reference experience community awareness career awareness initiate health promotion list and assess societal benefits of volunteerism	

MODULE CMH203: COMMUNITY VOLUNTEERISM (continued)

Concept	Specific Learner Expectations	Notes
Volunteerism (continued)	 Outline the potential impact of volunteerism on opportunities for paid employment Outline and discuss the essential characteristics of a volunteer: confidentiality/ethics attendance/punctuality resource/time management adherence to rules and regulations safety enthusiasm sense of humour. 	 reliability courtesy caring respectful.
Client	 outline the clients' responsibilities describe what behaviours might be encountered from the clients (e.g., gratitude, embarrassment, resentment) identify possible reasons for these behaviours and suggest strategies to deal with them. 	Therapeutic reciprocity.
Application	 research a suitable community placement which will enhance interests and abilities. Write a job description outlining the duties and expectations. With the teacher's and client's approval, finalize arrangements practice approximately 20 hours volunteerism in a teacher-approved community locale review and analyze an evaluation by the client and a self-evaluation of the volunteer position. 	Telephone several agencies and make an appointment to discuss suitability, needs and wants, time, duties, etc. Relationship with client Utilization of previously acquired knowledge and skills.
Career Exploration	link the volunteer activity(ies) to a possible career opportunity.	

MODULE CMH205: DAY CARE I

Level:

Intermediate

Theme:

Skills for Caring

Corequisite:

Practicum module from Career Transitions in a Day Care centre (required

for certification)

Prerequisite:

Child Development, CMH105 (Recommended sequence)

Module Parameters

If students successfully complete Day Care I and Day Care II, two practicum modules and are 16 years of age, they are eligible for a Level I Orientation Qualification Certificate providing the objectives of the Self-Study Orientation Course for Day Care Centre Staff \star have been met. This is the minimum qualification required for daycare employees in Alberta. Students should be aware that a security check will be required for employment in a day care.

For certification, students must complete a practicum module from Career Transitions in a Day Care centre, under the supervision of a staff member with a minimum Level II Day Care Centre Staff Provincial Qualification Certificate.

Students investigate the roles and responsibilities of a childcare worker, and develop communication and observation skills. Students develop skills to assist in the physical, social, emotional and intellectual development of children from birth to age six. If students successfully complete Day Care I and II practicum modules, and are 16 years of age they are eligible for a Level I Orientation Qualification Certificate.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
investigate the roles and responsibilities of a child care worker	• completion of the tasks and roles assignment (Learning Record PM1-7)†	5
child care worker	Assessment Tool CMHDCAT: Day Care Assessment	
	Standard Performance rating of 2	
identifies aspects of safety that must be	completion of an observation sheet and/or checklist which identifies safe practices in a day care setting	5
considered in a day care setting	Assessment Tool CMHDCAT: Day Care Assessment	
7 - 5	Standard Performance rating of 2	

Self Study Orientation Course for Day Care Stuff available from Alberta Family and Social Services Day Care Programs, Seventh Street Plaza, 10030 - 107 Street, Edmonton, Alberta, T5J 3E4.

[†] Exercises and learning records are found in the Self Study Orientation Course for Day Care Staff.

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: demonstrate communication and observation skills that are necessary for effective child care	Assessment of student achievement will be based on: • practical problem solving activities in which the student using a minimum of three scenarios demonstrates active listening techniques or completes PM2-6 and Learning Records PM2-11, PM2-12.† Assessment Tool CMHSAW: Scenario Assessment Worksheet or CMH205-1: Day Care Assessment Standard Performance rating of 2	20
	• completion of observation assignments (PM3-8, and Learning Records 3-13/14 and 3-15) to demonstrate understanding of "observable behaviour" and "thoughtful inference".† Assessment Tool	20
	CMH205-1: Day Care Assessment Standard Performance rating of 2	
identify strategies to assist a child to develop physically, emotionally, socially, intellectually and creatively	• completion of Learning Records PM4-13/14, PM5-11/12, PM5-14, PM7-15/16/17 or equivalent observation assignment to demonstrate an understanding of the stages of development and tasks associated with physical, emotional, social, intellectual and creative growth.†	40
1-1-1-1	Assessment Tool CMH205–1: Day Care Assessment Standard Performance rating of 2	,
describe developmentally appropriate experiences, materials and activities which would promote language development	• completion of PM6-10 and Learning Record PM6-11 and PM6-13 indicating responses that promote language development.† Assessment Tool CMH205-1: Day Care Assessment Standard Performance rating of 2	10

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • demonstrate basic competencies.	Assessment of student achievement will be based on: observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

Concept	Specific Learner Expectations	Notes
Orientation	 The student should: identify the roles and responsibilities of a child care worker define "primary staff" member—a term used by Alberta Family and Social Services. 	Session I of Self Study Orientation Course For Day Care Staff. Guest Speaker (Day Care Director) Field trip to a day care centre.
Management	 examine the dynamics of communication: how people communicate skills for active listening barriers to communication explain why observing and recording behaviour is important: record children's behaviour objectively and make thoughtful inferences identify factors that might influence observations. 	Session 2 Self Study Orientation Course for Day Care Staff. Alternate strategies: Scenarios. Session 3 Self Study Orientation Course for Day Care Staff. Reference: Studying Children: Observing and Participating. Observation at a day care. Discussion with day care staff.

Concept	Specific Learner Expectations	Notes
The Healthy Child	The student should:	
Physical Development	 describe the stages of physical development. Distinguish between fine and gross motor skills identify factors that influence growth and development, including: heredity environment opportunity stimulation/affection nutrition illness and special needs other (climate etc.) sex (gender) differences 	Reference: Session 4 of Self Study Orientation Course for Day Care Staff. Observation and practice at day care. References: Studying Children: Observing and Participating. Discussions with day care staff. Videos: Developing Child; First Two Years: What Lily Learned Years Three Through Five: What Lily Learned
Health Promotion	recognize activities that promote physical growth and development	Pamphlet: Good Food For Growth: Preschool Nutrition.
Safety	identify some factors to consider when providing a safe environment for physical growth and development.	Session 4: Self-Study Orientation for Day Care Workers. Video: Toddler Safety, What Lily Learned. Pamphlet: Is Your Child Safe?
Intellectual Development	 define intellectual development identify the stages of intellectual development identify how children use materials differently at various stages of intellectual development describe appropriate practices which would support intellectual development 	Session 5: Self-Study Orientation for Day Care Workers. Videos: same as for "The Healthy Child".

Concept	Specific Learner Expectations	Notes
• Language/ Literacy Development	 The student should: describe how language develops describe how to stimulate early literacy learning identify caregiver strategies that would promote language development plan and implement activities that would promote language development 	Session 6, Self-Study Orientation for Day Care Workers. Video: Day Care Matters: Communicating With Children. Pamphlet: Let's Talk About Talking.
Social-Emotional Development	 discuss the development of trust, initiative and independence as children develop emotionally and socially self-esteem develop guidelines for an emotionally safe environment that would encourage positive development demonstrate and practice appropriate responses and experiences which support the emotional and social development of young children identify and assess appropriate actions for dealing with children's strong emotions. explain how physical, social, emotional and intellectual development are interrelated 	Session 7, Self-Study Orientation for Day Care Workers. Videos: Same as for "The Healthy Child". Video: Discipline: What Lily Learned.
Career Exploration	inventory his/her personal characteristics and skills that would be useful for a career in child care.	

MODULE CMH206: HOME CARE II: PERSONAL CARE SERVICES

Level: Intermediate

Theme: Skills for Caring

Prerequisite: Home Care I (CMH106)

Module Parameters: The student should have access to instruction from an individual with

formal, specialized training in health care skills

Students identify and demonstrate the skills necessary to provide personal care services for special conditions, recognizing the impact on the individual and family members. A project module from Career Transitions in a community care facility will enhance student learning in this area.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify the basic needs of client, caregiver and the family	applied problem solving in which the student, given three scenarios, describes the holistic needs of the client, caregiver and the family.	- 10
	Assessment Tool CMHSAW: Scenario Assessment Worksheet	
	Standard Performance rating of 2	
demonstrate recording and reporting procedures	practical charting activities in which the student prepares clear, concise written notes and verbal reports.	10
	Assessment Tool CMHHCSA-2: Home Care Skills Assessment	
	Standard Performance rating of 2 in each category	

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify the situation and recommend solutions for individuals with special conditions	 presentation on a special condition including: disease processes heredity factors age influences care required impact of the conditions on the individual, the caregiver, the family and the community community resources available 	40
	 plan a one-day menu for an individual with this special condition considering: nutrition presentation promotion of recovery cultural considerations physical problems. 	
	Assessment Tool CMH206–2: Research Process: Special Conditions	
	Standard Performance rating of 2 in each category	
	practical problem-solving activities in which the student describes or demonstrates a minimum of ten personal care skills.	30
	Assessment Tool CMHHCSA-2: Home Care Skills Assessment	
	Standard Performance rating of 3 on each skill	
describe personal competencies that would influence choosing a career in home care	• completion of a self-evaluation that describes personal knowledge, skills and attitudes that would influence choosing a career in home care. Assessment Tool CMH206-3: Presentations/Reports: Personal Competencies	10
	Standard Performance rating of 2	

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • demonstrate basic competencies.	Assessment of student achievement will be based on: observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

Concept	Specific Learner Expectations	Notes
Health Promotion	The student should: describe the characteristics of physical, emotional, economic and social health as they apply to both client and caregiver, applying a basic understanding of the lifespan.	Maslow's Hierarchy. Developmental tasks through lifespan.
Observation, Assessment and Application	 identify special conditions related to the body systems; e.g.:, cancer, arthritis, osteoporosis, Parkinson's, epilepsy, spinal cord injuries, diabetes, multiple sclerosis, cerebral palsy, asthma, including: disease processes heredity factors aging components care required outline the impact of these conditions on the individual, the caregiver, the family and the community identify community support resources available 	Use resources from specific community agencies.

Concept	Specific Learner Expectations	Notes
Observation, Assessment and Application (continued)	The student should: • identify the nutritional requirements of individuals with special dietary needs considering: - four food groups - well-balanced diet - presentation of meals - meals to promote recovery - cultural - special diets - physical problems	Canada's Food Guide. Module FOD301 Food Through the Lifecycle. Plan, prepare and evaluate meals to meet the requirements of a person with special needs.
	describe and/or demonstrate personal care skills necessary in the following areas: bed bath, tub or shower mouth care (dentures or other) skin care, shaving, massage, foot, nail, and hair care bowel/bladder elimination (bed pan, urinal or commode) feeding dressing a client positioning to prevent skin breakdown range of motion exercises transferring a person bed making (closed, open or occupied), accessory bed devices cast care aids or prostheses	Types of baths. Equipment necessary. Health promotion. Consider cultural diversity, personality, privacy issue, lifespan stages. Universal precautions for infection control (including gloves and masks when appropriate). Use community resources. Use physiotherapists as resources.
	 identify guidelines for recording and reporting procedures, employing the senses and demonstrating components of client observation (body systems, emotional, and social): observe and report observations effectively, explaining their importance and distinguishing between the separate categories (facts and opinions) prepare clear and concise written and verbal reports 	 Dignity and privacy. Review basic aseptic techniques. Observation and communication skills in: Self awareness. Appropriate feedback. Biological needs. Psychological needs.

Concept	Specific Learner Expectations	Notes
Observation, Assessment and Application (continued)	 The student should: define principles of rehabilitation with a focus towards maximizing the client's abilities explore activities and interests which would promote wellness. 	Occupational/recreational therapists. Physiotherapists. Respiratory therapists.
Career Exploration	inventory and relate personal knowledge, skills and abilities to career options in one of the following areas: continuing care centre, active treatment or rehabilitation, private duty registry, community health services.	

MODULE CMH207: SENSORY CHALLENGES

Level: Intermediate

Theme: Skills for Caring

Prerequisite: None

Module Parameters: It is recommended that the student have access to instruction from an

individual with formal, specialized training in American Sign Language or

Braille

This module examines sensory challenges and the impact on the individual and on family dynamics. Community resources and technologies that are available are identified. Students have an opportunity to study communication skills for sensory challenged individuals. Accessing the volunteer module or completing a project module from Career Transitions will enhance student learning in this area.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify situations and recommend solutions for sensory challenged individuals	 a concept test consisting of a minimum of ten questions on hearing and vision five questions on smell and taste five questions on pressure, heat, cold, pain and touch two questions on position and balance. 	15
	Assessment Tool CMH207–1: Concept Test	
1 1 1 1 1	Standard Performance rating of 50%	
	a report describing a condition affecting the sensory system including: - causes - signs and symptoms - treatment - prevention - the impact of the condition on the individual, the family and the community - resources and technologies available - adaptations to promote independence.	25
7	Assessment Tool CMH207–2: Presentations/Reports: Sensory Challenges	
	Standard Performance rating of 2 :	

MODULE CMH207: SENSORY CHALLENGES (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
describe a personal action plan that will promote and maintain a	applied problem solving in which the student presents a Personal Action Plan to promote and maintain a healthy sensory system.	10
healthy sensory system	Assessment Tool CMHPAPW: Personal Acton Plan Worksheet	
	Standard All sections have been completed appropriately	
demonstrate techniques to assist communication with a sensory	a practical activity in which the student demonstrates communication techniques to assist a vision or hearing challenged individual.	40
challenged individual	Assessment Tool CMH307–3: Communication Skills Assessment	
	Standard Performance rating of 2 in each skill	
identify career opportunities in this area	 completion of three career profiles for careers in this area including personal characteristics, education/qualifications, duties/working conditions, salary range and benefits, employment opportunities, advancement potential and personal qualifications. 	10
	Assessment Tool Assessment Guide: Career Profiles	
	Standard Performance rating all sections completed for three career profiles	
demonstrate basic competencies.	observations of individual effort and interpersonal interactions during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

MODULE CMH207: SENSORY CHALLENGES (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
The Human Body	 locate, describe and state the function of the sensory system components (vision, hearing, taste, smell, touch, position and balance) identify conditions that may affect the sensory system through the lifespan as to: causes signs and symptoms treatment prevention 	Conduction loss. Sensorineural loss. acoustic neuroma cataracts glaucoma Meniere's disease myringotomy otosclerosis retinitis pigmentosa retinopathies.
	describe the impact of a sensory challenge on the individual, the family and the community.	Physical, social, economic, intellectual, spiritual.
Observation	describe adaptations to activities of daily living a sensory challenged individual makes to promote independence	Advocacy.
	identify specific treatments, technologies and community resources available to the individual with a specific sensory challenge.	Multi-media technologies. Cochlear implants.
Health Promotion	outline measures an individual can take to promote and maintain a healthy sensory system.	Personal action plan.
Assessment and Application	demonstrate communication techniques for a hearing or vision deficit.	Learn the basics of sign language or braille. Expand with a project module (CRT) or Community Health Volunteerism (CMH203). Community resources.
Career Exploration	 investigate careers available in the area of sensory challenges including: duties, working conditions personal characteristics education qualifications (locations, length, cost, course content) salary range and benefits employment opportunities advancement potential. 	

MODULE CMH208: ANATOMY, PHYSIOLOGY, PATHOLOGY (RESPIRATION)

Level: Intermediate

Theme: Health Sciences

Prerequisite: None

Through the study of the anatomy, physiology and pathology of the respiratory system, students gain an appreciation of practicing a healthy lifestyle, and acquire the knowledge and skills to deal with respiratory conditions as they affect the individual, family and friends. Community support resources are identified.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify and describe the anatomy, physiology, pathology, causes, treatment, prevention, impact and support resources available for selected respiratory conditions	 concept testing consisting of a minimum of ten questions in each of the following categories: structure of the respiratory system function of the respiratory system mechanism of pulmonary ventilation pathology of the respiratory system. Assessment Tool CMH208-1: Concept Test: Respiration - Sample Questions 	30
	Standard Performance rating of 50%	30
	 a presentation or report describing a selected respiratory condition as to: pathology and treatment prevention causes impact on the individual, family and the community community support resources available. 	30
1975	Assessment Tool CMH208–2: Presentations/Reports: Respiratory Conditions	
	Standard Performance rating of 2	

MODULE CMH208: ANATOMY, PHYSIOLOGY AND PATHOLOGY (RESPIRATION) (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
describe the causes, prevention, signs, symptoms and demonstrate treatment of respiratory emergencies	 practical problem-solving activities in which the student, using a minimum of 2 scenarios, recognizes respiratory emergencies and demonstrates appropriate first-aid procedures. Assessment Tool CMHSAW: Scenario Assessment Worksheet CMH208-3: Respiratory Emergency: Sample Scenarios 	20
	Standard Performance rating of 2 for each scenario	
describe a personal action plan that will promote and maintain a healthy respiratory system	applied problem-solving in which the student develops a Personal Action Plan to promote/maintain respiratory health. Assessment Tool	10
identify career opportunities related to respiratory health	 completion of three career profiles for careers in this area that include: duties, working conditions education qualifications employment opportunities advancement potential salary and benefits personal characteristics. Assessment Tool Assessment Guide: Career Profiles Standard Three career profiles; all sections completed for each profile 	10
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

MODULE CMH208: ANATOMY, PHYSIOLOGY AND PATHOLOGY (RESPIRATION) (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
The Healthy Body	locate, describe and state the functions of the structures of the respiratory system: - nasal cavity	 Stethoscope Models Diagrams Dissection Software CD ROM.
	explain mechanism of pulmonary ventilation	Develop a flow chart that shows the mechanism of pulmonary ventilation.
	describe how respirations are regulated and identify factors that alter respiratory rate and volume.	Spirometer.
Observation, Assessment and Application	describe the causes, signs and symptoms and treatment of acute and chronic respiratory conditions in individuals throughout the lifespan	For example: colds, flu, pneumonia, bronchitis, asthma, pleurisy). Presentations.
	identify the social, emotional and economic effects of these conditions on the individual, the family, peers and the community	Reports. Role-play. Guest speakers.
	describe the causes, signs and symptoms, treatment, and prevention of respiratory emergencies; e.g., acute asthmatic attack, flail chest, airway obstruction, respiratory arrest	Infant, child, adult, obese, pregnant.
	identify the equipment which is available for respiratory conditions	Use of oxygen, suction, inhalers, masks, bronchoscope, tracheotomy tubes.
	outline the community resources available to individuals with respiratory conditions.	
Health Promotion	outline measures an individual can take to promote and maintain a healthy respiratory system.	Personal action plan.

MODULE CMH208: ANATOMY, PHYSIOLOGY AND PATHOLOGY (RESPIRATION) (continued)

Concept	Specific Learner Expectations	Notes
Career Exploration	 The student should: research and analyze the career choices which are available in the area of respiratory technologies: duties, working conditions education qualifications employment opportunities advancement potential salary range and benefits personal characteristics. 	•

MODULE CMH209: ANATOMY, PHYSIOLOGY AND PATHOLOGY (CIRCULATION)

Level:

Intermediate

Theme:

Health Sciences

Prerequisite:

None

Through study of the anatomy, physiology and pathology of the circulatory system, students gain an appreciation of practicing a healthy lifestyle, and acquire the knowledge and skills to deal with circulatory conditions as they affect the individual, family and friends. Community support resources are identified.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum And Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify and describe the anatomy, physiology, pathology, causes, treatment, prevention, impact and support resources available for selected cardiovascular	 a concept test that consists of a minimum of ten questions in each of the following categories: structure of the circulatory system function of the circulatory system structure and function of the lymphatic system pathology of circulatory and lymphatic system. Assessment Tool 	30
conditions	CMH209–1: Concept Test – Circulation Sample Questions	
	Standard A performance rating of 50%	
Contract of the	a presentation/report describing a selected cardiovascular condition as to: – pathology and treatment	30
	 causes prevention impact on the individual, family and the community community community support resources available. 	
1 12	Assessment Tool CMH209–2: Presentations/Reports: Cardiovascular Conditions	
/ /	Standard Performance rating of 2	

MODULE CMH209: ANATOMY, PHYSIOLOGY AND PATHOLOGY (CIRCULATION) (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: describe the causes, signs and symptoms, treatment and prevention of cardiovascular emergencies	 Assessment of student achievement will be based on: practical activities in which the student, using a minimum of 2 scenarios, recognizes circulatory emergencies and demonstrates appropriate first aid procedures: first aid for wounds and bleeding first aid for shock. 	10
	Assessment Tool CMHSAW: Scenario Assessment Worksheet Standard Performance rating of 2 for each scenario	
describe a personal action plan that will promote and maintain a healthy cardiovascular system	applied problem solving in which the student develops a Personal Action Plan that promotes and maintains a healthy cardiovascular system. Assessment Tool CMHPAPW: Personal Action Plan Worksheet	10
	Standard All sections have been completed appropriately	
analyze an ethical issue related to cardiovascular health	 analysis of an issue relating to the circulatory system. Assessment Tool CMH209-4: Issue Analysis: Circulatory System Standard Performance rating of 2 	10
identify career opportunities related to cardiovascular health	 completion of three career profiles for careers in this area that include: duties, working conditions education qualifications employment opportunities advancement potential salary and benefits personal characteristics. 	10
	Assessment Tool Assessment Guide: Career Profiles Standard Three career profiles; all sections completed for each profile	

MODULE CMH209: ANATOMY, PHYSIOLOGY AND PATHOLOGY (CIRCULATION) (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • demonstrate basic competencies.	Assessment of student achievement will be based on: observations of individual effort and interpersonal interaction during the learning process.	Integrated throughout
'-	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

Concept	Specific Learner Expectations	Notes
The Healthy Body	The student should: I locate and describe the function of: the heart blood blood vessels the lymphatic system.	Model. Heart dissection. Blood types. Pulse rates—throughout the lifespan—before, during and after exercise. Blood pressure. Guest speakers. Blood donor clinics.
Observation, Assessment, Application	 describe the causes, signs and symptoms and treatments of the following circulatory conditions: heart disease congenital abnormalities vascular disorders blood disorders lymphatic disorders 	For example: rheumatic fever heart murmur varicose veins, arteriosclerosis leukemia mononucleosis.
	identify possible social, emotional and economic effects of these conditions on the individual, family, peers and the community	Discuss technological advances to treat cardiovascular conditions.
	describe the causes, signs and symptoms, treatment and prevention of cardiovascular emergencies	Demonstrate the treatment of wounds and bleeding. Shock. CPR—if a certified instructor
	outline the community resources available to individuals with cardiovascular conditions.	Ambulance call – golden hour.

MODULE CMH209: ANATOMY, PHYSIOLOGY AND PATHOLOGY (CIRCULATION) (continued)

Concept	Specific Learner Expectations	Notes
Health Promotion	outline measures an individual can take to promote and maintain a healthy circulatory system.	Personal Action Plan.
Ethics	identify ethical issues related to cardiovascular health	Blood transfusions. Organ donation. Transplants.
Career Exploration	 research the career opportunities related to cardiovascular health including: training or education required employment opportunities volunteer opportunities tasks, working conditions salary and benefits. 	

MODULE CMH210: ANATOMY, PHYSIOLOGY AND PATHOLOGY

(MUSCULAR/SKELETAL)

Level:

Intermediate

Theme:

Health Sciences

Prerequisite:

None

Through study of the anatomy, physiology and pathology of the muscular/skeletal system, students gain an appreciation of practicing a healthy lifestyle, and acquire the knowledge and skills to deal with muscular/skeletal conditions as they affect the individual, family and friends. Community support resources are identified.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	20
identify and describe the anatomy, physiology, pathology, causes, treatment, prevention, impact and support	 a concept test consisting of a minimum of 10 questions in each of the following categories structure and function of the skeletal system structure and function of the muscle system 	30
resources for selected muscle/skeletal conditions	 pathology of muscular/skeletal system. Assessment Tool CMH210-1: Concept Test Muscular/Skeletal Sample Questions 	
	Standard Performance rating of 50%	
	a presentation/report that describes a selected muscular/skeletal condition as to: pathology and treatment	30
	 causes prevention impact on the individual, family and community community support resources available. 	
	Assessment Tool CMH210–2: Presentations/Reports: Muscular/ Skeletal Conditions	
Ma in	Standard Performance rating of 2	

MODULE CMH210: ANATOMY, PHYSIOLOGY AND PATHOLOGY (MUSCULAR/SKELETAL) (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
describe the causes, prevention, signs and symptoms and demonstrate the	practical problem solving activities in which the student, using a minimum of 2 scenarios, recognizes muscular/skeletal emergencies and demonstrates appropriate first aid procedures.	20
treatment of muscular/ skeletal injuries	Assessment Tool CMHSAW: Scenario Assessment Worksheet CHM210–3: Muscular/Skeletal Sample Scenarios	
E 2 4	Standard Performance rating of 2 for each scenario	
identify a personal action plan that will promote and maintain	applied problem solving in which the student develops a Personal Action Plan to promote and maintain muscular/skeletal health.	10
healthy muscular and skeletal systems	Assessment Tool CMHPAPW: Personal Action Plan Worksheet	
	Standard All sections have been completed appropriately	
identify career opportunities related to the muscular/skeletal system	 completion of three career profiles for careers in this area, including: duties, working conditions education qualifications employment opportunities salary range and benefits advancement potential 	10
	- personal characteristics.	
	Assessment Tool Assessment Guide: Career Profile	
	Standard Three career profiles; all sections completed for each profile	
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

MODULE CMH210: ANATOMY, PHYSIOLOGY AND PATHOLOGY (MUSCULAR/SKELETAL) (continued)

Concept	Specific Learner Expectations	Notes
The Healthy Body	 The student should: locate, describe and state the functions of the structures of the muscular/skeletal system describe the aging process from embryos to seniors and gender differences in the muscular/skeletal systems. 	Model. Skeleton. Diagram. Software packages.
Observation, Assessment and Application	 describe the causes, signs and symptoms and treatment of a variety of muscular/skeletal conditions describe the social, emotional and economic impact of these conditions on the individual, family, peers and the community describe the causes, signs and symptoms, prevention and treatment of muscular/skeletal emergencies identify the community support resources that are available for muscular/skeletal conditions. 	arthritis bow legs bunions bursitis cleft palate club foot fallen arches hammer toes herniated disc muscular dystrophy osteoporosis rickets scoliosis, kyphosis, lordosis tendonitis tumors webbed and extra digits (polydactylism). Discuss sprains, strains, dislocations, fractures. Apply a sling, splints, discuss casts.
Health Promotion	outline measures an individual can take to promote and maintain a healthy muscular/skeletal system through the life span.	Nutrition, exercise. Personal action plan.
Career Exploration	describe and assess a career related to the muscular/skeletal system including: - duties, working conditions - education qualifications - employment opportunities - salary range and benefits - advancement potential - personal characteristics.	Posters Guest speakers Report (job shadowing activity).

MODULE CMH211: COMPLEMENTARY THERAPIES

Level: Intermediate

Theme: Health Sciences

Prerequisite: None

Students examine complementary therapies, their foundations, applications, costs, ethical issues and predictions for the future.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • research and critique a	Assessment of student achievement will be based on: presentation of a research report and comment on the validity of one complementary therapy, including:	90
 identify career opportunities in complementary therapies 	- specific components - ethical considerations - consumer issues - community resources - prevalence of the therapy	
**. **. **.	 future outlook for the therapy career opportunities including personal characteristics, education/training, working conditions, salaries, employment/entrepreneurial opportunities. 	10
	Assessment Tool CMH211-1: Research Process: Complementary Therapies	
	Standard Performance rating of 2	
demonstrate basic competencies.	observation of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

MODULE CMH211: COMPLEMENTARY THERAPIES (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
Health Promotion	describe what complementary therapies are and their role in the emerging new paradigms focusing on health promotion and illness prevention	Maintenance of health and prevention of illness rather than treatment of symptoms and disease.
		Relationship of body, mind, emotions, social with the environment in determining health states.
		Focus on natural, non- invasive techniques to promote health and healing.
		Draws from healing wisdom of many lands and cultures.
		Empowers individuals to participate in their own healing process.
	identify principles that define the philosophy and foundation of complementary therapies.	Such as: • healing power of nature (body to heal self) • "first do no harm" • identify and treat cause (not just symptoms) • therapist as 'teacher' (achieving health/ avoiding disease).
Application	define, describe and critique a variety of complementary therapies	Example: Aromatherapy Acupuncture, Acupressure massage, Ayruvedic medicine (India), Chiropractor, Meditation Yoga, Hypnosis, Biofeedback, Relaxation and Visualization therapy, Homeopathy, Exercise therapy, Hydrotherapy, Music therapy, Reflexology, Naturopathy, Nutrition Osteopathy, Herbology, Therapeutic Touch, Reiki, Bioenergetics, NLP (neurolinguistic programming).

MODULE CMH211: COMPLEMENTARY THERAPIES (continued)

Concept	Specific Learner Expectations	Notes
Application (continued)	 examine ethical considerations related to complementary therapies examine consumer issues such as cost factors, reliability of product, availability, etc. research specific information for a written and/or oral presentation on applications of a specific approach and treatment therapies offered through complementary therapies identify alternative futures of complementary therapies. 	
Career Exploration	describe and assess career opportunities within the areas of complementary therapies.	Occupational interviews. Job shadows. Areas of: homeopathy, naturopathy, osteopathy, chiropractic, medical doctor, biochemistry, nutrition, cultural medicines, etc.

MODULE CMH212: FIRST AID/CPR

Level:

Intermediate

Theme:

Injury Prevention

Prerequisite:

None

Module Parameters:

The student must have access to instruction from an individual with a current instructor's certificate in First Aid and CPR

Students study first-aid skills and demonstrate techniques and procedures for dealing with emergency situations. Students qualify for a Standard First Aid Certificate if they meet the competencies specified by the credentialling agencies. To certify students, instructors must be currently certified First Aid/CPR instructors.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Standards	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify the role and responsibilities of the first-aider		5
identify situations and recommend solutions to life-threatening emergencies	a concept test consisting of a minimum of 50 questions. Assessment Tool Theory examination from the credentialling agency	25
	Standard Performance rating as required for certification by the certifying agency or 50% for module credit	
demonstrate first-aid procedures required in emergency situations	 practical activities in which the student describes the roles and responsibilities of a first aider, demonstrates all skills and describes the holistic care of all individuals involved in the emergency. Assessment Tool Practical examination checklist from credentialling agency 	50
describe how to meet the physical, emotional, psychological and social needs of all individuals involved in the emergency	Standard Performance rating as required for certification	

MODULE CMH212: FIRST AID/CPR (continued)

Module Learner Expectations	Assessment Standards	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
develop a Personal Action Plan to prevent emergency situations	applied problem solving in which the student presents a Personal Action Plan that will prevent emergency situations and injuries.	10
and injuries at home, at work and in the community	Assessment Tool CMHPAPW: Personal Action Plan Worksheet	
Community	Standard All sections completed appropriately	
identify career opportunities within the first-aid community	 completion of three career profiles for careers in this area that include: duties, working conditions education qualifications employment opportunities advancement potential salary range and benefits personal characteristics. 	10
- 1 - 1 - 5	Assessment Tool Assessment Guide: Career Profile	
	Standard Three career profiles; all sections completed for each profile	
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process.	Integrated throughout
The said	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

Concept	Specific Learner Expectations	Notes
Introduction to First Aid	 The student should: outline the objectives of first aid describe the role and responsibilities of a first aider 	

MODULE CMH212: FIRST AID/CPR (continued)

Concept	Specific Learner Expectations	Notes
Introduction to First Aid (continued)	The student should:	
 Safety Promotion Ethics 	 state the universal precautions in first aid identify preparations for emergencies: first aid kit family records emergency telephone numbers identifying hazards and associated risks outline the legal implications of performing first-aid: Good Samaritan Law (Emergency Medical Act) permission to act (consent) state principles of confidentiality. 	
Assessment Observation	 demonstrate the principles of emergency scene management including: scene survey primary survey (ABC) secondary survey ongoing casualty care. 	Sequence of steps when arriving at the scene. Care given while waiting for medical help.
Application	outline the causes of injuries and demonstrate first aid procedures for the following: - shock, unconsciousness and fainting - respiratory arrest (adult), assisted breathing - choking (adult) - severe bleeding, amputations and internal bleeding - cardiac arrest (one-rescuer CPR-adult) - secondary survey - bone and joint injuries	Videos. Teacher demonstration. Student practice. Student demonstration. Skill performance evaluation. Humerus Radius and ulna Femur Tibia and Fibula

MODULE CMH212: FIRST AID/CPR (continued)

Concept	Specific Learner Expectations	Notes
Application (continued)	The student should: • identify the causes of injuries and demonstrate first aid procedures for the following: - head/spinal and pelvic injuries - chest injuries - wound care - multiple casualty management - rescue carries - eye injuries - burns - poisons, bites, stings - medical conditions - environmental illnesses and injuries	Head/spinal precautions. Triage. Diabetic crisis, convulsions, asthma, allergies. Heat illnesses, cold injuries.
Management	 emergency childbirth and miscarriage. identify emotional and psychological needs of the casualty and family which must be addressed during an emergency situation: normal reactions fear and crisis cultural component describe barriers to action that may influence the actions of the first-aider: fear of imperfect performance reluctance to take charge fear of infection nature of the injury fear of being sued cultural beliefs. 	Child abuse victims.
Health Promotion	develop a Personal Action Plan for preventing emergency situations including safety guidelines at home, at work, in a motor vehicle and at play.	Resource: Occupational Health and Safety magazine.
Career Exploration	identify career opportunities that are available in the first aid community including prerequisites, education/training, working conditions, salaries and employment and entrepreneur opportunities.	

MODULE CMH213: SPORTS FIRST AID I

Level:

Intermediate

Theme:

Injury Prevention

Recommended

Prerequisite:

First Aid/CPR (CMH212)

Recommended

Corequisite:

A project module from Career Transitions

Module Parameters: It is recommended that the student have access to instruction from an

individual with formal, specialized training in athletic first aid

Students learn about the different aspects of sports injuries, first-aid care and prevention of athletic injuries.

Upon successful completion of this module, the student is eligible to receive an Athletic First Aid Certificate from the Sports Medicine Council of Alberta.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: describe how the roles and responsibilities of an Athletic First Aider help promote and maintain healthy athletes and help	 Assessment of student achievement will be based on: a presentation in which the student: describes 3 roles and responsibilities of an Athletic First Aider identifies structures most susceptible to athletic injuries and describe the injuries most likely to 	20
reduce sports injuries	occur - identifies and describes a minimum of 8 activities that promote and maintain healthy athletes and help reduce sports injuries.	
1-	Assessment Tool CMH213–1: Presentations/Reports: Sports First Aid Standard	
-	Performance rating of 2	

MODULE CMH213: SPORTS FIRST AID I (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify situations and recommend solutions for common athletic injuries	practical activities in which the student: describes how to treat: infections and wounds pelvic, abdominal and thoracic conditions facial injuries thermal injuries demonstrates the following taping techniques: cloth wrap closed ankle alternate heel lock thumb hyperextension triangular bandage.	30
	Assessment Tool CMHSFASA: Sports First Aid Skills Assessment Standard	
	Performance rating of 3 on each skill	
	problem solving activities in which the student, using a minimum of three scenarios, recognizes common athletic injuries and outlines treatment.	20
	Assessment Tool CMHSAW: Scenario Assessment Worksheet CMH213–2: Sports First Aid Sample Scenarios	
	Standard Performance rating of 2	
	a concept test consisting of a minimum of 30 questions on all aspects of Sports First Aid.	15
	Assessment Tool CMH213–3: Sports First Aid Sample Questions	
	Standard Performance rating of 50%	
 develops a game plan and emergency action plan as an Athletic First 	 presenting game plan preparations and emergency action plans necessary for an effective Athletic First Aider. 	15
Aider	Assessment Tool CMH213-4: Presentations/Reports: Game Plan Preparations	
	Standard Performance rating of 2 in each category	

MODULE CMH213: SPORTS FIRST AID I (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • demonstrate basic competencies.	Assessment of student achievement will be based on: observations of individual effort and interpersonal interactions during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

Concept	Specific Learner Expectations	Notes
Professionalism	 The student should: describe the roles and responsibilities of the Athletic First Aider. 	Prevent injuries. Never let minor injuries become major ones. Medical referral.
Health Promotion	 identify activities that can prevent sports injuries: medical examinations lifestyle protective equipment (i.e., awareness of use, importance of, maintenance and repair) safe environment fitness, conditioning testing	Injury prevention lab. Movement analysis lab. Methods of conditioning. Strength training lab. Basic fitness and stress testing (field trip).
The Human Body	 identify the structures most susceptible to athletic injuries and describe the injuries that are most likely to occur classify injuries as acute, chronic or recurrent describe the inflammation and repair processes that accompany trauma. 	On-scene Lab. Case study presentations:

MODULE CMH213: SPORTS FIRST AID I (continued)

Concept	Specific Learner Expectations	Notes
Implementation	The student should: assess the injured athlete — primary scan — secondary scan demonstrate how to respond to major injuries involving airway, breathing, circulation, central nervous system describe how to treat the following athletic injuries: — infections and wounds — pelvic, abdominal and thoracic conditions — facial injuries — thermal injuries demonstrate basic treatment — R.I.C.E. (R = rest, I = ice, C = compression, E = Elevation explain the theory of taping — purpose of taping — material selection — application theory demonstrate basic taping skills — basic principles — cloth wrap technique — closed ankle technique — alternate heel lock technique — thumb hyperextension	Demonstrations and practical skills lab. Injury simulation lab. Case studies.
Career Exploration	 develop game plan guidelines which prepares the Athletic First Aider for sporting injuries or emergencies emergency procedures plan side line activities first aid supplies assessing the injured athlete indicating how to determine when the athlete may return to complete the activity. 	

MODULE CURRICULUM AND ASSESSMENT STANDARDS: SECTION F: ADVANCED LEVEL

The following pages define the curriculum and assessment standards for the advanced level of Community Health.

Advanced level modules demand a higher level of expertise and help prepare students for entry into the workplace or a related post-secondary program.

Module CMH301:	Family Issues	F.3
Module CMH302:	Parenting	F.7
Module CMH303:	Aging	F.11
	Pre- and Post-natal Care	
Module CMH305:	Day Care II	F.19
Module CMH306:	Home Care III: Special Conditions	F.25
	Challenged Individuals	
	Anatomy, Physiology, Pathology (Digestion/Elimination)	
	Anatomy, Physiology, Pathology (Nervous/Endocrine)	
	Mental Health	
	Advances in Medical Technology	
	First Aid/CPR for Infants and Children	
	Sports First Aid II	

MODULE CMH301: FAMILY ISSUES

Level:

Advanced

Theme:

Sociocultural Perspectives

Prerequisite:

None

This module examines changes that occur within a family and the required adjustments family members must make. Cultural diversities are investigated and community resources are identified.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: describe the changing rights, responsibilities and family dynamics that occur throughout the family life cycle	 Assessment of student achievement will be based on: problem solving activity in which the student describes the changing roles, responsibilities and family dynamics throughout the life cycle. Assessment Tool CMH301-1: Family Life Cycle Chart Standard Performance rating of 3 in each category 	20
compare and contrast families from diverse cultures	 a comparative analysis in which the student compares and contrasts a minimum of two cultures as to: family structure family dynamics family traditions education and health beliefs/practices. Assessment Tool CMH301-2: Presentations/Reports: Family Comparison Standard Performance rating of 3 in each category 	30
assess the effect on the physical, mental and social well-being of the family as changes occur in careers, relationships, personal life and financial situations	 a report in which the student assesses the influence of change on family well-being, discussing the impact of one change in each of the following categories: career changes relationship changes personal changes financial changes. Assessment Tool CMH301-3: Presentations/Reports: Change and Family Well-being Standard Performance rating of 3 in each category 	30

MODULE CMH301: FAMILY ISSUES (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • identify career choices by compiling a directory of community family support services	Compiling a directory of a minimum of five community resources and evaluating how they meet the needs of families. Investigate one career opportunity in this area as to duties, working conditions, education qualifications, employment opportunities, salary range and benefits and personal characteristics.	20
demonstrate basic competencies.	Assessment Tool CHMCRA: Community Resource Assessment Standard Performance rating of 3 observation of individual effort and interpersonal skills during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

Concept	Specific Learner Expectations	Notes
	The student should:	
Nature of the Family	review the family as a dynamic structure and	Stages in family life cycle.
	identify examples of change which affect contemporary families throughout the life cycle	Changes need to be viewed as a constant in the life cycle as opposed to crisis.
	identify the legal rights and responsibilities of family members throughout the life cycle	Ex-marriages, graduation, relations, childbirth.
		Alberta Premier's Council in Support of Alberta Families.
	review the importance of effective communication in healthy family relationships.	

MODULE CMH301: FAMILY ISSUES (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
Cultural Diversities in Family	 research and compare families within two diverse cultures focusing on: family structures (nuclear, extended, communal) family dynamics (child rearing patterns, roles/role division, mate selection and marriage customs) family traditions, celebrations health beliefs/practices 	Reference: Cross Cultural Caring. Reports, charts, bulletin boards, audio-visual, debates, guest speakers, art work, drama production.
	 recognize the stereotypical attitudes towards different ethnic groups in his or her community identify modifications made to cultural family patterns as a result of assimilation into another culture: traditions and customs holiday celebrations education and health beliefs/practices roles/role division. 	Interview with Canadians working overseas and new immigrants to Canada: • panel discussions • class presentations • documentaries.
Observation	describe the effects (physical, mental, social) throughout the lifespan of the changes to family members and the family unit in the following categories: – career changes - changing relationships	Examples: Career – promotion, transfers, unemployment, home- based careers, dual careers, travel, career changes, shiftwork, retirement. Relationship – loss (death, moving, divorce), having children, foster parenting, adoption issues, empty nest, parents returning to work force, separation, violence and abuse, adult children returning home, blended families.

MODULE CMH301: FAMILY ISSUES (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
Observation (continued)	 describe the effects throughout the life span of the changes to family members and the family unit in the following categories: personal changes financial changes. 	Personal loss. high risk careers, addictions - alcohol, drugs, gambling, workaholics, overspending, infertility. impotence, self-growth, abuse, neglect, menopause, mid-life crises, illness or chronic medical conditions, living will, euthanasia, stay-athome parent. Financial – loss of income, credit abuse,
	analyze these changes as to:	increased income. Use Statistics Canada
	 prevalence of the issue how each dimension (physical, mental, social) of well-being is affected potential community support agencies and resources positive and negative effects of the change legal implications of choices. 	Social Trends. Report, charts, bulletin boards, audio-visual, computer programs, debates, guest speakers, art work, drama production.
Career Exploration	compile and analyze a list of careers by investigating or listing agencies that are in the communities that provide help with family issues.	Consider careers related to Cultural diversities, e.g., interpreter.

MODULE CMH302: PARENTING

Level:

Advanced

Theme:

Sociocultural Perspectives

Prerequisite:

None

Students examine parenting and the issues involved with parenting. This module helps students appreciate current family dynamics and enhances future parenting skills. Student are encouraged to have a foundation in child development and care as offered in Child Development (CMH105).

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify and describe different parenting styles and assess their influence on family	applied problem-solving activity in which the student, using scenarios, will analyze and predict parenting decisions based on three different parenting styles.	20
dynamics. Consider: - authoritarian - permissive	Assessment Tool CMH302-1: Scenario Assessment Worksheet CMH302-4: Parenting Sample Scenarios Standard	
democraticuninvolved	Performance rating of 3 for each scenario	20
- cultural diversities	a presentation in which the student compares the parenting styles and the effect on family dynamics for at least two different cultures.	
	Assessment Tool CMH302–2: Presentations/Reports: Parenting Styles Comparison	
Ç.4 (Standard Performance rating of 3	
identify the rewards and challenges of parenting including: financial, emotional, societal,	a presentation/report in which the student identifies the rewards and challenges of parenting throughout the family lifecycle and assesses personal readiness for parenting.	25
educational, health	Assessment Tool CMH302–3: Presentations/Reports: Parenting	
	Standard Performance rating of 3 in each category	

MODULE CMH302: PARENTING (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • assess personal readiness for parenting including: psychological, physical, financial and philosophical	Assessment of student achievement will be based on:	25
identify related career opportunities	 completion of three career profiles for careers related to parenting. Include: duties, working conditions education requirements employment opportunities advancement potential salary range and benefits personal characteristics. Assessment Tool 	10
demonstrate basic	Assessment Guide: Career Profiles Standard Three career profiles; all sections completed for each profile observation of individual effort and interpersonal	Integrated
competencies.	interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	throughout

Concept	Specific Learner Expectations	Notes
Nature of the Family	 The student should: define a parent and/or guardian and identify ways of becoming a parent birth adoption fostering alternative family structures analyze the impact on the individual choices of choosing to parent or not to parent 	Surrogate parent, e.g., cultural adoptions blended extended grandparents.

MODULE CMH302: PARENTING (continued)

Concept	Specific Learner Expectations	Notes
	 The student should: describe the roles, rights, responsibilities and legal obligations of parenting identify the characteristics of the following parenting styles and determine the strengths and weaknesses of each democratic authoritarian permissive uninvolved 	Family functions: • Affective (personality maintenance) • Socialization and social placement • Reproductive function • Economic function • Health care function.
	 compare and contrast parenting styles of various cultural groups describe how the different parenting styles influence developing children discipline gender roles ways of expressing love and affection transmitting culture, traditions, morals and religious beliefs describe how parenting roles change over the lifecycle of the family. 	Reference: Cross Cultural Caring.
Assessment and Application	 research the rewards and challenges of parenting financial emotional effects on relationships societal education health care community support outline his/her readiness for parenting psychological/emotional physical financial philosophical identify characteristics of successful parenting. 	Resource: Tell Me About Your Family. Vanier Institute.

MODULE CMH302: PARENTING (continued)

Concept	Specific Learner Expectations	Notes
Career Exploration	The student should: describe careers associated with parenting daycare worker, nanny, homemakers, home economist, counsellors, social worker, pediatrics, stay-at-home mom/dad.	

MODULE CMH303: AGING

Level:

Advanced

Theme:

Sociocultural Perspectives

Prerequisite:

None

Recommended Corequisite:

This module would be enhanced with the addition of a volunteer or a

project module from Career Transitions

Students gain an understanding of the issues involved with the aging process and the impact on the individual, the family and the community. Students identify community resources and recognize the importance of seniors as a resource to the community.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
assess the contributions seniors make to society	 a presentation in which the student identifies the contributions seniors make to society. Assess the impact on the individual, the family, the community and global community. 	10
	Assessment Tool CMH303–1: Research Process: Seniors Contributions	,
	Standard Performance rating of 3	
identify the physical, economic, emotional, and intellectual changes that occur with aging and examine the adaptations required	 a concept test with a minimum of 20 questions assessing the following: age related changes (physical, economic, emotional, intellectual) adaptations required for aging. Assessment Tool CMH303-2: Sample Questions: Aging Standard 	20
	Performance rating of 50%`	
develop a Personal Action Plan to prepare for healthy aging	applied problem solving in which the student presents a Personal Action Plan to prepare for healthy aging. Assessment Tool CMHPAPW: Personal Action Plan Worksheet Standard All sections completed appropriately	10

MODULE CMH303: AGING (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
describe the signs, symptoms and care required for age-related conditions	 presentation of a report in which the student describes an age-related condition including: signs and symptoms treatment and care impact on the individual, family and the community community support resources available. 	
	Assessment Tool CMH303-3: Presentations/Reports: Aging	
	Standard Performance rating of 3 in each category	
identify adjustments required as a result of loss	an applied problem-solving activity in which the student, using a minimum of two scenarios depicting loss, predicts possible outcomes including: stages in grieving	20
	- financial considerations - psychological effects - ethical aspects - cultural influences - changing family roles - support services available.	
	Assessment Tool CMHSAW: Scenario Assessment Worksheet CMH303–4: Loss: Sample Scenarios	
- 133	Standard Performance rating of 3	
identify and evaluate community support	identifying and evaluate a minimum of three community resources available to seniors	20
resources and profile a career related to the aging community	 completion of one career profile related to the aging community including: duties education/training required employment opportunities salary and benefits. 	
	Assessment Tool CMHCRA: Community Resource Assessment	
	Standard Performance rating of 3	

MODULE CMH303: AGING (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • demonstrate basic competencies.	Assessment of student achievement will be based on: observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

Concept	Specific Learner Expectations	Notes
Orientation	 describe the stereotypical attitudes towards aging: analyze his/her own attitudes towards seniors identity common descriptive phrases used to describe seniors assess the contributions seniors make to society; g., personal, family, community and global. 	Role play, media watch, attitude check list, portrayal in the media, myths and realities.
The Healthy Body	 identify the physical changes that occur during the aging process and the adaptations required to adjust to these changes. describe the impact of aging on the individual, the 	Interview a doctor and/or seniors. Physical, social,
	family and the community: - financial - health - housing - social policies - employment - culture differences - changing roles within the extended family - recreation - senior centres	emotional, intellectual. Apartment, granny flats, total care home, 50+ housing complexes, 'snow birds'. Pre-retirement counselling Post-retirement adjustment.
	identify the resources available to seniors in the community.	Senior Centres, Family and Community Support Services, Home Care, Meals on Wheels, Library on Wheels.

MODULE CMH303: AGING (continued)

Concept	Specific Learner Expectations	Notes
Health Promotion	The student should: develop a Personal Action Plan to prepare for healthy aging.	
Observation, Assessment and Application	describe the care required for conditions associated with aging and determine the impact on the individual, family and the community	e.g., Alzheimer's, diabetes, osteoporosis, heart conditions, strokes. (cardiovascular/ cerebrovascular conditions)
	 describe the adjustments in lifestyle that result from the loss of a family member: stages in grieving financial, legal psychological ethical aspects of death (euthanasia) cultural influences changing family roles support services available. 	Guest speakers; e.g., lawyer, funeral home operator, multicultural panel, school guidance counsellors.
Career Exploration	 research and analyze career opportunities available within the aging community: types of careers duties, working conditions educational requirements employment opportunities salary range and benefits. 	

MODULE CMH304: PRE- AND POST-NATAL CARE

Level: Ad

Advanced

Theme:

Skills for Caring

Prerequisite:

Parenting (CMH303) recommended sequence

This module focuses on the impact of pregnancy on physical, mental and social well-being. It emphasizes the significance of pre-natal, labour, delivery and post-natal care.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
describe the process of pregnancy, labour, delivery, and the puerperium, identifying both normal changes and complications that may arise in order to assess	 a concept test consisting of a minimum of ten questions in each of the following categories: anatomy, physiology and pathology of the male and female reproductive systems embryonic/fetal development during pregnancy maternal changes during pregnancy labour and delivery process. 	
care measures required	Assessment Tool CMH304–1: Pre- and Post-natal Care Sample Questions	
	Standard Performance rating of 50%	
	a report in which the student assesses the care required throughout pregnancy, labour, delivery and the puerperium.	25
1-E 17:33	Assessment Tool Presentation Report: Pre and Post Natal Care	
	Standard Performance rating of 3 in each category	
compare and contrast the physical, social, emotional and economic impact of pregnancy, labour, delivery and post-natal care at different maternal ages	a presentation in which the student compares and contrasts the impact of pregnancy, labour, delivery and post-natal care at different maternal ages in two different cultures. Assessment Tool Presentations/Reports:	25
and for different cultures	Standard Performance rating of 3 on each category	

MODULE CMH304: PRE- AND POST-NATAL CARE (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • identify the importance	Assessment of student achievement will be based on: an applied problem-solving activity in which the	10
of lifestyle choices on maternal/fetal health throughout pregnancy and the puerperium	student, using a minimum of 3 scenarios, identifies the importance of lifestyle choices on maternal/fetal health.	
and the puerperium	Assessment Tool CMHSAW: Scenarios Assessment Worksheet CMH304-3: Pre- and Post-natal Care Sample Scenarios	
	Standard Performance rating of 3	
identify and evaluate community resources and profile a career	identifying and evaluating a minimum of four community support resources available for pre- and post-natal care.	10
available for pre- and post-natal care	Assessment Tool CMHCRA: Community Resource Assessment	
•	Standard Performance rating of 3	
identify career opportunities related to pre- and post-natal care	 completion of a career profile in the area of pre- and post-natal care including: duties, working conditions education requirements employment opportunities salary and benefits personal characteristics. 	10
12 145	Assessment Tool CMHCRA: Community Resource Assessment	
	Standard Performance rating of 3	
demonstrate basic competencies.	observations of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

MODULE CMH304: PRE- AND POST-NATAL CARE (continued)

Concept	Specific Learner Expectations	Notes
The Healthy Body	The student should: review the male and female reproductive systems and describe the process by which fertilization takes place	Consider: • presumptive, probable and positive signs of pregnancy • calculating and estimating due date.
	 describe and contrast the three trimesters of pregnancy maternal changes fetal development. 	Emotional changes. Hormonal changes. Physical changes • selecting medical care for pregnancy and delivery • chart month-to-month prenatal visits to the doctor or mid-wife, including frequency of visits, types of tests and their purpose. Resource: Health During Pregnancy "Lily Looks Back" video.
Observation, Assessment and Application	describe risk factors associated with pregnancy, listing signs and symptoms, treatment, and care	For example, hyperemesis gravidarum, pregnancy-induced hypertension (toxemia), hemorrhagic conditions, diabetic, C-section, VBAC.
	identify and assess the validity of myths associated with pregnancy.	"Eating for two."
	describe the effects of maternal health problems on a developing fetus, labour and post-natal care	For example, rubella, anemia, x-rays, high fever, viruses, diabetes.
	 identify the signs and symptoms through the stages of the labour and delivery process, outlining the care necessary for the mother and infant at each stage. discuss the roles, rights and responsibilities of the father 	Resource: How it Works, How Your Baby is Born.
	 describe the care of the post-partum mother and newborn infant with emphasis on the aspects of feeding, personal care and initial bonding: discuss the impact of a new baby on the mother, father, siblings, and the extended family 	Premature infant, low birth weight, feeding problems e.g., cleft palate. Apgar Score Cord care. Circumcision decision.

MODULE CMH304: PRE- AND POST-NATAL CARE (continued)

Concept	Specific Learner Expectations	Notes
Observation, Assessment and Application (continued)	The student should: describe the physical, social, emotional and economic impact of pregnancy, labour, delivery and post-natal care at different maternal ages	Teens, 20's, 30's, 40's. Determine the costs of pregnancy, birth and care of a baby for one year.
	identify possible complications and the care that may be required for the mother and newborn through the post-natal period.	e.g., depression, hemorrhage, infection Neo-natal jaundice. Failure-to-thrive.
Cultural Diversities	research and compare cultural diversities relating to prenatal care, childbirth techniques, family dynamics and relationships.	
Health Promotion	identify the importance of lifestyle choices through the pre-natal period	Exercise, nutrition. work-related impact, substance abuse (e.g., Fetal Alcohol Syndrome/Fetal Alcohol Effects), 'crack babies'.
Community Resources	 identify the pre- and post-natal community support resources that are available describe current medical practices related to pre- and post-natal care. 	 public health nurses. ultrasounds hospital stay abortions sperm banks in vitro fertilization (IVF).
Career Exploration	 research and analyze a career specific to pre- and post-natal care including: pre-requisites education and/or training required (locations, length, costs, course content) employment/entrepreneurial opportunities working conditions salary and benefits. 	 nursing physicians midwifery birthing centres home births.

MODULE CMH305: DAY CARE II

Level:

Advanced

Theme:

Caregiving

Prerequisite:

Day Care I and Practicum module from Career Transitions in a Day Care

centre (Required)

Corequisite

Practicum Day Care II

Module Parameters:

If students successfully complete Day Care I and Day Care II, two practicum modules and are 16 years of age, they are eligible for a Level I Orientation Qualification Certificate providing the objectives of the Self-Study Orientation Course of Day Care Centre Staff have been met. This is the minimum qualification required for daycare employees in Alberta. Students should be aware that a security check will be required for

employment in a day care.

For certification, students must complete a practicum module from Career Transitions in a Day Care centre, under the supervision of a staff member with a minimum Level II Day Care Centre Staff Provincial Qualification

Certificate.

Students continue to study the development and care of children, focusing on the importance of play and guiding behaviour. Successful completion of Day Care I and Day Care II and two practicum modules will qualify the student to receive a Level I Orientation Qualification Certificate providing the objectives of the Self Study Orientation Course for Day Care Centre Staff have been met. Student must be 16 years to be certified. Students should be aware that a security check will be required for employment in a day care.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Standards (Draft)	Suggested Emphasis
The student will: • describe ways to encourage a child's creativity	Assessment of student achievement will be based on: completion of PM8-16/17, PM8-18 and Learning Record PM8-21.† Assessment Tool	10
	CMH305–1: Daycare Assessment Tool Standard Performance rating of 3	

^{*} Self Study Orientation Course for Day Care Staff available from Alberta Family and Social Services Day Care Programs, Seventh Street Plaza, 10030 - 107 Street, Edmonton, Alberta, T5J 3E4.

[†] Exercises and learning records are found in the Self Study Orientation Course for Day Care Staff.

Module Learner Expectations	Assessment Criteria and Standards (Draft)	Suggested Emphasis
The student will: • identify the	Assessment of student achievement will be based on: completion of Learning Records PM9-17/18 and	10
characteristics of play, recognize its value and understand how it contributes to children's development	PM9-19/20.† Assessment Tool CMH305–1: Daycare Assessment Tool Standard Performance rating of 3	
identify what needs to be provided for play in order for children to grow and develop and to describe the adult role in supporting self-directed play	• completion of PM10-8/9, PM10-13/14 and Learning Records 10-15, 10-17/18. † Assessment Tool CMH305-1: Daycare Assessment Tool Standard Performance rating of 3	10
describe ways that caregivers carry out routines so that each child's development is enhanced in a safe and nurturing way	• completion of PM11-4/5, PM11-7, PM11-9 and Learning Records PM11-14, PM11-17. † Assessment Tool CMH305-1: Daycare Assessment Tool Standard Performance rating of 3	10
describe methods of solving behaviour problems using appropriate child guidance techniques	• completion of PM12-3, PM12-7/8, PM12-10, PM12-11, PM12-12/13 and PM12-15/16. † Assessment Tool CMH305-1: Daycare Assessment Tool Standard Performance rating of 3	15
	 develop a minimum of 3 scenarios of problem situations and suggest solutions. Assessment Tool CMHSAW: Scenario Assessment Worksheet Standard Performance rating of 3 	15
indicate how the Daycare Regulations ensure quality daycare	 completion of Learning Records PM13-7/8/9. † Assessment Tool CMH305-1: Daycare Assessment Tool Standard Performance rating of 3 	5

Module Learner Expectations	Assessment-Criteria and Standards (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
• outline practices related to child safety and illness/injury prevention	completion of Learning Records PM13-15/16. † Assessment Tool CMH305-1: Daycare Assessment Tool Standard Performance rating of 3	10
describe how daycare staff and families can work together in the best interest of the child	completion of Learning Record PM14-14 and PM14-15.† Assessment Tool CMH305-1: Daycare Assessment Tool Standard Performance rating of 3	5
describe types and signs of possible child abuse/ neglect and indicate the daycare workers' responsibility	a report on types and signs of child abuse and daycare workers' responsibility. Assessment Tool CMH305-2: Presentations/Reports: Child Abuse Standard Performance rating of 3	5
	• completion of Learning Record PM15-9 and PM15- 10. † Assessment Tool CMH305-1: Daycare Assessment Tool Standard Performance rating of 3	
analyze personal competencies in relation to professional standards	 completion of a personal self-evaluation which includes: assessment of present competency analysis of competency levels needed to be successful action plan for improving competencies. Assessment Tool CMHPAPW: Personal Action Plan Worksheet 	5
	Standard All sections have been completed appropriately	

Module Learner Expectations	Assessment Criteria and Standards (Draft)	Suggested Emphasis
The student will: • demonstrate basic competencies.	Assessment of student achievement will be based on: observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

Concept	. Specific Learner Expectations	Notes
Orientation	The student should:	
Child Development	 describe how creativity relates to child development: define creativity identify the stages children go through in creative expression demonstrate ways to enhance creativity describe the importance of play in the development of children 	Reference. Session 8, Self Study Orientation For Day Care Workers. Observation at daycare. Video. Create an in-class activity to be used in a daycare setting. Students could share their activities to begin a portfolio of creative experiences for children. Session 9, Self Study Orientation For Day Care Workers.

MODULE CMH305: DAY CARE II (continued)

Concept	Specific Learner Expectations	Notes
Orientation • Child Development (continued)	 identify five characteristics of children's play recognize the stages of play, (i.e., unoccupied, solitary, onlooker, parallel, associative and cooperative) describe play activities which would help develop the physical, social, intellectual, emotional development considering the factors when providing for play (e.g., space, time materials, rules) describe the adult role in supporting self-directed 	Self Study Orientation For Day Care Workers. - observation at day care centre. Video: Day Care Matters: Facilitating Play, pt 1 & 2. Session 10, Self Study Orientation For Day Care Workers. Video: Day Care Matters: Facilitating Play, pt 3.
Management	 play versus caregiver-directed activities. describe how physical routines and guiding behavior can enhance child development and selfesteem demonstrate smooth and effective transitions between various routines of the day identify problem situations and suggest solutions differentiate between punishment and guidance. 	Session 11, Self Study Orientation For Day Care Workers. Video: Day Care Matters: Nurturing Through Physical Routines. Session 12, Self Study Orientation for Day Care Workers
Health and Safety	 identify provincial day care policies and the role of the Day Care Licensing Officer and examine the health practices that keep the spread of infection to a minimum in a day care select toys, materials and experiences that will aid in the prevention of accidents describe how appropriate supervision can prevent accidents 	Session 13, Self Study Orientation For Day Care Workers. Pamphlet: Day Care Regulations.

Concept	Specific Learner Expectations	Notes
Health and Safety (continued)	 state the benefits resulting from a positive relationship between families and caregivers describe barriers that might prevent a positive family-caregiver relationship from developing identify problem-solving strategies that may be used with family members to solve conflicts. 	Session 14, Self Study Orientation For Day Care Workers. Video: Day Care Matters: Supporting Family Relationships.
	 identify and describe the types of child abuse/neglect, including: indicators of possible child abuse/neglect suggestions of responding to child abuse/neglect strategies caregivers can use to prevent child abuse/neglect. 	Session 15, Self Study Orientation For Day Care Workers. Video: Child Abuse and Neglect. Guest speakers.
Professionalism	 describe the Day Care Regulations in terms of how they ensure the safety and well-being of children and staff describe the responsibility of the child care worker in reporting suspected child abuse/neglect. 	Session 13. Self Study Orientation For Day Care Workers. Observation Session 15, Self Study Orientation For Day Care Workers.
Career Exploration	 research and analyze career opportunities available in early childhood education, outlining the: prerequisites length and scope of the course certification received job opportunities. 	Guest speaker: Early Childhood Program.

MODULE CMH306: HOME CARE III: SPECIAL CONDITIONS

Level: Advanced

Theme: Skills for Caring

Prerequisite: Home Care I (CMH106) and Home Care II (CMH207)

Module Parameters: The student must have access to instruction from an individual with formal,

specialized training in home care skills

This module addresses care as it relates to special conditions, special treatments, loss, long term care and the palliative process. A project module from Career Transitions in a community care facility will enhance student learning in this area.

This module includes concepts which may be particularly sensitive to students, parents or community members.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Conditions and Criteria (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify individuals with special needs or conditions, safety requirements and demonstrate or describe the skills necessary to assist with special care treatments	 practical problem-solving activities in which the student describes or demonstrates the skills and safety precautions required for individual with special needs, including: bed-ridden and non-ambulatory individuals individuals with prostheses individuals with specific respiratory needs individuals with incontinence and elimination needs individuals requiring diagnostic tests supervision of medications. Assessment Tool CMHHCSA-3: Home Care Skills Assessment 	60
	Standard Performance rating of 3 on each skill	
address care as it relates to loss, long term care, and the palliative process	a presentation/report which identifies the stages of dying, the grief process and addresses the care and support required for the individual, the family and the caregivers.	30
***	Assessment Tool CMH306–1: Presentations/Reports: Death and Dying Standard Performance rating of 3 in each category	

	Emphasis
Assessment of student achievement will be based on:	
 completion of three career profiles for careers relating to home care/personal care services including: duties, working conditions education qualifications employment/entrepreneurial opportunities salary range and benefits advancement potential personal characteristics. 	10
Assessment Tool Assessment Guide: Career Profiles	
Standard Performance rating of three career profiles; all sections completed for each profile	
observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any	Integrated throughout
	 completion of three career profiles for careers relating to home care/personal care services including: duties, working conditions education qualifications employment/entrepreneurial opportunities salary range and benefits advancement potential personal characteristics. Assessment Tool Assessment Guide: Career Profiles Standard Performance rating of three career profiles; all sections completed for each profile observations of individual effort and interpersonal interaction during the learning process. Assessment Tool

Concept	Specific Learner Expectations	Notes
Assessment and Applications	The student should: • identify and describe individuals with special needs such as: - those who are bed-ridden and non-ambulatory - those with prostheses - those with special respiratory needs - those with incontinence and specific elimination needs - those who require diagnostic tests	 Care needs related to specific disease process. Behaviours exhibited. Stages of the lifespan. Cultural diversities.

Concept	Specific Learner Expectations	Notes
	The student should:	
Assessment and Applications (continued)	describe the skills, safety practices and necessary equipment required to assist or perform special care treatments for: bedridden and non-ambulatory individuals: prevention of pressure areas using available aids maintenance of adequate lung function using deep breathing exercises, spirometers and respiratory aids maintenance of adequate circulation using aids to maintain muscular strength and exercises individuals with a prosthesis: use of hearing and visual aids, limbs, braces, splints, casts assistance with ambulation, such as crutches, walkers, wheelchairs, electric carts individuals with specific respiratory needs: use of supplemental oxygen use of steam inhalation, cold vaporizers individuals with incontinence and elimination needs: recording intake and output catheter care (observe catheterization), urinary drainage devices ostomy care suppositories, enemas individuals requiring diagnostic tests: collecting urine, stool and sputum specimens home glucometer testing (diabetics) interpreting results of urine tests, blood tests home preparations for x-rays, blood tests.	Discuss the safety precautions necessary for caregiver and individual including: • Universal precautions (infection control) • Proper body mechanics. • Community work placements may provide additional practical time.

Concept	Specific Learner Expectations .	Notes
Safety	 identify the safety components related to the supervision of medications: five rights (person, medication, time, method, amount) routes (oral, buccal, sublingual, rectal, injectable, topical, transdermal, inhalation) types (pills, lozenges, liquids, drops, ointments, skin patches, injections, suppositories, inhalers) observing and reporting to health professionals side effects and degree of tolerance of medication by individuals. 	Pharmacy labels on medication containers. Instructions. Precautions for specific medication.
Management	 identify potential impacts of "loss" on physical, mental and social aspects of living describe the importance of maintaining the individuals dignity and privacy and examine ways of accomplishing this outline and describe the procedures for admission to, transfer and discharge from a treatment centre: social and emotional aspects family resources interpreting and compiling the individual's care record 	Stages of the lifespan. Cultural diversities.
	 identify and describe the stages of dying, including emotional support, physical changes and care through the palliative process identify strategies and personal care services to assist the family through the grieving process, palliative care and procedures following death describe the impact on the caregiver and outline ways to obtain physical assistance and emotional support. identify and assess community support resources 	Video: Death and Dying. Support groups. Post-mortem care. Bereavement support. Interview palliative caregiving staff. Positive impact of experiences.

Concept	Specific Learner Expectations	Notes
Career Exploration	 The student should: describe the role of a home care worker considering: ethics and legal responsibility health care facilities and home support systems in Alberta communication, client rapport and rights cultural differences 	
	identify employer expectations and role of the health team.	

MODULE CMH307: CHALLENGED INDIVIDUALS

Level:

Advanced

Theme:

Skills for Caring

Prerequisite:

None

Students recognize the diversity of experiences facing individuals who are physically and/or mentally challenged. Community resources for these individuals are identified.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Standards (Draft)	Suggested Emphasis
The student will: • recognize the situations and recommend solutions for challenged individuals	Assessment of student achievement will be based on: an applied problem-solving activity in which the student researches a minimum of two challenges as to: causes signs and symptoms treatment resources and technologies available impact on and recommend solutions for the individual, family and the community.	45
	Assessment Tool CMH307–1: Research Process: Challenged Individuals Standard Performance rating of 3 in each category	
	a practical problem solving activity in which the student devotes a minimum of ten hours to assisting a challenged individual with activities of daily living.	40
- 1° - L	Assessment Tool CMHPORT: Portfolio Assessment	
	Standard Performance rating of 3	

MODULE CMH307: CHALLENGED INDIVIDUALS (continued)

Module Learner Expectations	Assessment Criteria and Standards (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	15
identify and evaluate community resources and profile a career	identifying and evaluating a minimum of three community resources available to a challenged individual	13
opportunity related to working with challenged individuals	completion of a career profile in this area which includes: duties	
	education qualifications	
1 3 1 1 2 34	 employment/entrepreneurial opportunities salary range and benefits personal characteristics. 	
	Assessment Tool CMHCRA: Community Resource Assessment	
	Standard Performance rating of 3 in each category	
demonstrate effort to refine basic	observations of individual effort and interpersonal interaction during the learning characteristics.	Integrated throughout
competencies.	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

Concept	Specific Learner Expectations	Notes
Orientation	 The student should: identify challenges that affect the performance of activities of daily living, such as: motor/sensory cognitive behavioural intellectual 	For example: • paralysis/anesthesia • memory loss • short term memory • due to brain damage • retardation.
	identify the potential impact of the challenges noted above on the individual, the family and the community.	Physical, mental, socioeconomic. Interviews. Guest speakers, home visitation.

MODULE CMH307: CHALLENGED INDIVIDUALS (continued)

Concept	Specific Learner Expectations	Notes
Application	The student should: • identify specific treatments, technologies and community resources available to the individual with a specific challenge	voluntary agency advocacy personal interview assist a challenged individual with activities of daily living. (May be expanded with a project or volunteerism module.)
Career Exploration	research and assess the career opportunities related to working with challenged individuals.	personal care aides rehabilitation therapists special education instructors.

MODULE CMH308: ANATOMY, PHYSIOLOGY, PATHOLOGY (DIGESTION/

ELIMINATION)

Level:

Advanced

Theme:

Health Sciences

Recommended

Corequisite:

Home Care II: Personal Care Services

Module Parameters:

Through the study of anatomy, physiology, pathology and treatment of the digestive and elimination systems, students gain an appreciation of practicing a healthy lifestyle and acquire the knowledge and skills to deal with digestive and elimination conditions as they affect the individual, family and friends. Community support resources are identified.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • identify and describe the	Assessment of student achievement will be based on: a concept test consisting of a minimum of ten	30
anatomy, physiology, pathology, causes, treatment, prevention, impact and support	questions in each of the following categories - structure and function of the digestion system - structure and function of the elimination system - pathology of digestion and elimination systems.	
resources for selected digestive and elimination conditions	Assessment Tool CMH308–1: Concept Test: Digestion/Elimination Sample Questions	
	Standard Performance rating of 50%	
47	a report that describes a selected digestive and elimination condition as to: — pathology and treatment — prevention — causes — a sample therapeutic diet for the condition — impact on the individual, family and community — community support resources available.	30
we have	Assessment Tool CMH308–2: Presentations/Reports Assessment: Digestion/Elimination Conditions	
	Standard Performance rating of 3 in each category	

MODULE CMH308: ANATOMY, PHYSIOLOGY, PATHOLOGY (DIGESTION/ELIMINATION) (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: describe the causes, signs and symptoms, treatment and prevention for digestive and elimination emergencies	Assessment of student achievement will be based on: practical problem-solving activities in which the student, using a minimum of 2 scenarios, recognizes digestion and elimination emergencies and demonstrates first aid procedures. Assessment Tool CMHSAW: Scenario Assessment Worksheet	10
describe a personal action plan that will promote and maintain healthy digestion and elimination systems	Standard Performance rating of 3 for each scenario an applied problem-solving activity in which the student prepares a Personal Action Plan to improve or maintain healthy digestive/elimination systems. Assessment Tool CMHPAPW: Personal Action Plan Worksheet Standard All sections have been completed appropriately	20
identify career opportunities related to the digestive and elimination systems	 completion of three career profiles for careers related to the digestion and/or elimination systems including duties, working conditions education qualifications employment/entrepreneurial opportunities advancement potential salary range and benefits personal characteristics. Assessment Tool Assessment Guide: Career Profiles 	10
demonstrate basic competencies.	Standard Three career profiles; all sections completed for each profile observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

MODULE CMH308: ANATOMY, PHYSIOLOGY, PATHOLOGY (DIGESTION/ELIMINATION) (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
The Healthy Body	describe, locate and state the functions of the primary and accessory organs of the digestive system	Models, diagrams, dissection, videos, software programs.
	 mouth pharynx esophagus stomach small intestine large intestine liver gall bladder pancreas 	Special role of appendix.
	 appendix outline and compare the processes involved in 	flow chart.
	ingestion, digestion, absorption and elimination at different stages of the lifespan	now chart.
	describe the role of enzymes and identify the major enzymes involved in digestion	
	describe the role of the major nutrients necessary for growth and maintenance over the lifespan — water — carbohydrates — proteins — fats — vitamins — minerals — cellulose	Canadian Guide to Healthy Living (FOD301, FOD302)
	list the body systems that eliminate waste and name the substances eliminated by each	Digestive, urinary, integumentary, respiratory.
	describe, locate and state the functions of the organs of the urinary system	Models, diagrams, dissection.
	describe the processes involved in urine formation (filtration, reabsorption, secretion)	Role of ADH and hormones produced by kidney.
	describe the process of urination	Given a urinalysis report,
	research and analyze the effects of aging on the digestive and elimination systems.	substances are normal or abnormal constituents of urine.
		Construct or draw a model that demonstrates how dialysis works.

MODULE CMH308: ANATOMY, PHYSIOLOGY, PATHOLOGY (DIGESTION/ELIMINATION) (continued)

Concept	Specific Learner Expectations	Notes
Observation, Assessment and Application	 describe the causes, signs and symptoms, prevention and treatment of conditions affecting digestive and elimination systems assess the social, emotional and economic affects of these conditions on the individual, family, peers and the community plan a therapeutic diet which would be necessary in the treatment of conditions affecting digestive and elimination systems describe the causes, signs and symptoms, treatment and prevention of digestion and elimination emergencies inventory and outline services provided by community support resources. 	halitosis gingivitis gastroesophageal reflux ulcers (gastric/duodenal) pyloric stenosis appendicitis Crohn's disease celiac disease hepatitis cirrhosis cholelithiasis pancreatitis cystic fibrosis eating disorders cancer renal failure acute glomerulonephritis cystitis urethritis renal calculi prostate problems
Health Promotion	describe lifestyle choices that promote and maintain healthy digestive and elimination systems.	Assess nutritional intake over five days. • weekend variations. Personal Action Plan.
Cultural Diversity	describe how culture can affect dietary habits and digestion/elimination systems.	
Career Exploration	 investigate and assess a career related to digestion/elimination systems duties, working conditions education qualifications employment opportunities advancement potential salary range and benefits personal characteristics. 	Gastrio enterology. Urologist.

MODULE CMH309: ANATOMY, PHYSIOLOGY, PATHOLOGY (NERVOUS/ENDOCRINE)

Level: Advanced

Theme: Health Sciences

Prerequisite: None

Through study of the anatomy, physiology and pathology of the nervous/endocrine system, students will gain an appreciation of practicing a healthy lifestyle, and acquire the knowledge and skills to deal with nervous/endocrine conditions as they affect the individual, family and friends. Community support resources are identified.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify and describe the anatomy, physiology, pathology, causes, treatment, prevention, impact and support resources for selected nervous and endocrine conditions	 a concept test consisting of a minimum of ten questions on each of the following: structure and function of the nervous system location and function of the endocrine glands pathology of nervous and endocrine system. Assessment Tool CMH309-1: Concept Test: Nervous/Endocrine 	30
	Standard Performance rating of 50%	
	 a presentation/report that describes a selected nervous and endocrine condition as to: pathology and treatment causes prevention impact on the individual, family and community suggestions to reduce the impact on the individual and family community support resources available. 	30
	Assessment Tool CMH309–2: Presentations/Reports: Nervous/Endocrine Conditions	
143 1 1	Standard Performance rating of 3	

MODULE CMH309: ANATOMY, PHYSIOLOGY, PATHOLOGY (NERVOUS/ENDOCRINE) (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
describe the causes, signs and symptoms, treatment and prevention, and demonstrate the treatment of neurological and endocrine emergencies	 practical problem solving activities in which the student recognizes and demonstrates first aid procedures for neurological and endocrine emergencies. Assessment Tool CMHSAW: Scenario Assessment Worksheet CMH309-3: Nervous/Endocrine Sample Scenarios 	20
	Standard Performance rating of 3 for each scenario	
describe a personal action plan that will promote and maintain healthy nervous and endocrine systems	applied problem-solving in which the student develops a Personal Action Plan to promote and maintain healthy nervous and endocrine systems. Assessment Tool CMHPAPW: Personal Action Plan Worksheet Standard All sections have been completed appropriately	10
identify career opportunities related to the nervous and endocrine systems	 completion of three career profiles for careers related to the nervous and endocrine systems. Include: duties, working conditions education qualifications employment/entrepreneurial opportunities advancement potential salary range and benefits personal characteristics. Assessment Tool Assessment Guide: Career Profile Standard Three career profiles; all sections completed for each profile 	10
demonstrate basic competencies	observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

MODULE CMH309: ANATOMY, PHYSIOLOGY, PATHOLOGY (NERVOUS/ENDOCRINE (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
The Healthy Body	 describe the components of the nervous system central nervous system peripheral nervous system and divisions 	Diagram to label.
	 describe the structure of neurons and identify the various types, distinguishing between myelinated and unmyelinated neurons 	Software.
	state how an impulse is transmitted along a neuron and across a synapse	
	identify the main neurotransmitters	
	identify the major structures of the brain and state the function of each	
	identify the structure and function of the spinal cord and diagram how impulses travel along the reflex arc	Diagram and case study.
	locate, describe and state the functions of the endocrine glands	Diagrams to label.
	identify and state the function of the hormones produced by the endocrine glands and compare steroid and protein hormones	
	 demonstrate how feedback systems control the production and release of hormones 	Positive feedback/ negative feedback.
	compare and contrast the effects of the nervous and endocrine system on body functioning.	Software

MODULE CMH309: ANATOMY, PHYSIOLOGY, PATHOLOGY (NERVOUS/ENDOCRINE) (continued)

Concept	Specific Learner Expectations	Notes
Observation, Assessment Application	 examine the pathology, causes, signs and symptoms, prevention and treatment of conditions involving the nervous and endocrine systems assess the social, emotional and economic effects of these conditions on the individual, family, peers and the community identify factors to reduce the impact of a nervous system disorder or disease on the individual and his or her family inventory available community support resources identify neurological and endocrine emergencies and describe/demonstrate appropriate care. 	Presentation, case study, report. Software. Case study. Nervous System: Alzheimer's disease cerebral palsy epilepsy hydrocephalus meningitis multiple sclerosis neuralgia Parkinson's Disease Endocrine System gigantism/acromegaly Addison's disease cretinism/myxedema Cushing's syndrome diabetes (insipidus and mellitus) hypo/hyperthyroidism Spinal cord injuries. Unconscious patient. Thyroid storm. Rehabilitation and physiology (speech, recreational, occupational). Guest speakers. Interviews. Panel discussions.
Health Promotion	describe lifestyle behaviours which would reduce accidents that could result in neurological and/or endocrine damage.	Helmets, seatbelts, vehicle restraints. Occupational safety. Nutrition. Personal Action Plan.
Career Exploration	identify career opportunities available in the area of neurology or endocrinology.	Job shadow. Guest speakers.

MODULE CMH310: MENTAL HEALTH

Level: Advanced

Theme: Health Sciences

Prerequisite: None

Students study the parameters of mental well-being and the causes, signs, symptoms and treatment of mental illness. The focus is on preventive measures and the impact on the individual, peers, family and community. Community support resources are identified.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
 describe indicators of mental well-being identify common stressors, the body's stress response and provide solutions for coping with stress 	 developing a Personal Action Plan in which the student: describes the indicators of mental well-being identifies stressors in his/her personal life describe the body's stress response describes a minimum of five effective coping strategies. Assessment Tool CMHPAPW: Personal Action Plan Worksheet Standard 	30
 identify causes, signs and symptoms, pathology, treatment, prevention, impact of and support resources for psychological 	All sections have been completed appropriately • presentation of a report in which the student researches a psychological disorder as to: - pathology - signs and symptoms - causes - treatment	60
disorders	 prevention impact on the individual, family and community community support resources available. Assessment Tool	
	Assessment 1001 CMH310-1: Research/Presentation Assessment: Mental Health Standard Performance rating of 3 in each criteria	

MODULE CMH310: MENTAL HEALTH (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will: • identify career opportunities related to areas that address mental health.	 Assessment of student achievement will be based on: completion of three career profiles of career opportunities in the area of mental health including: duties, working conditions education qualifications employment/entrepreneurial opportunities 	10
	 salary range and benefits advancement potential personal characteristics. Assessment Tool Assessment Guide: Career Profiles	
- 15	Standard Three career profiles; all sections completed for each profile	
demonstrate basic competencies	observations of individual effort and interpersonal interaction during the learning process. Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	Integrated throughout

Concept	Specific Learner Expectations	Notes
The Healthy Body	 The student should: identify connections between physical, social, emotional, spiritual and mental health 	Maslow's hierarchy of needs. Erikson's developmental stages. Picture collage.
	 inventory and present the major components of mental well-being: ways to enhance self-esteem coping techniques with conflicts. 	Role of independence versus dependence. Problem solving.
Management	 identify stressors and the physiological stress response: relationships, health issues, daily living, job, school 	Eustress versus distress. General Adaptation Syndrome (GAS). Lazarus (stress and coping).

MODULE CMH310: MENTAL HEALTH (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
Management (continued)	• compare and contrast various coping techniques:	For example: passive, assertive, aggressive
		Common behaviours: anger, jealousy, shyness, depression.
	- adaptive and maladaptive coping techniques.	Psychological defense mechanisms: denial, fantasy, rationalization, repression, projection. Addictive behaviours. Successful techniques: planning, rehearsal, self-talk, relaxation, establishing goals, changing behaviour, biofeedback, meditation, medications. Guest Speakers.
		·
Observation, Assessment, Application	identify affective, behavioural and cognitive maladaptations	Mental Health Association.
	describe various psychological disorders, including: causes, signs and symptoms, diagnosis, therapeutic approaches, prevention, community	Mental Health Association.
	resources available and the impact on the individual, family and the community.	 depression addictive behaviour bi-polar disorder schizophrenia dementias (including Alzheimers) personality disorders. Diagnostic and Statistical
		Manual (DSM IV).
	 identify the various types of therapeutic environments available in the community: acute care/active treatment unit regional psychiatric centre rehabilitation centre community mental health or guidance centre community group home. 	acute detoxification, AA (self-help assoc.), ADAAC centre, acute care hospital unit, closed/open unit, security measures (locked areas, restraints, injury prevention).

MODULE CMH310: MENTAL HEALTH (continued)

Concept	Specific Learner Expectations	Notes
Career Exploration	 The student should: identify and assess the career opportunities that are available in the field of mental health including: desirable personal characteristics education qualifications employment/entrepreneurial opportunities tasks, working conditions salary range and benefits advancement potential. 	Nursing, psychiatry, counselling, social work, home-care, etc. Job shadow, career exploration.

MODULE CMH311: ADVANCES IN MEDICAL TECHNOLOGY

Level:

Advanced

Theme:

Health Sciences

Prerequisite:

None

This module focuses on the social, emotional and economic impact of health technology. Related ethical issues are also examined.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
compare and contrast past, present and future trends in health services	a presentation in which the student compares and contrasts past, present and future trends in health. Assessment Tool CMH311-1: Presentations/Reports: Trends in Health Services	20
	Standard Performance rating of 3 in each category	
identify the services, diagnostic procedures and health technology available in acute, rehabilitation and extended care centers	a presentation in which the student describes the care, services, diagnostic procedures and technology available in acute, rehabilitation and extended care centres. Assessment Tool CMH311-2: Presentations/Reports: Health Services	30
	Standard Performance rating of 3 in each category	
identify and discuss emerging technologies as to: description, availability, social and emotional impact, economics and ethical issues	 presentation on two emerging technologies including: description of the technology availability of the technology social and emotional impact economic consideration ethical issues. Assessment Tool CMH311-3: Research Process: Emerging Technologies 	40
	Standard Performance rating of 3 in each category	

MODULE CMH311: ADVANCES IN MEDICAL TECHNOLOGY (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify career opportunities related to areas that address health technology	 completion of three career profiles on career opportunities in health technologies including: duties, working conditions education required employment/entrepreneurial opportunities salary range and benefits advancement potential personal qualifications. 	10
	Assessment Tool Assessment Guide: Career Profiles	
	Standard Three career profiles; all sections completed for each profile	
demonstrate basic competencies.	observation of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

Concept	Specific Learner Expectations	Notes
Nature of the Health System	 Compare and contrast past, present and future trends in health care: community based (VON, Home Care) expense of hospitalization (user pay, free) medical personnel (shortage/surplus of medical/nursing individuals, research, degree of professional autonomy, import/export of health care professionals, entrepreneurship, training) use of para-professional, non-professionals impact of changes on the individual, family and community. 	Lifestyle-related conditions (modifiable risk factors). Client's desire to be home. Growing elderly population. Chronic ailments not requiring acute care. Medicines, treatments, diagnostic tools.

MODULE CMH311: ADVANCES IN MEDICAL TECHNOLOGY (continued)

Concept	Specific Learner Expectations	Notes
	The student should:	
Management Implementation	 identify the elements of care available in treatment facilities (acute care, convalescent care, extended care, palliative care) assess availability and accessibility of services in acute, rehabilitation and extended care centers physicians, nursing, dietary, housekeeping, maintenance, business, volunteer, social work, rehabilitation, radiology, pathology, pharmacy, etc. 	Physiotherapy, Occupational Therapy, ECMO, emergency department, terminal, palliative care, pastoral care, convalescent care, elective, emergency, day surgery, day hospitals.
	 research and assess availability and accessibility of technology and diagnostic procedures in health care: operative care (general surgery, laser, laparoscopy, plastic, fiber optics) imaging services describe the purpose and the care of the patient before, during and after the following procedures: general surgery less invasive surgery (lasers, fibre optics) imaging services identify options for anaesthetics. 	Tours available Alberta Heritage Research Council Community-based Pre-op and post-operative procedures Anesthesia Basic medical asepsis Awareness of complications (pneumonia, infection, hemorrhage, etc.). Intrauterine survey. CAT scan, M.R.I. (magnetic resonance imaging). Ultrasound. Nuclear medicine (assess organ function, liver, kidney, brain, etc.). Radiation therapy (cancer treatment). Dental X-ray (internal surface and roots).
Application	 research technological advancements for the 21st century, including an assessment of the social, emotional, economic and ethical issues raised by emerging technologies such as: gene therapy synthetic body parts euthanasia reproductive technology computerized health care robotics transplants. 	Examine community agencies available to determine their client group, current medical data and recommended treatment plans. Tours, guest speakers, news media, clinics, labs or diagnostic centres. Community agencies.

MODULE CMH311: ADVANCES IN MEDICAL TECHNOLOGY (continued)

Concept	Specific Learner Expectations	Notes
Career Exploration	The student should: • research and assess the career opportunities that are available in health technology including: - personal characteristics - training/education required - employment/entrepreneurial opportunities - working conditions - salary range and benefits.	Job shadow, interview, research, facility tours.

MODULE CMH312 FIRST AID/CPR FOR INFANTS AND CHILDREN

Level: Advanced

Theme: Injury Prevention

Prerequisite: None

Module Parameters: The student must have access to instruction from an individual with a

current instructor's certificate in First-Aid and CPR with a Child Care

Instructor designation

Students identify a child-safe environment and recognize life-threatening emergencies or medical conditions and demonstrate appropriate first-aid procedures. Potential community workers, recreation leaders and caregivers are encouraged to take this module. Students qualify for an Emergency Child Care Certificate (Canadian Red Cross) or a Standard First Aid in Child Care Certificate (St. John Ambulance) when they meet the required competencies specified by the credentialling agency.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions	Suggested Emphasis
The student will: • identify practices to provide a safe environment for infants and children	Assessment of student achievement will be based on: • a presentation in which the student describes a minimum of 15 child safe practices. Assessment Tool CMH312-1: Presentations/Reports: Child Safety Standard Performance rating of 3 in each category	10
identify signs and symptoms and recommend action for childhood emergencies and suspected child abuse and/or neglect	 a concept test consisting of a minimum of 50 questions including: suspected child abuse/neglect signs and symptoms, action plan signs and symptoms of childhood emergencies treatment of childhood emergencies community support resources available. Assessment Tool Concept Test credentialling agency Standard Performance rating as required by credentialling 	30
assess the situation and demonstrate first aid/CPR skills for childhood emergencies	 a practical problem-solving activity in which the student demonstrates the first aid and CPR procedures and skills to provide holistic care for infant/child emergencies. Assessment Tool Practical examination checklist from credentialling agency Standard Performance rating as required for certification 	50

MODULE CMH312FIRST AID/CPR FOR INFANTS CHILDREN (continued)

Module Learner Expectations	Assessment Criteria and Conditions	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify career choices that benefit from the competencies developed in this module	completion of three career profiles on careers in which first aid and CPR for children and infants would be beneficial. Include: duties, working conditions education/training required employment/entrepreneurial opportunities advancement potential salaries and benefits personal characteristics.	10
	Assessment Tool Assessment Guide: Career Profiles	
	Standard Three career profiles; all sections completed for each profile	
demonstrate basic competencies.	observations of individual effort and interpersonal interactions during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

Concept	Specific Learner Expectations	Notes
Safety and Health Promotion	 Outline and describe sound practices to child proof the environment (home and surroundings): recognizing risks and hazards preventing common accidents home safety check playground transportation preventing infection identify signs of suspected child abuse/neglect and strategies for accessing proper resources. 	

MODULE CMH312FIRST AID/CPR FOR INFANTS AND CHILDREN (continued)

Concept	Specific Learner Expectations	Notes
Observation, Assessment and Application	 identify the causes, signs and symptoms of the following medical conditions: respiratory arrest circulatory problems levels of consciousness muscle/skeletal injuries, head and spine injuries soft tissue injuries sudden medical conditions cardiac arrest (infant and child CPR) demonstrate appropriate first aid procedures for life-threatening childhood emergencies and medical conditions describe the impact of childhood emergencies and/or medical conditions on the family and caregivers and how this influences treatment identify and demonstrate skills of open communication between fellow workers, families and children identify and inventory community resources available as support services. 	 allergic reactions skin conditions asthma croup epiglottitis earache diarrhea and vomiting poisoning pin worms diabetes epilepsy/seizures febrile convulsions (seizures) electric shock burns.
Career Exploration	 identify and describe careers that require the knowledge and skills regarding first-aid for children; including: desirable personal values and interests training or education requirements working conditions employment/entrepreneurial opportunities salaries and benefits. 	Videos, reports, interviews, guest speakers, job shadow. E.g., daycare worker, law enforcement officers, firefighters/emergency response personnel, lifeguard, teachers.

MODULE CMH313: SPORTS FIRST AID II

Level: Advanced

Theme: Injury Prevention and Health Promotion

Prerequisite: Sports First Aid I (CMH214)

Students focus on the application of skills, knowledge and techniques available to enhance athletic performance and to recognize common athletic injuries and rehabilitation. A project module from Career Transitions will enhance student learning in this area.

Curriculum and Assessment Standards

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
demonstrate the management of resources and activities of an athletic first aider	 practical activities which develop skills and enhance safety and well-being including: assisting in the maintenance and repair of equipment maintaining first aid supplies assisting in the maintenance of the training facility assisting in the promotion of the athlete's safe behaviour assisting in warm-up and cool-down stretching activities. 	30
	Assessment Tool CMH313–1: Sports First Aid Management Tasks Standard Performance rating of 3	
describe activities that enhance athletic performance	 presentation to the athletes of a minimum of two topics that enhance athletic performance. Assessment Tool CMH313-2: Presentations/Reports: Enhancing Athletic Performance Standard Performance rating of 3 in each category 	20

MODULE CMH313: SPORTS FIRST AID II (continued)

Module Learner Expectations	Assessment Criteria and Conditions (Draft)	Suggested Emphasis
The student will:	Assessment of student achievement will be based on:	
identify situations which precipitate common athletic injuries and recommend preventive solutions, therapeutic solutions and rehabilitation	 presentation in which the student describes, for a minimum of 2 specific sports: a minimum of 2 common injuries (assessment and referral) recommended preventive solutions recommended therapeutic solutions recommended rehabilitative measures how athletic injuries can affect an individual throughout the lifespan. 	40
	Assessment Tool CMH313–3: Research: Sports Injuries	
	Standard A performance rating of 3	
	 practical activities in which the student demonstrates appropriate first aid and taping skills for common . injuries of the specified sports. 	
	Assessment Tool CMHSFASA–2: Sports First Aid Skills Assessment	
	Standard A performance rating of 3	
identify career opportunities in the field of sports medicine	 completion of three career profiles on careers associated with athletic first aid including: personal characteristics education qualifications duties, working conditions employment/entrepreneurial opportunities advancement potential salary range and benefits. 	10
	Assessment Tool Career Profile Assessment	. '
	Standard Three career profiles; all sections completed for each profile	
demonstrate basic competencies.	observation of individual effort and interpersonal interaction during the learning process.	Integrated throughout
	Assessment Tool Basic Competencies Reference Guide and any assessment tools noted above	

MODULE CMH313: SPORTS FIRST AID II (continued)

Concept	Specific Learner Expectations	Notes
Health/Safety Promotion	 identify skills that enhance the safety and wellbeing of the athlete maintain and repair sports equipment maintain first aid supplies maintain a clean, organized training facility safe behaviour of athletes, e.g., 	improper use of equipment, horseplay, etc.
	 describe the rationale for maintaining health records and injury report forms identify the benefits of activities that may prevent injuries to athletes warm-up cool-down proper stretching techniques 	
	list indicators to determine when injured athletes are ready to return to full activity	
	 describe factors that assist the athlete to reach peak performance training for peak performance fueling the athlete's body (nutrition) conducting basic fitness testing perform basic stress tests (lung capacity, recovery capacity) sports psychology 	Foods module FOD202. Community resources – fitness centres.
	describe how athletic injuries can affect the athlete throughout the lifespan.	Retired athlete, local guest speaker.

MODULE CMH313: SPORTS FIRST AID II (continued)

Concept	Specific Learner Expectations	Notes
Observation, Assessment, Application	 identify the causes and effects of common injuries in school or community sports discuss preventive measures identify factors to consider in injury assessment and distinguish how those factors can help differentiate between minor injuries and when referral is necessary demonstrate appropriate first aid and taping skills for specific injuries describe advanced therapeutic and rehabilitative modalities carried out by trained professionals. 	Visit to physiotherapy/ sports medicine clinics.
Career Exploration	 research and assess career opportunities for students interested in a career in sports medicine including: duties, working conditions education qualifications employment/entrepreneurial opportunities advancement potential salary range and benefits personal characteristics. 	

COMMUNITY HEALTH

SECTION G: ASSESSMENT TOOLS

(DRAFT)

TABLE OF CONTENTS

The following pages include background information and strategies for assessing student achievement and the assessment tools that are listed in Sections D, E and F of this Guide.

This section of the Guide to Standards and Implementation has been designed to provide a common base of understanding about the level of competencies students are expected to demonstrate to successfully complete a module. The goal is to establish assessment standards for junior and senior high school students that are fair, credible, and challenging.

These tools will assist teachers throughout the province to more consistently assess student achievement. The purpose of expanding on the assessment standards is to:

- increase confidence among students, parents, business/industry and postsecondary institutions that students can demonstrate the competencies specified in the modules they have completed
- encourage fairness and equity in how students' efforts are judged
- enable learners to focus effort on key learnings
- support teachers and community partners in planning and implementing CTS.

These tools are in draft form and are being validated between now and 1997 during the optional stage of CTS implementation.

ASSESSING STUDENT ACHIEVEMENT IN CTS

The CTS assessment standards assess two basic forms of competency:

- What a student can do?
 - make a product (e.g., wood bowl, report, garment)
 - demonstrate a process
 - strand-related competencies (e.g., keyboarding, hair cutting, sewing techniques, lab procedures)
 - basic competencies (e.g., resource use, safety procedures, teamwork).
- What a student knows?
 - knowledge base needed to demonstrate a competency (link theory and practice).

CTS Defines Summative Assessment Standards

The assessment standards and tools defined for the CTS modules, referenced in Sections D, E and F of this Guide, focus on the final (or summative) assessment of student achievement.

Assessment throughout the learning period (or formative assessment) will continue to assess how students are progressing. Teachers direct and respond to students' efforts to learn—setting and marking tasks and assignments, indicating where improvement is needed, sending out interim reports, congratulating excellence, etc.

Teachers will decide which instructional and assessment strategies to apply during the formative learning period. As formative and summative assessment are closely linked, some teachers may wish to modify the tools included in this section to use during the instructional process. Teachers may also develop their own summative assessment tools as long as the standards are consistent with the minimum expectations outlined by Alberta Education.

Grading and Reporting Student Achievement

When a student can demonstrate ALL of the exitlevel competencies defined for the module (Module Learner Expectations), the teacher will designate the module as "successfully completed." The teacher will then use accepted grading practices to determine the percentage grade to be given for the module—a mark not less than 50%.

The time frame a teacher allows a student to develop the exit-level competency is a local decision. NOTE: The Senior High School Handbook specifies that students must have access to 25 hours of instruction for each credit. Students may, however, attain the required competencies in less time and may proceed to other modules.

Teachers are encouraged to consult their colleagues to ensure grading practices are as consistent as possible.

High school teachers may wish to refer to "Directions for Reporting Student Achievement in CTS" for information on how to use the CTS course codes to report credits students have earned to Alberta Education. (Copies of this document have been forwarded to superintendents and senior high school principals.)

Components of Assessment Standards in CTS

The following components are included in each module:

- module learner expectations (shaded left column of the module) define the exit-level competencies students are expected to achieve to complete a module. Each MLE defines and describes critical behaviours that can be measured and observed. The student must meet the standard specified for ALL MLEs within a module to be successful. (MLEs will not change until 1997 when minor adjustments may be made to update and clarify wording.)
- suggested emphasis (right column of the module) provides a guideline for the relative significance of each MLE and can be used to

organize for instruction. (In draft until early 1997, revisions to selected modules will be distributed in June 1995 and 1996 with final revisions in June 1997.)

• conditions and criteria (middle column of the module) set the framework for the assessment of student competency, specifying the minimum standard for performance and including a reference to assessment tools, where appropriate. (In draft until early 1997, revisions to selected modules will be distributed in June 1995 and 1996 with final revisions in June 1997.)

Conditions outline the specifications under which a student's competency can be judged. For example, the conditions could specify whether the assessment should be timed or not, or if the student should be allowed to access to support resources or references.

Criteria define the behaviours that a student must demonstrate to meet the designated standard. For example, the criteria could describe the various techniques that must be demonstrated when using a tool, and/or describe the minimum components of a project the student must complete.

Standard may be defined by (1) assessment tools, which are referenced in this section (or sometimes in approved learning resources) and/or (2) illustrative examples of student work (to be developed and distributed in June 1997).

Assessment Tools included in this section of the Guide tend to be of two types:

• tools generic to a strand or to the entire CTS program; e.g., a standard 5-point rating scale is used in all strands. Other generic tools include assessing reports and presentations and lab safety checklists. (Names of these tools include the strand code (e.g., "INF" for Information Processing) and a code for the type of tool (e.g., "TDENT" for Text-Data Entry).)

- tools specific to a module; e.g., assessment checklist for assessing a venture plan in Enterprise and Innovation or a checklist for sketching, drawing and modelling in Design Studies. (Names of these tools include the module code; e.g., "INF101-1" indicating that it is the first module-specific tool used in Information Processing Module 101.)
- Illustrative Examples: Selected examples of student work in print, audio, video and/or CD-ROM formats are scheduled to be available by June 1997. These exemples will supplement the assessment tools and help teachers decide if a student's work is at standard, above standard, or not yet at standard.

Development and Validation Processes

The "Conditions and Criteria" and "Suggested Emphasis" columns are being validated 1994–97, with extensive input from teachers, professional associations/contacts and post-secondary institutions. The goal is to prepare well-structured assessment standards and related assessment tools that:

- establish an appropriate level of challenge and rigour
- relate directly to the type of learning described in the curriculum standard
- · are easy to understand
- are efficient to implement
- can provide a consistent measure of what was expected to be measured.

ASSESSING STUDENT ACHIEVEMENT IN COMMUNITY HEALTH

The Community Health curriculum is based on the premise that recognizable outcomes may be compared to stated standards. In Community Health, the standards identify students' growth in knowledge, skills and attitudes. The curriculum defines outcomes through the Module Learner Expectations (MLEs) and Specific Learner Expectations (SLEs). It also suggests criteria and conditions for assessment and the emphasis to be placed on each expectation. These elements combine to provide an overall framework for instruction and assessment.

Assessment Strategies and Tools

A variety of tools have been provided for your reference and use. In the development of the assessment materials there has been an attempt to keep it as simple as possible while also providing guidance and assistance to teachers. The tools are intended to help you assess students' work as accurately and consistently as possible by stating standards of performance for elements felt to be important within the curriculum as a whole or in specified modules. They also provide standards for basic competencies students should be able to demonstrate while engaging in learning.

The tools that have been developed are intended to be used as summative assessment tools. Depending on the way the classroom is organized, they may be used when the student has indicated he or she is ready for the final assessment or by the entire class at the end of the learning period.

Tools Generic to CTS

The generic rating scale has been used to develop several of the tools in CTS. A generic framework for assessing the processes CTS students apply in completing a task or project is included in this section. It is based on the notion that student will follow a process as they work through their projects and that this process has a number of sequential steps. The framework shows the increasing expectations from the introductory, to the intermediate, to the advanced level.

Some assessment tools; e.g., Presentation/ Report (PRE100, PRE200 and PRE300) are generic to CTS and have been included in Section G. In assessing MLEs at the introductory level, PRE100 would be used. Since the content portion of this tool must relate specifically to an MLE in a module, the tool has been adapted, labelled and included under Assessment Tools Specific to the Community Health strand, CMH, and to the module; e.g., CMH101 (module number) and the tool number (within the module); e.g., CMH101-1. The tool PRE200 would be used at the intermediate level and PRE300 would be used at the advanced level.

The Basic Competencies Reference Guide can be used directly as a checklist or as a guide to assess these competencies through other teacher-developed tools.

Tools Generic to Community Health

Certain concepts, such as scenario assessments, community resources, personal action plans, career explorations are an integral part of the Community Health strand. Generic assessment tools are included to assess these concepts as consistently as possible with the expected standard increasing as the student progresses from introductory to advanced level modules. These tools are identified throughout the document by using the CMH (Community Health) with letters; e.g., SAW, CRA, PAPW, CAREERS.

A few of the generic tools include the skills developed in 1, 2 or 3 recommended sequences of modules. For example, the tool to assess skills developed in Home Care I, II or III are identified on the tool CMHHCSA and skills in Sports First Aid I and II are on the tool CMHSFACA.

Tools Specific to Community Health

The tools that have been developed to assess specific MLEs in a module are labelled with the module number and the tool number (e.g., CMH101-1). They are referred to under the conditions and criteria section.

In some instances where the tool suggested has been a test, a sample test or sample questions have been included. It is recommended that the instructor prepare appropriate test banks. Numerous assessment tools have been developed for module specific presentation/reports, research and analysis.

Assessment materials currently being used may continue to be used if they assess the criteria and conditions for an MLE.

Emphasis for Assessment

The "Suggested Emphasis" column provides a guideline for the relative significance of each MLE to assist in organizing for instruction. The basic competencies are expected to be integrated throughout and therefore the tools have been designed to assess the relevant basic competencies and the task, skill, process and/or theory.

BASIC COMPETENCIES REFERENCE GUIDE

(This checklist is still being validated)

The following chart outlines basic competencies which students will endeavor to develop and enhance in each of the CTS strands and modules. Students' basic competencies should be assessed through observations involving the student, teacher(s), peers and others as they complete the requirements for each module. In general, there is a progression of task complexity and student initiative as outlined in the Development Framework*. As students progress through the Stages 1, 2, 3 and 4 of this reference guide, they build on the competencies gained in earlier stages. Students leaving high school should set themselves a goal of being able to demonstrate Stage 3 performance.

Suggested strategies for classroom use include:

- having students rate themselves and each other
- using for a reflective conversation between teacher and student
- highlighting areas of strength

- tracking growth in various CTS strands
- highlighting areas upon which to focus
- including in student's portfolio

Stage 1— The student:	Stage 2— The student:	Stage 3— The student:	Stage 4— The student:
Managing Learning □ comes to class prepared for learning □ follows basic instructions as directed	☐ follows instructions with limited direction ☐ sets goals and establishes steps to achieve them with direction	☐ follows detailed instructions on an independent basis ☐ sets clear goals and establish steps to achieve them	demonstrates self-direction in learning, goal setting and goal
□ acquires specialized knowledge, skills and attitudes □ identifies criteria for evaluating choices and making decisions □ uses a variety of learning strategies	□ applies specialized knowledge, skills and attitudes in practical situations □ identifies and applies a range of effective strategies for solving problems and making decisions □ explores and uses a variety of learning strategies with limited direction	transfers and applies specialized knowledge, skills and attitudes in a variety of situations uses a range of critical thinking skills to evaluate situations, solve problems and make decisions selects and uses effective learning strategies cooperates with others in the effective use of learning	achievement transfers and applies learning in new situations: demonstrates commitment to life-long learning thinks critically and acts logically to evaluate situations, solve problems and make decisions provides leadership in the effective use of learning
Managing Resources	-	strategies	strategies
□ adheres to established timelines; uses time/schedules/planners effectively □ uses information (material and human resources) as directed □ uses technology (facilities, equipment, supplies) as directed to perform a task or provide a service □ maintains, stores, and/or disposes of equipment and maierials as directed	☐ creates and adheres to timelines with limited direction; uses time/schedules/planners effectively ☐ accesses and uses a range of relevant information (material and human resources) with limited direction ☐ uses technology (facilities, equipment, supplies) as appropriate to perform a task or provide a service with minimal assistance and supervision ☐ maintains, stores and/or disposes of equipment and materials with limited assistance	☐ creates and adheres to detailed timelines on an independent basis; prioritize task; use time/ schedules/planners effectively ☐ accesses a range of information (material and human resources) and recognizes when additional resources are required ☐ selects and uses appropriate technology (facilities, equipment, supplies) to perform a task of provide a service on an independent basis ☐ maintains, stores and/or disposes of equipment and materials on an independent basis	creates and adheres to detailed timelines; use time/schedules/ planners effectively, prioritizing tasks on a consistent basis uses a wide range of information (material and human resources) in order to support and enhance the basic requirement recognizes the monetary and intrinsic value of managing technology (facilities, equipment, supplies) demonstrates effective techniques for managing facilities, equipment and
Problem Solving and Innovation	1		supplies
participates in problem solving as a process leams a range of problem-solving skills and approaches practices problem-solving skills by responding appropriately to a clearly defined problem, specified goals and constraints by: generating alternatives evaluating alternatives selecting appropriate alternative(s) taking action	□ identifies the problem and selects an appropriate problem-solving approach responding appropriately to specified goals and constraints □ applies problem-solving skills to a directed or a self-directed activity by: - generating alternatives - evaluating alternatives - selecting appropriate alternative(s) - taking action	 □ thinks critically and acts logically in the context of problem solving □ transfers problem-solving skills to real-life situations by generating new possibilities □ prepares implementation plans □ recognizes risks 	☐ identifies and resolves problems efficiently and effectively ☐ identifies and suggest new ideas to get the job done creatively by: ─ combining ideas or information new ways ─ making connections between seemingly unrelated ideas ─ actively seeking out opportunities

Community Health /G.8 (Interim 1996)

Stage 1— The student:	Stage 2—The student:	Stage 3— The student:	Stage 4— The student:
Communicating Effectively			
 uses communication skills; e.g., reading, writing, illustrating, speaking 	communicates thoughts, feelings, and ideas to justify or challenges a position using written, oral and visual means	prepares and effectively presents accurate, concise, written, visual and/or oral reports providing reasoned argument	negotiates effectively by working towards an agreement that may involve exchanging specific resources or resolving divergent interests
uses language in appropriate context	uses technical language appropriately	convinces or otherwise motivates individuals	negotiates and works towards a consensus
☐ listens to understand and learn ☐ demonstrates positive · interpersonal skills in selected contexts	☐ listens and responds to understand and learn ☐ demonstrates positive interpersonal skills in many contexts	☐ listens and responds to understand, learn and teach ☐ demonstrates positive interpersonal skills in most contexts	☐ listens and responds to under- stand, learn, teach and evaluate ☐ promotes positive interpersonal skills among others
Working with Others ☐ fulfills responsibility in a group project		seeks a team approach as appropriate based on group needs and benefits e.g. idea potential, variety of strengths, sharing of work load	leads, where appropriate, mobilizing the group for high performance
works collaboratively in structured situations with peer members	cooperates to achieve group results	works in a team or group: - encourages and supports team members	understands and works within the context of the group
acknowledges the opinions and contributions of others in the group	☐ maintains a balance between speaking, listening and responding in group discussion ☐ respects the feelings and views of others	- helps others in a positive manner - provides leadership/ followership as required - negotiates and works toward consensus as required	prepares, validates and implements plans that reveal new possibilities
Demonstrating Responsibility			
Attendance demonstrates responsibility in attendance, punctuality and task completion Safety			
☐ follows personal and environmental health and safety procedures	recognizes and follows personal and environmental health and safety procedures	establishes and follows personal and environmental health and safety procedures	transfers and applies personal and environmental health and safety procedures to a variety of environments and situations
☐ identifies immediate hazards and their impact on self, others and the environment	identifies immediate and potential hazards and their impact on self, others and the environment		
☐ follows appropriate/emergency response procedures			demonstrates accountability for actions taken to address immediate and potential hazards
Ethics makes personal judgements about whether certain behaviour/ action is right or wrong	☐ assesses how personal judgements affect other peer members and/or family; e.g., home and school	assesses the implications of personal/group actions within the broader community; e.g., workplace	□ analyses the implications of personal/group actions within the global context □ states and defends a personal code of ethics as required
Developmental Framework ★ • Simple task • Structured environment • Directed learning	Task with limited variable Less structured environment Limited direction	 Task with multiple variables Flexible environment Self-directed learning, seeking assistance as required 	 Complex task Open environment Self-directed/self-motivated

The

ASSESSMENT FRAMEWORK: ISSUE ANALYSIS

Preparation and Planning

- accurately describes an issue on which people disagree
- poses an important question regarding the issue
- accesses basic in-school/community information sources regarding the issue
 - uses one or more information-gathering techniques

Analyzing Perspectives

- clarifies different points of view regarding the issue; e.g., social, economic, environmental
- states a position on the issue and logical reasons for adopting that position
- states an opposing position on the issue and logical reasons for adopting that position
- identifies sources of conflict among different positions
- distinguishes between fact and fiction/opinion/theory

Collaboration and Teamwork

- shares work appropriately among group members
 - · respects the views of others

Evaluating Choices/Making Decisions

- identifies useful alternatives regarding the issue
- establishes criteria for assessing each alternative;
 e.g., social, economic, environmental
- selects an appropriate alternative based on established
- reflects on strengths/weaknesses of decisions by considering consequences
- communicates information in a logical sequence to justify choices/decisions made

rue suudent. Preparation and Planning

- accurately describes an issue on which people disagree, explaining areas of disagreement
- poses one or more thoughtful questions regarding the issue
 - accesses a range of relevant in-school/community
 - resources

 uses a range of information-gathering techniques

Analyzing Perspectives

- categorizes different points of view regarding the issue;
 e.g., cultural, ethical, economic, environmental, health-related
 - states a position on the issue and logical reasons for adopting that position
 - states two or more opposing positions on the issue and logical reasons for adopting each position
- describes interrelationships among different perspectives/points of view
 determines accuracy/currency/reliability of information

Collaboration and Teamwork

and ideas

- shares work appropriately among group members
 - · respects and considers the views of others
 - negotiates solutions to problems

Evaluating Choices/Making Decisions

- identifies important and appropriate alternatives regarding
 the issue
 - establishes knowledge- and value-based criteria for assessing each alternative; e.g., social, economic, environmental
- selects an appropriate alternative by showing differences among choices
 assesses strengths/weaknesses of decisions by considering
- consequences
 communicates ideas in a logical sequence with supporting detail to justify choices/decisions made

Preparation and Planning

- accurately describes an issue on which people disagree, explaining specific causes of disagreement
 - poses thoughtful questions regarding the issue
 accesses a range of relevant information sources
- accesses a range of relevant information sources and recognizes when additional information is required
 demonstrates resourcefulness in collecting data

Analyzing Perspectives

- categorizes different points of view regarding the issue;
 e.g., cultural, ethical, economic, environmental, health-related, scientific, political
 - states a position on the issue and insightful reasons for adopting that position
 states three or more opposing positions on the issue and thoughful reasons for adopting each position
 - thoughtful reasons for adopting each position

 analyzes interrelationships among different
- perspectives/points of view
 recognizes underlying bias/assumptions/values in information and ideas

Collaboration and Teamwork

- shares work appropriately among group members
 - respects and considers the views of others
- negotiates with sensitivity solutions to problems

Evaluating Choices/Making Decisions

- describes in detail important and appropriate alternatives regarding the issue
 - establishes knowledge- and value-based criteria for assessing each alternative; e.g., social, economic, environmental
- selects an appropriate and useful alternative by showing differences among choices
 - assesses strengths/weaknesses of decisions by considering consequences and implications
- communicates thoughts/feelings/ideas clearly to justify
 choices/decisions made

ADVANCED	The student: Management • prepares self for task • organizes and works in an orderly manner • interprets and carries out instructions accurately • plans and uses time effectively in a logical sequence • displays leadership in adhering to routine procedures • attempts to solve problems prior to requesting help	Teamwork • cooperates with group members • shares work appropriately among group members • negotiates with sensitivity solutions to problems • displays effective communication skills	Use of Equipment and Materials • selects and uses equipment/materials independently • demonstrates concern for safe procedures/techniques • weighs and measures accurately and efficiently • practises proper sanitation procedures • ininimizes waste of materials • anticipates potential hazards and emergency response	Investigative Techniques • uses relevant information to explain observations • makes predictions that can be tested • plans, sets up and conducts experiments to test a prediction • analyzes relationships among manipulated/responding variables • obtains accurate results that confirm/reject prediction and answer related questions • summarizes, applies and evaluates experimental
INTERMEDIATE	The student: Management • prepares self for task • organizes and works in an orderly manner • interprets and carries out instructions accurately • plans and uses time effectively • adheres to routine procedures	Teamwork • cooperates with group members • shares work appropriately among group members • negotiates solutions to problems	Use of Equipment and Materials • selects and uses appropriate equipment/materials • models safe procedures/techniques • weighs and measures accurately • practises proper sanitation procedures • minimizes waste of materials • advises of potential hazards and necessary repairs	Investigative Techniques • gathers and applies information from a variety of sources • makes predictions that can be tested • plans, sets up and conducts experiments to test a prediction • identifies and explains manipulated/responding variables • obtains accurate results that confirm/reject the prediction • summarizes and applies experimental outcomes
INTRODUCTORY	The student: Management • prepares self for task • organizes and works in an orderly manner • carries out instructions accurately • uses time effectively	Teanswork • coopcrates with group members • shares work appropriately among group members	Use of Equipment and Materials • selects and uscs appropriate equipment/materials • follows safe procedures/techniques • weighs and measures accurately • returns clean equipment/materials to storage areas	Investigative Techniques • gathers and applies information from at least one source • makes predictions that can be tested • sets up and conducts experiments to test a prediction • distinguishes between manipulated/responding variables • obtains results that can be used to determine if some aspect of the prediction is accurate • summarizes important experimental outcomes

INTRODUCTORY ADVANCED	
INTERMEDIATE	

The student:

Preparation and Planning

- accurately describes an issue on which people disagree
- poses an important question regarding the issue
- accesses basic in-school/community information sources
 - uses one or more information-gathering techniques regarding the issue

Analyzing Perspectives

- states a position on the issue and logical reasons for adopting that position
 - explains why the issue is important by presenting examples of possible consequences
- clarifies different points of view regarding the issue; e.g., social, economic, environmental
- distinguishes between fact and fiction/opinion/theory

Collaboration and Teamwork

- · works with a range of peer members
- shares information/opinions/suggestions through group discussion
 - listens to and respects the views of others

Negotiating and Debating

- presents a convincing argument in logical sequence supporting a position adopted on the issue
- provides a relevant response to opposing arguments
- speaks clearly so the argument can be understood
- establishes a shared understanding of key alternatives and consequences relevant to the issue

The student.

Preparation and Planning

accurately describes an issue on which people disagree, explaining areas of disagreement

- poses one or more thoughtful questions regarding the
 - accesses a range of relevant in-school/community resources
- uses a range of information-gathering techniques

Analyzing Perspectives

- states a position on the issue and logical reasons for adopting that position
 - · explains why the issue is important by presenting examples of possible consequences
- categorizes different points of view regarding the issue; e.g., cultural, ethical, economic, environmental, healthrelated
- determines aceuracy/currency/reliability of information and ideas

Collaboration and Teamwork

- · works with a range of peer members
- shares information/opinions/suggestions, maintaining a balance between speaking and listening
 - listens to and respects the views of others, requesting clarification as necessary from other group members

Negotiating and Debating

- supporting a position adopted, conveying points in order · presents a convincing argument in logical sequence of importance
- provides a relevant and convincing response to opposing arguments
 - · speaks elearly without hesitation so the argument can be understood
- negotiates a shared agreement on preferred alternatives relevant to the issue

The student:

Preparation and Planning

- accurately describes an issue on which people disagree, explaining specifie causes of disagreement
 - poses thoughtful questions regarding the issue
- accesses a range of relevant information sources and recognizes when additional information is required
 - demonstrates resourcefulness in collecting data

Analyzing Perspectives

- states a position on the issue and insightful reasons for adopting that position
 - examples of possible consequences and implications · explains why the issue is important by presenting
- eategorizes different points of view regarding the issue; e.g., cultural, ethical, economic, environmental, healthrelated, scientific, political
 - recognizes underlying bias/assumptions/values in information and ideas

Collaboration and Teamwork

- · works with a wide range of peer members
- shares information/opinions/suggestions, maintaining a balance between speaking and listening
 - listens to and respects the views of others, requesting clarification as necessary from other group members

Negotiating and Debating

- supporting a position adopted, conveying points in order of importance and backing each with sound evidence presents a convincing argument in logical sequence
- · speaks clearly without hesitation so the argument can be provides a relevant and convincing rebuttal to opposing arguments
 - understood by all listeners
 - negotiates a shared agreement on preferred alternatives by resolving divergent points of view

ADVANCED	The student:	Preparation and Planning • sets goals and describes steps to achieve them • uses personal initiative to formulate questions and find answers • accesses a range of relevant information sources and recognizes when additional information is required • interprets, organizes and combines information in creative and thoughtful ways • records information accurately, using appropriate technical terms and supporting detail • plans and uses time effectively, prioritizing tasks on a consistent basis • assesses and refines approach to task and project status based on feedback and reflection	• demonstrates effective use of a variety of communication media: • e.g., Written: spelling, punctuation; grammar, format (formal/informal, technical/literary) • Oral: voice projection, body language, appearance, enthusiasm, evidence of prior practice • Audio-Visual: techniques, tools, clarity, speed and pacing • maintains acceptable grammatical and technical standards through proofreading and editing • provides an introduction that describes the purpose and scope of the project • communicates thoughts/feelings/ideas clearly to justify or challenge a position • states a conclusion by analyzing and synthesizing the information gathered • gives evidence of adequate research through a reference list including seven or more relevant information sources
INTERMEDIATE	The student:	Preparation and Planning • sets goals and describes steps to achieve them • uses personal initiative to formulate questions and find answers • accesses a range of relevant in-school/community resources • interprets, organizes and combines information into a logical sequence • records information accurately with appropriate supporting detail and using correct technical terms • plans and uses time effectively • gathers and responds to feedback regarding approach to task and project status	• demonstrates effective use of at least two communication media: • s. Written: spelling, punctuation, grammar, format (format/niformal) Oral: voice projection, body language, appearance Audio-Visual: techniques, tools, clarity • maintains acceptable grammatical and technical standards through proofreading and editing • provides an introduction that describes the purpose and scope of the project • communicates ideas into a logical sequence with sufficient supporting detail • states a conclusion by synthesizing the information gathered • provides a reference list that includes five or more relevant information sources
INTRODUCTORY	The student:	Preparation and Planning • sets goals and follows instructions accurately • responds to directed questions and follows necessary steps to find answers • accesses basic in-school/community information sources • interprets and organizes information into a logical sequence • records information accurately, using correct technical terms • uses time effectively	• demonstrates effective use of at least one medium of communication: • se., Written: spelling, punctuation, grammar, basic format Oral: voice projection, body language Audio-Visual: techniques, tools • uses correct grammatical convention and technical terms through proofreading/editing • provides an introduction that describes the purpose of the project • communicates information in a logical sequence • states a conclusion based on a summary of facts • provides a reference list of three or more basic information sources

ADVANCED	The student:	Preparation and Planning • sets clear goals and establishes steps to achieve them • creates and adheres to detailed timelines • uses personal initiative to formulate questions and find answers • plans and uses time effectively, prioritizing tasks on a consistent basis	Information Gathering and Processing • accesses a range of relevant information sources and recognizes when additional information is required • demonstrates resourcefulness in collecting data • interprets, organizes and combines information in creative and thoughtful ways	 records information accurately with appropriate supporting detail and using correct technical terms recognizes underlying bias/assumptions/values in information sources assesses and refines approach to the task and project status based on feedback and reflection 	Collaboration and Teamwork • cooperates with group members • shares work appropriately among group members • negotiates with sensitivity solutions to problems • displays effective communication and leadership skills	Information Sharing • demonstrates effective use of a variety of communication media; e.g., written, oral, audio-visual • communicates thoughts/feelings/ideas clearly to justify or challenge a position • maintains acceptable grammatical and technical standards • gives evidence of adequate information gathering by citing seven or more relevant information sources
INTERMEDIATE	The student:	 Preparation and Planning sets goals and establishes steps to achieve them creates and adheres to useful timelines uses personal initiative to formulate questions and find answers plans and uses time effectively 	Information Gathering and Processing • accesses a range of relevant in-school/community resources • uses a range of information-gathering techniques • interprets, organizes and combines information into a logical sequence	 records information accurately with appropriate supporting detail and using correct technical terms determines accuracy/currency/reliability of information sources gathers and responds to feedback regarding approach to the task 	Collaboration and Teamwork • cooperates with group members • shares work appropriately among group members • negotiates solutions to problems	Information Sharing • demonstrates effective use of two or more communication media; e.g., written, oral, audio-visual • communicates ideas in a logical sequence with sufficient supporting detail • maintains acceptable grammatical and technical standards • cites five or more relevant information sources
INTRODUCTORY	The student:	Preparation and Planning	Information Gathering and Processing • accesses basic in-school/community information sources • uses one or more information-gathering techniques • interprets and organizes information in a logical sequence	 records information accurately, using correct technical terms distinguishes between fact and fiction/opinion/theory responds to feedback when current approach is not working 	Collaboration and Teamwork • cooperates with group members • shares work appropriately among group members	Information Sharing • demonstrates effective use of one or more communication media; e.g., written, oral, audio-visual • communicates information in a logical sequence • uses correct grammatical convention and technical terms • cites three or more basic information sources

Rating Scale

4	demonstrates a thorough understanding of the situation. Problems are solved independently in effective, creative ways. Conclusion is based on analysis of data and supported with sufficient detail.
3	demonstrates an understanding of the situation. Problems are solved effectively in a self-directed manner. Conclusion is based on analysis of data and supported with some detail.
2	demonstrates partial understanding of the situation. Attempts to use a problem-solving strategy with guidance. Conclusion recommends a minimum of solutions.
1	demonstrates some understanding of the situation. Attempts a response but conclusion is general and not supported.
0	fails to understand the situation or attempt a response.
N/A	N/A Not applicable.

Note: Use Tool CMH101-2 to assess student competency.

Follow-up	Contact with teen by parents while on holiday.	Parents have follow-up discussion with daughter after the dance.	Teen finds a part-time job to help pay clothing expenses.
Negotiation	Parents agree to let teen stay home if he/she will live with his/her aunt.	Parents agree to let her go to the dance if she 'double dates' with her older brother.	Parents will only spend a set amount for clothing. If teen wants something different, he/she must pay the difference.
Argunient	Both parties state their point of view (reasons for their position).	Both parties listen to each others arguments.	Both sides present their arguments for buying and not buying expensive clothing.
Setting Limits	Parents and teen agree to discuss issue, not unrelated issues.	Only the matter of the date for the date for the dance will be discussed.	Agree to keep discussion to topic of clothes.
Awareness	Day before departure student announces he/she has a job and can't go on holiday.	Daughter announces her date the day previous to the event.	Problem has been building for couple of years.
Scenario	1. Teen wants to stay home and work and not go with family on holidays.	2. Parents disagree with Grade 8 girl going to high school dance with a Grade 11 boy.	3. Teen complaining he doesn't fit in at school because he doesn't wear 'designer label' clothing. Parents cannot afford the expense.

CMIII101-6

CAREERS CHOICES: SAMPLE

Sample for CMII101-5

СНОІСЕ	INFLUENCE	TODAY	FUTURE
20 hours per week part-time job	SELF	Extra income	Buy car, save tuition for college
	FAMILY	Less time at home on weekends and evenings	Possibly relieves financial hardship as student helped with expenses throughout school
	FRIENDS	Go to movies, buy gifts for friends	Available resources to take advantage of social opportunities, e.g., travel.
	SCHOOL/COMMUNITY	Less time to spend on studies and extra-curricular activities	Employability skills developed – a productive citizen

Suggested Responses in italics following question.

- 1. As a babysitter, you are running a small business. List at least four steps to make is successful.
- reference checks
- gathering information
- transportation
 - wage.
- 2. List six rights and responsibilities of a babysitter.
 - keep the children safe and secure
- pay attention to the children and be patient
 - feed and comfort them
- be courteous and responsible, prompt
 - know/follow emergency procedures
- how much you will be paid.
- 3. List six rights and responsibilities of the employers.
- give tour of house
- introduce you to child and the pets
- fill out an information sheet with numbers where they can be reached and emergency numbers
 - give information about children's routines, special needs
 - arrange travel to and from work
 - right to reliable babysitter
- right to privacy.
- 4. Name at least three things you can do to ensure personal safety
 - phone parents as you leave for home
- do not accept a ride home if you suspect the employer has been
- don't reveal that your employer is out of the house for phone calls
 - do not open the door to strangers.
- 5. List two rights of the babysitter's parents
- know where you are, who you are babysitting for, what time you'll
 be home, how you will be getting home.

- 6. It is the babysitter's responsibility to keep the children safe and secure.
 - a) List four ways to prevent falls
 - carry child securely
- use safety straps on high chairs and strollers
 - pick up toys on floor
- supervise children on play structures
- b) List three ways to prevent street accidents
- supervise outdoors
- · hold hand to cross street
- be wary of animals
- c) Other safety questions should deal with such examples as: poisoning, drowning, burning, choking, smothering.
- Describe a personal care experience
- 8. Assess your personal competencies in providing child care.

SCENARIO

Behavioural Problems:

Ron (4 years old) and John (2 years old) start to fight. They are running around ,slapping, hitting and kicking each other.

Two hours after you put baby Megan to bed, she wakes crying.

Tyler insists on going outside to play but his parents have asked you to keep him inside. He falls on the floor screaming and kicking. He holds his breath and turns blue.

Emergency Situations:

You are babysitting, the children are asleep and you suddenly smell smoke and hear the crackling of flames.

Cam, the two year old child you are babysitting, locks himself in the bathroom.

- Which of the following must parents tell you before they leave the house?
 - the emergency phone numbers
- dangerous areas of the house
- c) both a and b
- When babysitting, you have the right to: 7
- have friends over
- do your homework
- refuse a ride home with a parent who is drunk (3)
- A 9-year-old is telling you that he doesn't like you and doesn't need a babysitter anyway. You should: 3
- send him to his room to think over why he's being disrespectful
- tell him that you're going to have to report his attitude to his parents, unless he changes
-) tell him you'd like to plan an activity that he'd enjoy doing; ask him to help you plan it. (3)
- If the telephone rings while you are bathing a three-year-old, you should: 4.
 - a) ignore the ringing and stay with child
- ask the child to play quietly while you answer the phone 9
- run to the phone, keep your conversation to less than 30 seconds, run back to the child.
- How should you treat a child who is shy when she first meets you? 5
 - ignore her until she comes to you
- speak in a friendly way; be patient until she comes to you (9)
 - give her several hugs.
- The first thing to do if a child cuts himself badly with scissors is: 9
 - call the parents
- put direct pressure on the wound with a clean cloth 9
 - wash off the blood until the bleeding stops.

- In the ABCs of first aid, "B" means:
- burns
- breathing (q)
- bandaging 0
- A child's clothes are on fire. You should:
- a) smother the flames with a coat or blanket
 - run with child to a water tap
 - run to get a fire extinguisher. G G
- If you think a stranger is trying to enter the house from the backyard, you should: 6
- go out the front door to a neighbour's
 - telephone the police 9
- shout at the stranger to go away (c)
- 10. You suspect that a child is being abused by his parents, but you aren't sure. What should you do?
 - wait until you're absolutely sure before making accusations
- discuss whether to notify a child care worker with an adult you trust c) confront the child's parents.
 - confront the child's parents.

Impact Scenario

fractured pelvis, burns to her face from the air bag and a bruised left shoulder. Sara had a severe whiplash, a fractured right humerus and numerous cuts to her face. Both intersection a car came sliding through the red light and hit them broadside. Mr. Anderson and sons Dean and Doug received the call from the hospital. Mom had a Mrs. Anderson and daughter Sara were driving to the shopping centre to pick up some last minute things in preparation for a trip to Disneyland. As they entered the would be okay after treatment and would be sent home after 24 hours observation.

treatment." Further tests and biopsy confirmed cancer of the right lung and trachea. George was given chemotherapy as conventional treatment and sent home. His life The Simpson family were an ordinary upper middle-class family who had raised their children and were preparing to retire in the next five years. George Simpson went following Monday George got a call from his doctor's clinic asking him if he could stop in after work to see his doctor regarding his tests. When George entered the office his doctor said, "George, I'm afraid I don't have great news. Your chest x-ray shows some lesions which I believe we should biopsy so we can begin some for his annual checkup with their family doctor. She did the usual tests, checked George over and booked him for urine & blood tests, chest x-ray and ECG. The expectancy would be approximately 6 months. Mary had always let George look after everything like paying the bills, all the repairs, car care, yard and house

together. They knew it was not healthy for them nor for their children but so far their attempt had not been successful. Susan knew she was at an even higher risk because collapsed onto the floor. She was unconscious with labored breathing and the left side of her face was very noticeably drooping. At the hospital Susan was diagnosed as she was taking contraceptive pills until she found time to go in and have a tubal ligation. She had been complaining of a headache over the last four or five days and the Harold and Susan in their 30's lead a busy life with four young children and both have full time jobs. They had made a New Year's resolution to try to quite smoking occasional dizzy spell. Harold urged her to make an appointment to see the doctor. Susan sat down after supper on the couch in the family room. All of a sudden she having a massive stroke.

SCENARIO

noon every day as he doesn't have time for breakfast. Sheena's mom no longer gives him a ride to school in the morning and he has to catch an early bus. He found it difficult at church youth group when Sheena was there also. Now he's coming down with a horrible cold when hockey try-outs are about to start. Today when he saw John has recently broken up with Sheena. They had gone together for 14 months. John found it very difficult to end the relationship. Now he has a stomach ache by Sheena having lunch with one of his hockey buddies he felt so alone and sad. He had to turn away so his friends wouldn't see him swallowing the lump he had in his throat. Maybe that is why he had such a sore throat tonight.

broken ankle hurt! How long before she could return to college; how would she ever manage all those books while she is on crutches? What will be ball team do for the matters worse, the umpire called her out even through she was sure she had been there first. Now, she was in hospital awaiting surgery and her parents were out of town Brenda had been playing ball all weekend in a tournament at a local town in central Alberta. It was the top of the 9th inning and she was the winning run on third. She saw her chance to steal home and took off with all her speed. She and the catcher had a nasty collision at home plate resulting in a broken ankle for Brenda. To make until tomorrow night. She didn't have her health care card. She had scraped her elbow and it was stinging and her left hip hurt to lay on, never mind how much her rest of the season without her? Oh, and worst of all, what about her part-time job? She had to work to pay her college expenses. James had been studying many hours every night for his final college examinations. Some nights he got so engrossed he forget to eat and by the time he realized it he was nauseated. He hoped he didn't get that "flu that was going around". If he was at home his Mom would have something for him to take. He sure missed having his little too tired to bother cooking a meal so heated up a bowl of soup in the microwave. He had never felt so tired in his life. He seemed to ache all over and was felling very sister there telling him all her news about what she had done in Sunday school. Gosh, he never thought he'd ever miss that little town he came from!

On those days, he didn't have lunch as they always had lots of sandwiches, cake and cookies after the service. Sometimes he didn't even have supper. His granddaughter, the church came he'd get him to explain it to him. You know, if he didn't know better he'd think he was having some memory loss. He could not remember if he took his two weeks. A fellow could get pretty lonesome living by himself in a city. His joints were pretty stiff and it hurt to walk very far. He could no longer drive his car. Just thinking about when he lost his licence made him feel sad and isolated. That new bus schedule the city has was so confusing for older people. Next time the fellow from Mr. K., age 83 years, lived by himself in his senior's apartment. His best friend Bill had recently passed away. Lately it seemed he had been attending a lot of funerals. the nurse, was always after him about eating and taking his pills. He sure enjoyed it when she came to see him. It was too bad she couldn't come more than once every blood pressure pills at breakfast. Did he even have breakfast?

5. SCENARIOS

Alberta, a young man was refused a position on the organ transplant waiting list because he has a genetic disease call Downs' Syndrome. Ultimately he won a position on alcoholism), received a liver within days. There have been recent discussions regarding who should and who should not receive access to these precious resources. Do should have access to organ transplants? Perhaps to replace the ones they've ruined? What if the patient was just elderly or mentally challenged? Should a 65 year old Organ transplants have become very prevalent in recent years. However, organs are still in short supply and these procedures are extremely expensive. Recently, in the transplant list but he died before a suitable lung donor could be found. At the same time Mickey Mantle (baseball Hall of Famer who had damaged his liver with you think, feel, believe that individuals who are known alcoholics, drug abusers, smokers, or just lead generally unhealthy lifestyles (eat junk food, do not exercise), receive a transplant? Should people be able to buy and sell their organs to the highest bidder?

In the early 1970s, a number of individuals were diagnosed as mental incompetents and therefore sterilized by eugenics teams all across Canada. Very recently many of these individuals have taken the government to court over this issue. In one case Leilani Muir was awarded a substantial amount of money as compensation.. Do you believe that people diagnosed as mentally challenged should be sterilized? Who decides? There has been a lot of uproar in Alberta recently over the governments cuts to health care. One the major issues to arise out of the cuts is that the access to many services once readily available now has long waiting lists. In order to provide more access, the government has allowed private health care givers to offer services. An example is the new private MRI clinics. Many people believe that the government is creating a two-tiered health system where the people who can afford to pay get immediate service and those who cannot afford extra health insurance or the cost of treatments have to wait. Do you believe, feel, think that the health care system should be privatized? To what degree, a little bit, half public/half private, or totally private?

allows his clients to give themselves a lethal dose of medication. He only assists those patients who are end stage terminal patients (cancer, AIDS, MS) or if they have a progressive neurological disease such as Alzheimer's Disease. There was a case a couple of years ago in Canada where a woman with Lou Gehrig's disease (ALS), Sue Dr. Kevorkian (Dr. Death) has been in the news numerous times over the last few years because of his involvement in assisted suicides. He has created a machine that Svend Robinson. Do you think, feel, believe that individuals with terminal disease should be given the option and perhaps even medical assistance to help them to end Rodriguez, petitioned the courts to allow her to end her life. While the case was being evaluated she carried out her plan in the attendance of a well known politician,

_	Repeat Unit	7-0

To qualify for credentialling, the student must attain a competency of 4 or 5.

- In the event of a serious accident or injury at a work site, who is responsible for investigating and reporting it under the OH&S Act?
- an OH&S officer
- the victim D.C.B.A.
- the employer
- everyone at the work site
- Which of the following hazards would not be covered under the OH&S regulations? 5
- noise exposure
- exposure to radioactivity A.
 - farm hazards
 - toxic chemical exposure D.C.
- The main purpose of the OH&S Legislation is to: 3
- define standards and responsibilities A.
- tell the worker how to do his or her job
- tell managers how to manage their work sites
 - all of the above

D.C.

- Which of the following defines a competent worker? 4
- adequately qualified A.B.
 - suitably trained
- sufficiently experienced O O
 - all of the above

- Which of the following types of accident should be investigated? 5
- injury accident
- lost time accident
- material and equipment damage
 - all of the above
- The Occupational Health and Safety Act requires the employer to do which of the following things when there has been an accident resulting in a serious injury at his or her work site? 9
- notify a Director of Inspection as to the time, place and nature of the accident
 - carry out an investigation into the circumstances surrounding the accident
 - prepare a report in accordance with the regulations
- all of the above
- Which of the following operation(s) requires a code of practice? 7.
- work that by regulation requires a safe work procedure
- work that requires a worker who is competent under the regulation
- work undertaken in confined spaces
- all of the above
- Which of the following have to be considered as potential work hazards? ∞
- harmful substances
- radiation
- noise
- all of the above
- primary routes of entry of harmful substances into the body are: The 6
- eyes, skin, ingestion and inhalation
- inhalation, absorption through the liver and kidneys, ingestion
 - skin absorption, ingestion, inhalation, injection
 - none of the above
- Which of the following are employer or worker responsibilities under the Chemical Hazard Regulation? 0.
- control of sources of contamination in excess of the occupational exposure limits A W
 - provide respiratory protective equipment participate in employee training
 - all of the above C C

Community Health /G.49

(Interim 1996)

- Which of the following methods of control is generally regarded to be the least desirable?
- ventilation
- chemical substitution
- personal protective equipment
- administrative controls C.C.
- Occupational Health Hazards are addressed by regulations. Which of the following hazards are not covered by OH&S regulations? 12.
- noise exposure A.B.
- exposure to radioactive materials
- amount of weight a worker can lift ن
 - toxic chemical exposure
- Employers must select their own specific standards to comply with regulations when: 13.
- there is an existing regulation standard
- equipment meeting the required external standard is no longer available B.
 - the regulation requires a level of performance to be met Ċ.
 - none of the above
- Which of the following is not an external industrial standards used in the General Safety Regulation? 4.
- ANSI (American National Standards Institute)
- NFPA (National Fire Protection Associations) DCBA.
 - SAE (Society of Automotive Engineers)
- UBC (United Brotherhood of Carpenters)
- Which of the following activities is not assigned by regulation to the employer? 15.
- providing equipment that is in safe condition A.
 - ensuring a worker uses equipment safely
- checking that no worker can be injured before a worker starts up machinery
- establishing a code of practice for respiratory protective equipment . D.C.
- Which of the following conditions would not require a workplace label on a decanting container? 16.
- when the decanting container is filled directly from the supplier labelled container
- when the decanting container is used by several different people in the work area DC.B.A.
 - when the material in the decanting container is used immediately
 - none of the above

- Which of the following sections in an MSDS would include data on the immediate and delayed hazardous effects of a chemical 17.
- the radioactivity data section
- the toxicological properties section
 - the preventative measures section
- D.C.B.A.
- the physical characteristics section
- Which of the following sections in an MSDS would include information on the appearance and odour of a chemical? 18
- the toxicological properties section
- the fire and explosion data section D.C.B.A.
 - the reactivity data section
- the physical characteristics section
- The Workers' Compensation Board is designed to: 19.
- provide no-fault accident insurance for employees
 - protect employers from injury-related law suits
- refer questions relative to workplace injuries to a board rather than to the courts A M U O
 - all of the above
- When a worker is injured on a workplace, which of the following forms must be completed by the injured worker? 20.
- **Employers Report of Accident**
- Employees Report of Accident E C C
 - Insurance Claim
- When a worker is injured in a workplace, which of the following forms must be completed by the employer? 21.
- Employers Report of Accident
- Employees Report of Accident
- Insurance Claim
- D.C.B.A.

without Ali. He thought that she should support his career and him. Ali was overtime. Ali was assigned shift work, and often had to work weekends and accounting firm as a probationary accountant. Ali worked hard to graduate Ali and Mike dated throughout high school and went to the same university important. Eventually, they broke their engagement. Later, both Mike and from her nursing program, and was hired by a small rural hospital to which up for him. They began to argue continually about which career was more hurt that Mike thought so little of her career that he expected her to give it wedding plans. However, they soon found that it was difficult to see each Mike graduated from the Faculty of business and was accepted in a large evenings. Mike became angry when he had to attend company functions completed their education. So they became engaged and were making she commuted. They had agreed that they would marry when they ad Ali married a person who was more supportive of the kind of life and other. Mike was often asked to work long days with a great deal of marriage that each of them wanted.

Which theory of marriage does this represent?

a) Homogamy b) Propinguity

- d) Role Compatibility Value Similarity
 - Propinguity
- even in a successful marriage, you should not expect everyone to be
- Which of the following statements is true? ∞:
- happy all the time
- it is easier to have a successful marriage if you have a positive selfesteem 9
- when you enter marriage, you must expect to make some adjustments in your lifestyle <u>်</u>
 - all of the above are true. 0
- Which of the following statements is true? 6
- The emotions of love and anger are closely related a (2)
- If you are willing to meet the other person halfway (comproraise) you In a good marriage, arguments are solved in a productive manner.
 - are doing your part in trying to make your marriage work.
 - All of the above are true.

- 10. Which of the following statements are true?
- Once a couple has had a serious quarrel, they will never be as happy as they were before.

13.

- The best procedure to follow when solving arguments in a marriage, is to have one person take over the decision making. <u>P</u>
 - relationship is a superficial one, without any real involvement of If a couple says that they "never fight', it may mean that their feelings between the spouses. 6
 - For younger couples, the best way to solve a conflict is to ask the parents to make the final decision. G
- 11. The TRUE statement about marriages listed below is:
- Because teens are more adaptable than older people, they should have a nigher success rate for marriage.
 - If you have siblings which you grew up with, it would enhance your chances of having a successful marriage because you have already learned to share resources. 6
- increase their chances of having a successful marriage because they will if the marriage partners come from different ethnic backgrounds, it will work that much harder to make it successful. (၁
 - Differences in social backgrounds should not cause serious problems for a couple getting married. _
- 12. When comparing arranged marriages and love marriages, we found that:
- the marriages that are successful have a surprising amount in common. parents really only influence the success of the arranged marriages.
 - the love marriages are much more successful than the arranged
- the most important valued attribute for an arranged marriage was personal wealth. marriages.

Ryan sometimes accuses her of flirting with other guys. "He must really care for me" she thought. Six months ago Lisa was late for a date with Ryan. He was very angry and started yelling at her. He grabbed her hair and slapped her in the face when she tried to explain. She was able to get away from him, crept into her house so her parents wouldn't see her dirly and bruised. Ryan apologized the next day, promised he would never hurt her again. Everything was okay for three or four months but now Ryan is slapping her around once or twice a week. Lisa has tried everything not to make Ryan angry but he seems to get worked up for no reason. She cover the bruises with make-up but her family and friends are suspicious. She his tried to break up with him but he cries and then threatens suicide. She is afraid he may seriously hurt her if she pushes for the end of the relationshif a) Who should Lisa talk to in this situation? Why?	Is this a healthy, unhealthy or abusive relationship? Give 4 reasons for your choice.	If you were Lisa's friend, what would you do?
--	---	---

Note: Use Tool CMH-SAW to assess student competency.

SCENARIO

Aaron and Lisa got married while they were both in their second year of university. They had gone together since grade eleven. At the end of their four years of university, Aaron is offered a teaching position in Alberta and Lisa is offered a job as a human resources executive for a large computer company in Toronto. Susan and Mink met at work. They dated for two years and felt they had a lot in common - both the same age, enjoyed the same sports and movies and both worked as from their honeymoon, Susan was reconciling her bank statement. Mink was surprised she had saved quite a bit of money. He suggested she transfer the funds into his software developers. Mink had been born in Vietnam but came to Canada at age three. Despite protests from both sides of their families, they married. On returning account as they would only need one account. When she disagreed with this decision he said that in his family, men were always in charge of finances.

marrieds. In late November, Alysha was dismayed when her mother-in-law called, reminding her of the traditional Christmas Day Ben's family followed. Alysha and Benjamin and Alysha graduated from university, married in July and found jobs in their home city. They were enjoying their new roles as wage earners and newly-Ben were expected to be there. Alysha has assumed that she and Ben would spend the Christmas season celebrating with her family and sharing in her family's traditions.

even more upsetting for Marge. She was expecting twins and, because of her family's medical history, was considered a high risk pregnancy. The doctor advised her to Marge and Jan had been married for two years. Both had saved diligently and now they had purchased their first home. Because they wanted a newer home, they had both a first and second mortgage. Money was tight, but they were committed to having the second mortgage paid off before they started a family. Three months after they moved into their home Marge felt unwell. She was shocked when the doctor told her that she was pregnant. He sent her for an ultrasound and the news became quit work immediately.

COMMENTS

STANDARD

Students working at standard must demonstrate the technique/skill requirements outlined in the checklists below. The rating scale on the right-hand side defines the levels of competencies and should be applied when assessing student performance. The standard performance rating is 2 on all techniques/skills.

STANDARD IS 2 FOR EACH TECHNIQUE/SKILL

Rating Scale

The student:

4	demonstrates initiative that exceeds required techniques/skills.
3	consistently demonstrates all designated techniques/skills, rarely needs prompting.
2	demonstrates all designated techniques/skills, occasionally needs prompting.
1	demonstrates most designated techniques/skills, frequently needs prompting.
0	does not demonstrate designated techniques/skills.

CMH208-3

Note: Use Tool CMHSAW to assess student competency.

SCENARIO

Eight year old Kyle, who has asthma, is playing soccer with his friends on a field close to home. Suddenly he falls and cuts his arm on a rusty piece of metal. The arm has abrasions and cuts. A piece of the rusty metal is embedded in his arm. Kyle begins to wheeze and is having more and more difficulty breathing. You hear a scuffle outside your apartment door. You peek through the door and see a man with numerous chest wounds. You call 911 for help; ensure your safety and go to assist him. He is short of breath, cyanotic and perspiring profusely. You can see blood-stained bubbles coming from one of the wounds.

PATHOLOGY

- Mr. A, age 61, has a history of myocardial infarction and ischemic heart disease. He now complains of dizziness, and his pulse rate is found to be 40, an abnormality called:
- sinus arrhythmia
 - bradycardia
- tachycardia 0
- premature beats
- Further testing indicated that there was damage to the conduction system of Mr. A's heart. He was scheduled to have surgery in which a device would be inserted to help regulate the heartbeat. This device is called a(n): 7
- artificial pacemaker
 - valve replacement
- coronary bypass
 - heart transplant
- known as angina pectoris. He was hospitalized for a procedure in which a catheter with a balloon is used to open up narrow vessels in the heart. This procedure is Mr. P, age 52, had been having episodes of pain in the chest and left shoulder called: 3
- valve replacement
- coronary bypass surgery
 - heart transplant
 - angioplasty
- A circulatory pathway that carries blood to a second capillary bed before it returns to the heart is a(n):
 - portal system
 - venous sinus
- superficial vein
 - anastomoses
- The thick muscular layer in the heart wall is called the:
 - endocardium
 - pericardium
 - septum
- myocardium

Supplying nutrients to body tissues and carrying off waste products from the tissues are functions of the part of the circulation described as: 9

- pulmonary <u>e</u>
- cellular respiration
 - diffusion
- systemic (=
- The only blood vessels containing valves are the
 - arteries (E)
- veins \odot
- capillaries
- arterioles
- pacemaker of the heart is located in the upper right atrium and is called the: ∞i
- atrioventricular node bundle of HIS
 - sinoatrial node
 - (a)=
- tricuspid valve
- Mr. L was 42 years of age and overweight. During a game of handball he felt severe heart pain; he collapsed in shock. Examination indicated that a clot had formed in a blood vessel supplying the heart, with complete obstruction of blood flow. The scientific name for this disorder is: 6
- coronary occlusion
 - angina pectoris
- myocardial infarct 0
- cerebrovascular accident

ASK CHECKLIST		
The student;	Collaboration and Teamwork Shares work appropriately among group	ork ly among group
accurately describes an issue related to cardiovascular health on which people disagree, explaining areas of disagreement poses one or more thoughtful questions regarding the issue accesses a range of relevant information sources categorizes different points of view regarding the issue: e.g., cultural, ethical, economic, environmental, health-related, scientific, political states a position on the issue and logical reasons for adopting that position states two or more opposing positions on the issue and logical reasons for adopting each position describes interrelationships among different perspectives/points of view determines accuracy/currency/reliability of information and ideas	respects and considers the views of others negotiates solutions to the health-related issue Evaluating Choices/Making Decisions dentifies important and appropriate alternatives regarding the issue cstablishes knowledge- and value-based criteria for assessing each alternative selects an appropriate alternative by showing differences among choices assesses strengths/weaknesses of decisions by considering consequences communicates ideas in logical sequence to justify choices/decisions made	g Decisions appropriate alternatives and value-based criteria ative ternative by showing es tesses of decisions by es ogical sequence to made
COMMENTS		

- Muscles are attaclied to bone by
- ligaments cartilage

 - tendons joints
- A muscle contraction that increases the tension in muscles without producing movement is called:
- isotonic
 - tetanus
- treppe 0

isometric

- The movement of a skeletal muscle that makes the angle at the joint smaller is called abduction

 - flexion (2)
- extension adduction ට ට
- Inflammation of a fluid-filled sac near a bone is called:
 - tendinitis
 - bursitis
- carpal tunnel syndrome ၁
 - myositis
- Read this case statement and answer the following question:

I misjudged the speed of the train, and the train crashed into the car. All occupants Driver J and his two companions tried to race an oncoming train to an intersection. of the car received multiple injuries.

Driver J was thrown against the steering wheel, which punctured his chest. This puncture involved the muscles between the ribs called the:

- diaphragm
- intercostal muscles (A)
 - sacrospinalis
- external abdominal oblique

a) cartilage

Infant bones are softer and more flexible because they are composed largely of

- - calcium
- marrow
- periosteum
- The purpose of discs between vertebrae is to:
- provide strength and support
- link the vertebral column together
- provide flexibility and absorb shocks (3)
 - protect the spinal cord
- The large hole in the centre of each vertebrae is called the: ∞.
- foramen (a)

spine or spinous process

- body ၁
- spinal cord
- An injury resulting in rupturing or tearing of the ligaments is called a: 6
 - dislocation
- simple fracture 9
 - c) sprain
- greenstick fracture
- 10. An infection of bone caused by pus-producing bacteria is called
- osteoporosis
 - rickets
- c) osteomyelitis
- d) lordosis

SCENARIOS

Gail is playing racketball when she suddenly has a coughing spell and then falls to the ground unconscious.

PE 20 class is practicing golf at a driving range. Leah accidentally walks behind Darcy just as he is taking a backswing and accidentally hits Leah. She is conscious but has a lot of bleeding near her left eye. Joe is playing on the school football team. During a game, he is hit hard from behind. He loses consciousness for 2 minutes, has a bleeding scalp wound and complains of tingling in his feet.

In a soccer game, Kathy rolls her ankle laterally. She complains of a large amount of pain, has restricted range of motion, considerable bruising and swelling and some deformity.

Jack is running with a friend when he complains of muscle cramps, headache, nausea and vomiting. His behaviour is irrational and his skin is cold and clammy.

- The primary responsibility of the Athletic First
 - Aider is to:
 - provide first aid
- treat recurrent sports injuries nutritional guidance
- complete physical examinations for athletes
- would be necessary on a Athletes Medical Form: Which of the following pieces of information
- medications
 - allergies
- contact lenses
- all of the above (0)
- should receive physician approval to exercise An athlete who is taking prescribed drugs: (k
- can become seriously ill after intense exercise is not allowed to compete in team events
- can exercise without any restrictions
- Weight Control
- has no bearing on injury prevention
- places less stress on the musculoskeletal should never be practiced by an athlete
- will reduce physical ability
- The use of alcohol can predispose an athlete to injury because:
- it slows thinking and response time it increases heart rate
- it can cause shock symptoms
 - it speeds up reaction time
- Goalie pads protect by: 9
- dispersing the force a)
- supporting the joints deflecting the force
 - absorbing the force (P)

List three possible hazards that can make an environment unsafe.

7.

- Muscles fatigue quickly and stop contracting ∞
- there is an over-accumulation of carbon dioxide
- there is an over-accumulation of lactic acid the athlete has been involved in aerobic (2) ၁
- exercise for an excessive length of time the athlete ate before the competition Ŧ
- Which statement is true: 6
- sprinters only need to develop aerobic power
 - anaerobic power would be essential for gymnastics
- acrobic and anaerobic power is necessary for any well-trained athlete ं
- aerobic power is exercise provided without the benefit of oxygen
- Strength is defined as:
- the number of times a muscle can contract amount of force a muscle can exert
- how long a muscle can remain contracted ට ට
 - how quickly a muscle recovers after contraction
- The range of motion that a joint can move through is referred to as:
- hyper-mobility a 🕤
- hyper-extension
- muscular strength
 - flexibility

- Which fact is true? 2
- nerve impulse travels faster through cold lissuc
- warming up will reduce resistance to stretch stretching exercises are performed before
- warming up exercises decrease cardiac output warming up exercises
- Which of the following is not a good hygiene
 - practice?
 - a) I the use of common water bottles
- the use of footwear during showers
- proper disinfection of equipment exposed to body fluids
- covering all open wounds during competition
- Injuries that heal but leave the body structures weakened or stretched are classified as: 4.
- acute
- recurrent chronic (a) \odot
- infectious
- loss of function can indicate a fracture or a Which statement is incorrect: 15.
- a broken bone that penetrates through the skin is called a compound fracture 9
 - apply ice to a closed fracture
 - sprains are less serious than fractures and do not require a medical referral (a)
- A muscle strain: 9
- results from a blow to the muscle
- occurs when muscle fibres are torn
- should initially be treated with heat until the swelling stops
 - occurs when a joint is moved beyond its normal range of motion

Community Health /G.79

Interim 1996)

If a joint is dislocated:

- gently place the joint in its normal position splint and treat as a fracture
- gently encourage the athlete to move the joint to prevent stiffening
 - refer to a physician only if there is severe bruising, pain, swelling and instability. P
- The first aid for any suspected injury to the central nervous system would include: <u>8</u>
 - remove the athlete from the playing field a)
 - remove the athlete only after applying a cervical collar 9
- place the athlete on a stretcher before moving him/her
- complete immobilization until the athlete is examined by medical personnel
- R.I.C.E means:
- rest, ice, compression, elevation
- rehabilitation, immobilize, cold, exercise rest, immobilize, cold, exercise
 - rest, ice, comfort, elevate
- The suggested regimen for R.I.C.E includes all but one of the following activities:
 - apply ice for 20 minutes out of every half apply ice directly to the injured area hour for the first 48 hours (E)
- use compression at all times except when sleeping (C)
- elevate the injured part above the level of the P
- 21. List four pieces of information you must have for an Emergency Action Plan

- A.B.C.C. means: 22.
- place the athlete on his/her back before conducting an assessment

In order to assess an athlete's breathing:

23.

- remove the helmet so that you can assess properly
- look, listen and feel to determine air exchange give two breaths to see if the chest rises (0)
 - 9
- Control of severe bleeding includes: 24.
- elevate the athlete's head and shoulders above the injury
 - use a tourniquet if bleeding cannot be stopped direct pressure to the injury (a)
- direct pressure to the site below the injury ତ ଚ
- only occurs if an injury is severe a)
- is treated with cold packs to the forehead is treated by keeping the athlete warm 3
- is easily recognized because the athlete will appear flushed and hot
- 26. Loss of recent memory, headache, nausea, mental confusion and disturbances in vision would be indications of:
- abdominal injury
- severe blood loss
 - c) shock
- 27. Which of the following activities could result in an infection?
- covering blisters as they form
- washing abrasions with soap and water 9
 - covering minor abrasions with a sterile bandage <u>ပ</u>
- applying ointments or creams to lacerations (0)

- Temporary paralysis (spasm) of the diaphragm: can be relieved by laying flat
- usually subsides with rest and reassurance
 - is relieved by taking short, fast breaths requires immediate rescue breathing 2(p)
- Which of the following required referral to medical personnel?

a contusion to the area around the mouth

- small foreign objects in the eye that can be blurred or double vision P
- minor bleeding in the eye with the absence of other symptoms

flushed out

- 30. If a tooth is knocked out and player is unconscious: clean the tooth with hydrogen peroxide wrap the tooth in a saline soaked gauze (E)
- apply heat to encourage clot formation in the attempt to replace the tooth socket (C)
- 31. Heat exhaustion can be prevented by:
- adequate hydration before and during exercise the use of salt tablets before exercising (3)
 - practicing in the early morning or later in the avoid heavy exercise in humid weather evening C
- Factors that increase the risk of hypothermia include: 32.
- a) wet clothing
- tight fitting clothes 9
 - use of alcohol
- all of the above

SCENARIO

Kelsey and Thomas, twins, enjoy playing with their lego. They do not, however, enjoy picking it up and putting it away when they are finished.

Melissa, a fourteen year old grade 8 student, has been asked to go to a rock concert by Jordan, an eighteen year old grade twelve student. Melissa's parents have some concerns. Jennifer's mother, who is a single working parent, would like Jennifer to prepare dinner twice during the week on the evenings she has to work late. In addition to this, Jennifer is expected to help with the dishes and to keep her room tidy. Jennifer claims that too much is expected of her, and refuses to accept responsibility for these "chores".

Community Health /G.89 (Interim 1996)

- As they age, some people feel that life no longer has meaning for them. This emotional change may be caused by several things for the aging individual; name three.
- John and Judy have lived for thirty years in a large bungalow on an acreage. They are finding the upkeep of the home too demanding and have decided to look into other housing. What choices may they consider? 7

over-55 housing development seniors apartments condominium

these injuries occur in the home. Name four things that could be done to leading cause of death among those 65 years of age and older. Many of The National Safety Council reports that preventable injuries are the 6th make the home safer for older people. 3

modifying for wheelchair accessibility if needed clear traffic areas of extraneous furniture good lighting on sidewalks and stairwells skid-resistant rugs and bath mats

socially and emotionally. Give two changes that may occur in each of the Aging affects people in many ways. Changes occur physically, mentally, three areas. 4

body weakens physical:

- bones may break more easily
- muscle tone and abilities decrease
 - memory loss may occur mental:
- often increased logic and understanding gender roles become more similar

social:

- friendships may become more important
- may become depressed and discouraged easily
 - strong sense of loss when loved one dies

- Two theories explain how the lives of older adults change as they age Name and explain both theories
- Activity Theory:
- "use it or lose it"
- stay busy as long as possible
 - Disengagement Theory: **P**
- withdrawal from others and activity.
- Which of the following senses is the first to deteriorate as we age? 9
 - sight
 - hearing (3)
- taste
- touch C
- Which of the following statements is FALSE?
- most elderly people need to reduce their calorie intake
- older people should not exercise because they tire easily the bones of elderly people change in composition 9
- older people have wrinkles because their skin loses its elasticity (3)
- Which of the following statements is not true of menopause? ∞
 - inability to have sex
- psychological and emotional changes 9
 - hot flashes O O
- irregular hormone production
- At what age does the body begin to age? 6
- 8 0 E B
- 25 30 35

SCENARIO

Karna's grandfather has become very depressed. He's stopped taking care of himself and is often unshaven, unbathed, and wearing dirty clothing. He mutters that all of his friends have died and there is no one who needs him or is interested in him anymore. He has begun drinking heavily,

Alex's grandfather often does not respond when Alex asks a question of him. He often will sit there and nod. He complains that nobody wants to talk to him anymore. Alex's grandmother says that her husband needs a hearing aid but that he refuses to even visit a hearing specialist.

Two couples, the Smiths and the Joneses, were friends for thirty years. They took holidays together, enjoyed square dancing and played bridge at least once a week. Mr. Smith, while square dancing, had a heart attack and died. The Joneses are devastated at the loss of a close friend, but have resolved to move on. However, the relationship with Mrs. Smith is now very uncomfortable and everyone is unsure of how to deal with it. Mary comes into her mother's home and finds the kitchen filled with smoke. Her mother, aged 75, is rocking quietly in front of the television, unaware that the tea kettle had boiled dry. This is the fourth or fifth time that Mary has found such an incident while visiting. Two weeks later, the community health nurse meets with Mary and family to discuss alternative services. Mary's mother is furious with them and has vowed to never forgive them.

their grandparents when and if he became a father. Now Shawn's parents are retired and are enjoying the "golden years". They are actively involved with their friends, travel extensively and volunteer at their local church. Shawn would like them to spend time with his sons. However, when he calls his parents, they have often already Shawn, the youngest of four children, always enjoyed a special relationship with his parents. He assumed that his children would discover the wonderful qualities of made plans. Shawn accuses his parents of not caring for his children and is resentful of their carefree lifestyle.

- The purpose of fontanelles is:
- to allow the skull boncs to overlap during childbirth

SCENARIO

Susan is a Grade 12 student who is very athletic. When she visited the doctor for her pre-basketball physical examination, she found out she was pregnant.

Nazima is a 23 year old Muslim woman. This is her first pregnancy. She moved to Westlock from Pakistan 7 months ago to marry her husband Salim. The marriage was arranged by the families and the young couple seem to be happy in their new home. They observe traditional religious practises. The observation of Ramadan begins in two weeks. Gail is a young married woman who has just learned that she is expecting her third child. She describes herself as a "light smoker (15 cigarettes a day) and a moderate drinker in social situations". Her other two children are healthy. Her husband Dan works on oil rigs and is home every three weeks.

DAY CARE ASSESSMENT TOOL

Students working at or above standard must complete the appropriate exercise and Learning Records from the 1995 Self Study Orientation Course for Day Care Staff. Note: Teachers may use alternative activities to develop and access competencies. The rating scale outlines a continuum of learning by describing behaviours associated with each level of performance. A minimum level of performance has been established. Students are expected to meet or exceed this level of performance. STANDARD:

COMMENTS

Note: Use Tool CMH-SAW to assess student competency.

SCENARIO

Your friend Susan has diabetes. She has explained her condition to you including her daily insulin treatments and her carefully regulated diet. During physical education class you notice that Susan is becoming weak and disoriented.

You have asked several friends to your home to a pizza party. Everyone is sitting around talking, laughing and listening to your latest CD when Jason falls to the floor in an epileptic seizure.

1	meets defined outcomes. Follows a guided plan of action. A limited range of tools, materials and/or processes are used appropriately. Quality and productivity are reasonably consistent. Works cooperatively.
0	has not completed defined outcomes. Tools, materials and/or processes are used inappropriately.

TASK CHECKLIST

The student:

Management

prepares self for task

- · organizes and works in an orderly manner
- interprets and carries out instructions accurately
 - plans and uses time effectively in a · displays leadership in adhering to logical sequence
- attempts to solve problems prior to routine procedures requesting help

Teamwork

- cooperates with group members
- shares work appropriately among group members
- negotiates with sensitivity solutions to problems
 - displays effective communication

Use of Equipment and Materials

- · independently selects and uses demonstrates concern for safe equipment/materials
- practises proper sanitation procedures minimizes waste of materials procedures/techniques
 - · anticipates potential hazards and emergency response

- assists with the maintenance and repair of equipment
- · inventories and restocks first aid kit · assists in the maintenance of the training facility
- assists in promoting safe behaviour of the athlete
 - assists in warn-up activities
- assists in cool-down activities

COMMUNITY HEALTH

SECTION H: LINKAGES/TRANSITIONS

(INTERIM)

TABLE OF CONTENTS

This section of the GSI has been designed to provide an overview of linkages and transitions of CTS modules with a number of organizations. The charts and information presented in this section will assist CTS students and teachers in understanding the potential application of CTS modules as students move into the workplace.

With Other CTS Strands	H.2
TRANSITIONS	
To the Workplace	H.3
To Related Post-secondary Programs	H.3

Specific Related Occupations	
Community Health: Related Occupations	
Community Health: Summary of Related Post-secondary Programs	H.14
Credentialling Opportunities in Community Health	H.18

LINKAGES/TRANSITIONS

LINKAGES

With Other CTS Strands

Community Health complements modules from a number of other stands, e.g., Agriculture, Cosmetology, Energy and Mines, Fashion Studies, Financial Management, Foods, Forestry, Legal Studies and Wildlife.

Specific examples of these linkages are as follows:

Strand	Module	Linkage
Foods	Nutrition and Athlete Performance	Can be offered in conjunction with a Sports Medicine program.
	Food Basics	Knowledge and skills can be applied when preparing food for children or seniors.
	Nutrition and Digestion	Can be offered in conjunction with Digestion/Elimination.
Financial Management	Introduction to Financial Management	To apply financial management to daily living skills.
Career Transitions	Project modules	Provide opportunity and direction for students involved in projects beyond the expectations of a given Community Health module.
	Practicum modules	Provides opportunity for students to spend time developing the skills required for certification.

CSB: 96 06 07

Fashion Studies	Sewing for Others	Can be offered for designing and constructing clothing for children, seniors or challenged individuals.
Enterprise and Innovation	Planning a Venture	A comprehensive school health project.
Legal Studies	Family Law	Used in conjunction with dating, marriage and family studies.
Agriculture Energy & Mines Forestry Wildlife	First Aid/CPR	To ensure students have the knowledge and skills to handle emergency situations in these areas.

A sample junior high integrated home economics course is provided in chart form in this section. Other more general linkages apply to Communication Technology, Design Studies, Information Processing, and Management and Marketing. Charts outlining these linkages are provided in this section (see "Community Health: Connections with Other CTS Strands", page H.4, and Community Health: Scope and Sequence: Integrating Sports Medicine into Community Health", page H.5).

Project modules from the Career Transition strand may be combined with modules from the Community Health strand to provided increased opportunity for students to develop expertise and refine their competencies.

For example:

- practical activities in a community care facility
- acting as a trainer for school or community sports teams
- special interest projects, e.g., women's health issues
- volunteering for community activities to assist seniors or children.

Practicum modules available in Career Transitions provide the time for students to develop the competencies necessary for credentialling from an outside agency.

For example, Level I Certification for Day Care Workers requires the student accesses 2 practicum modules to provide the necessary "hands-on" experiences in a day care setting.

With Other Secondary Programs

For learning to be authentic, it is important to integrate the core and complementary areas of Community Health. Awareness of context of different curricula promotes relevance and reinforces core and complementary concepts.

Examples of linkages between core programs include:

Subject	Linkage
Language Arts	Technical report writing, task analysis, event scheduling and oral and multi-media presentations
Mathematics	Measurement, calculation of linear area and volume measurements, use of fractions, ratios, geometry and trigonometry.
Social Studies	Economics, impact of technology on society, resource development and industrial relationships.
Science	See chart on in this section.

The Community Health stand has many links with the junior and senior high science, health, home economics, sports medicine and CALM programs, and provides opportunities for students to extend and apply knowledge and skills in practical ways (see "Community Health: Connections Across the Curriculum", page H.6).

For example, CALM and Community Health have several common linkages. In Community Health the students will have an opportunity to reinforce, extent and apply a number of knowledge and/or skills components studied in CALM. Collaborative planning between Community Health and CALM instructors will result in

relevant learning experiences for the students. Charts outlining these linkages are provided in this section (see "Community Health: Linkages with Career and Life Management", page H.7).

Community Health and secondary science programs have several common linkages. All life science courses include basic concepts, e.g., aseptic techniques, cleaning and maintaining equipment, handling chemicals, safety procedures, Community Health reinforces scientific knowledge and skills by applying fundamental concepts into personal well being, community support resources and care of special conditions. Academic high school science programs are designed to make strong connections in science. technology and society. There are many opportunities where teamwork developed at the local level will provide bridges to the Community Health program (see "Community Health: Linkages with Science", page H.8).

Integrating Foods, Fashion Studies and Community Health

Sample: Junior High CTS Course (Home Economics)

(Home Economics)		
Grade 7	Grade 8	Grade 9
Food Basics (1/2)	Food Basics (1/2)	Simple Snacks and Appetizers (1)
Caring for Children (1)	Child development (1/2)	Family Dynamics (1/2)
Ready-Set-Sew (1/2)	Ready-Set-Sew (1/2)	Family Dynamics (1/2)

Junior High Health and Community Health Linkages

Limages		
	Community Health	
Theme I Self Awareness and Acceptance a) self b) feelings c) decision making.	Community Health complements this theme by encouraging personal responsibility for promotion and maintaining a healthy lifestyle. Decision making is used extensively throughout the strand.	

Theme II Relating to Others a) peers b) school c) family.	Community Health expands and reinforces the study of family. Cooperative planning will insure meaningful learning experiences for the students.
Theme III Life Careers a) career awareness and preparation b) career planning.	Career planning and preparation is integrated throughout Community Health in career-specific areas rather than long-term career planning.
Theme IV a) body systems b) nutrition c) physical fitness d) safety and emergency procedures e) personal wellness f) cleanliness g) drug use and abuse.	Community Health builds on the concepts learned to access the care required for special conditions of each system and learn procedures necessary in emergency situations.

Elementary Linkages

The development of concepts related to Community Health can begin as early as ECS by instilling in the student a personal responsibility to promote and maintain healthy lifestyles.

With Practical Arts Courses

Modules in the Community Health strand replace existing content in senior and junior high curriculum. A detailed correlation of the Community Health strand to these practical arts courses can be found in this section (see "Community Health: Correlations with Practical Arts", pages H.9–10).

TRANSITIONS

To the Workplace

CSB: 96 06 07

Intermediate and advanced modules are designed to develop knowledge, skills and attitudes that provide transitions to occupations in community health areas. Some career sectors welcome individuals who have basic skills and are prepared

to learn through further training from the employer (see "Community Health: Module Relationships to Specific Related Occupations", page H.11).

Information from the National Occupational Classification (NOC) regarding occupations in related areas that can be accessed upon completion of high school is provided in this section (see "Community Health: Related Occupations", pages H.12–13).

To Related Post-secondary Programs

Advanced level modules will assist students to make plans regarding further studies in Community Health at post-secondary levels. The Community Health modules provide desirable background and skills for entry into related programs at public and private colleges, technical institutes, universities and vocational colleges in Alberta.

An outline for post-secondary institutions in Alberta currently offering programs in family- and health-related areas is provided in this section (see "Community Health: Summary of Related Post-secondary Programs", pages H.14–17).

CREDENTIALLING

Students may earn credentials recognized in the workplace and/or post-secondary institutions by demonstrating specified competencies within the CTS curriculum. The Community Health strand provides opportunities for students to develop competencies consistent with:

- St. John Ambulance and Canadian Red Cross
- Alberta Sports Medicine Council
- Alberta Family and Social Services

Further information regarding credentials, requirements and contacts is provided in this section (see "Credentialling Opportunities in Community Health", pages H.18-19).

CPR Level C (12 hours)	Canadian Red Cross St. John Ambulance			CPR Instructors	Nationally recognized certification "Basic Rescuer" includes airway management and CPR for adults, child, infants and 2-rescuer adult CPR

COMMUNITY HEALTH

SECTION I: LEARNING RESOURCE GUIDE

(INTERIM)

TABLE OF CONTENTS

This section of the GSI has been designed to provide a list of resources that support student learning. Three different types of resources are identified:

- Authorized: Resources authorized by Alberta Education for CTS curriculum; these resources are categorized as basic, support, or teaching
- Other: Titles provided as a service to assist local jurisdictions to identify resources that contain potentially useful ideas for teachers. Alberta Education has done a preliminary review of these resources, but further review will be necessary for use in school jurisdictions
- Additional: A list of local and provincial sources of information available to teachers, including the community, government agencies, resource centres and organizations.

INTRODUCTION

CTS AND THE RESOURCE-BASED CLASSROOM

Career and Technology Studies (CTS) encourages teachers to establish a resource-based classroom, where a variety of appropriate, up-to-date print and non-print resources are available. Learning resources identified for CTS strands include print, software, interactive videos, manipulatives, student learning guides and tutorials.

The resource-based classroom approach accommodates a variety of instructional strategies and teaching styles, and supports individual or small group planning. It provides students with opportunities to interact with a wide range of information sources in a variety of learning situations. Students in CTS are encouraged to take an active role in managing their own learning. Ready access to a strong resource base enables students to learn to screen and use information appropriately, to solve problems, to meet specific classroom and learning needs, and to develop competency in reading, writing, speaking, listening and viewing.

PURPOSE AND ORGANIZATION OF THIS DOCUMENT

The purpose of this document is to help teachers identify a variety of resources to meet their needs and those of the students taking the new Community Health curriculum. It is hoped that this practical guide to resources will help teachers develop a useful, accessible resource centre that will encourage students to become independent, creative thinkers.

This document is organized as follows:

- Authorized Resources:
 - basic learning resources
 - support learning resources
 - teaching resources
- Other Resources
- Additional Sources.

Some resources in the guide have been authorized for use in some or all of the CTS strands, e.g., the 11 video Career and Technology Studies series produced by ACCESS: The Education Station. Full information is provided in the appropriate section of this resource guide.

Each resource in the guide provides bibliographic information, an annotation where appropriate, and a correlation to the Community Health modules. The distributor code for each entry will facilitate ordering resources. It is recommended that teachers preview all resources before purchasing, or purchase one copy for their reference and additional copies as required.

HOW TO ORDER

Most authorized resources are available from the Learning Resources Distributing Centre (LRDC) at:

12360 – 142 Street Edmonton, AB T5L 4X9

Telephone: (403) 427–2767 Fax: (403) 422–9750

Please check LRDC for availability of videos.

The section on Additional Sources lists a variety of other places to find information related to this strand. In addition, at the back of this document is a Distributor Directory, which contains the name and address of each publisher/distributor referred to in the resource list. Note that in some cases a resource may be published by one company but distributed through another.

The information contained is as complete and accurate as possible.

RESOURCE POLICY

For further information on resource policy and definitions, refer to the *Student Learning Resources Policy* and *Teaching Resources Policy* or contact:

AUTHORIZED RESOURCES

BASIC LEARNING RESOURCES

The following basic learning resources have been authorized by Alberta Education for use in the Community Health curriculum. These resources address the majority of the learner expectations in one or more modules and/or levels. A curriculum correlation appears in the right-hand column.

Distributor	Resources	Leve	l/Modul	e No.
Code		1	2	3
CRC	Babysitter's Manual. Canadian Red Cross Society, 1995. Student Manual. This is the required manual to complete the Canadian Red Cross babysitting certification course. The facilitator's guide has been prepared to help teach the Canadian Red Cross Babysitter's Course. It is a direct supplement to the babysitting manual used by participants in the course. The goal is to help students learn child care, emergency prevention and basic first aid skills.	104		
LRDC	Developing Child, The. Alfred Couch & Mendiola Glossan, 1994. Student Textbook.	104 105	205	301 302
	This textbook traces the stages of children's development from birth to six years of age, promoting positive guidance and interactions. It addresses critical thinking skills and co-operative learning. An excellent resource for students studying child care, parenting and family issues modules. The teacher's wraparound edition is an excellent resource for teachers in child development related areas, parenting and family issues. Teaching strategies in this wraparound edition are a valuable asset. A student workbook teacher's annotated edition is available.			303 304 305
	This resource addresses topics that may be sensitive in some Alberta communities. Prior to the start of human sexuality instruction, parents must be advised of their right to exempt their child from this component of a module/course.			
CRC	Emergency Child Care Supplement. Canadian Red Cross Society, 1994.			312
	Used with the Vital Link manual to complete the ECC certification. The Emergency Child Care for Child Care Workers Instructor's Guide and Reference includes all concepts considered by Alberta Social services to be important in training persons caring for children, to meet medical emergencies. The content is very applicable to parents, nannies, babysitters, teachers or anyone interested in child-related first-aid. Infant/Child CPR is included.			

CSB: 96 06 07

Basic Learning Resources (continued)

Code		1	2	3
LRDC	Families Today. Connie R. Sasse. Glencoe Macmillan/McGraw-Hill, 1994. Student Textbook.	101	201 202	301 302
	A comprehensive textbook covering all aspects of family, adolescents, dating and marriage, parenting and aging. A colourful user friendly format with many activities including chapter reviews to stimulate learning. The teacher wraparound edition includes a multitude of effective teaching strategies. A student workbook teacher's annotated edition is available.			303
	This resource addresses topics that may be sensitive in some Alberta communities. Prior to the start of human sexuality instruction, parents must be advised of their right to exempt their child from this component of a module/course.	ì		
SJA	First Aid in Child Care. St. John Ambulance. Canadian Cataloguing in Publication Data, 1993. Course Supplement.			312
	The activity book required to complete First Aid in Child Care certification course. Introduction to priority action approach, handling emergency situations, body systems and emergency medical systems. An instructor's guide is available.			
CRC	First Aid: The Vital Link. The Canadian Red Cross Society. Mosby Lifeline, 1994. Student Manual.	CTR 121	212 213	312 313
	This manual is required for the Red Cross Standard and Emergency First Aid Courses. The instructor's manual is required for teaching the Canadian Red Cross first aid and CPR courses. The coloured transparencies are an excellent aid to teaching the components of this course.			
SJA	First Aid: First on the Scene. St. John Ambulance. Canadian Cataloguing in Publication Data, 1994. Emergency Level Activity Book.	CTR 121		
	The activity book requires to complete Emergency First Aid and CPR certification courses. An instructor's guide is available.			,
	Teachers presenting this course should be aware of the "Emergency Medical Aid Act" governing first aid procedures in Alberta. In advance to presenting this course, students and then parents should be aware that emergency scenarios may be sensitive to some and that resources include descriptions of emergency child birth whether or not this section is selected for study. Teachers can adapt their presentation of this course material to include modifications for first aider or casuality with a disability.

MMGC	Hearing Disorders. Medicine Demystified Series. MultiMedia Group of Canada;, 1988–1994. Video Cassette. This video gives a brief description of the anatomy and physiology of the ear. It features a number of issues concerning hearing conditions throughout the life cycle.		207	309

Distributor	Resources	Leve	l/Modul	e No.
Code		1	2	3
LRDC	How It Works Series. Ziff Davis Press; Copp Clark Longman Ltd., 1995. Print.	105 106	206 208	303 304
	The How It Works Series are: How Your Body Works, How Your Baby is Born, How Your Immune System Works, How Nutrition Works, How Your Brain Works, How Your Heart Works.		209 210	308
	A very colourful, easy to read resource (self-contained layouts and full colour graphics) to enhance teaching of the body systems and related health issues. How Your Baby is Born - teachers should preview before using with students.			
MLC	How The Body Ages. (Growing Old in a New Age.) CPB Annenburg, Magic Lantern Communication Ltd., 1993. Video Cassette.			303 306
	This video describes the physiological changes that occur with aging, e.g., appearance, strength, resistance to disease. It discusses environmental and programmed theories and reviews directions for future research.			
LRDC	Human Anatomy and Physiology. Paul Anderson. Jones and Bartlett Publishers, 1990. Colouring Workbook and Study Guide.		208 209 210	304 308 309
	This workbook is suitable for use with all leading human anatomy and physiology texts. It includes over sixty colouring exercises, excellent anatomical art work and hundreds of exercises including multiple choice, true false and matching.			П
	Resource provides a technical overview of human anatomy and physiology, including the reproductive system.			
LRDC	Human Body in Health and Disease, The. (7th Edition.) Memler, Cohen, Wood. J.B. Lippencott Co., 1992. Workbook.			
	See Basic Learning Resources for annotation and module correlation.			
CLC	I'm Pretty Old. Terra Nova Films Inc., Canadian Learning Company, Inc., 1993. Video Cassette.	106	206	303 306
	A video made up of the reflections and comments of several older residents in a long-term care facility talking about what it is like to them to give up a certain amount of independence as they experience increased physical frailty. This video is an excellent resource for professionals and para-professionals who work with residents in a long term care facilities.			

Distributor	Resources	Level/Module No.		
Code		1	2	3
CLC	I Work With A Guy Who's Deaf and Blind. Canadian Learning Company, Inc., 1992. Video Cassette.		207	307 311
	The video shows the successful integration of a severely disabled employee into the work force, the program illustrates the value to both the individuals involved and the corporation of valuing diversity and creating an environment which supports and encourages everyone's efforts to work as a team.			
VEC	Labour and Delivery for Teens. Churchill Media, Visual Education Centre, 1993. Video Cassette.			302 304
	This video follows two teen through their labour and delivery. Detailed animation illustrates the physiology of labour and birth. The importance of staying in school and prenatal care are stressed.			
MLC	Lily: Time To Grow Series. Atschull Corporation, Magic Lantern Communication Ltd., 1993. Video Cassettes.	104 105	205	302 304
	Series of 5 video cassettes: Discipline: What Lily Learned; First Two Years: What Lily Learned; Health During Pregnancy: Lily Looked Back; Toddler Safety: What Lily Learned; Years Three Through Five: What Lily Learned.			305
	Lily, a young mother, narrates the Lily series. The growth and development of a young child from birth through five years are documented including feeding, checking for signs of illness, learning from play, teaching discipline and preparing for school. Toddler safety is discussed as well as health during pregnancy.			
MLC	Maximizing Physical Potential of Older Adults. (Growing Old in New Age Series), Magic Lantern Communications Ltd., 1993. Video Cassette.	106	206	303 306
	Part of a 13-part television course documenting the physiological and social aspects of aging. Elders discussion complemented by experts.			
MLC	My Dad Can't Be Crazy Can He? Learning Corporation, Magic Lantern Communication Ltd., 1990., Video Cassette.			301 310
	This video examines the seriousness and scope of mental illness in society today. It takes a dramatic look at a family's struggle to come to terms with the father's schizophrenia, their denial to themselves and others and excusing unstable behaviour before seeking medical help. A sensitive issue covered in a manner that will capture student's interest.			
MLC	Myths and Realities of Aging. (Growing Old in New Age Series), CPB-Annenburg, Magic Lantern Communication Ltd., 1993. Video Cassette.	106	206	303
	This video relates the myths and realities of aging by seniors from all walks of life. It would support the Aging module in a manner that will retain the interests of students.			

Distributor	Resources	Leve	l/Modul	e No.
Code		1	2	3
LRDC	Safety First: A Guide to Safe Child Care for Babysitters. (MS-DOS Version.) Substance Abuse Education, Inc., Software Plus, 1993. Courseware/Print.	104 105		
	Taking care of a child is a big responsibility. Every babysitter should know the principles of safe child care and basics of first aid. Topics include; burns, cuts and bruises, nosebleed, bites and stings, poisoning, electrical shock, choking, injuries from falls. Interactive format with realistic examples. After using program students should be able to prevent injuries and provide basic first aid.			
CRC	Skills for Caregiving. American Red Cross, Mosby-Year Book Inc., 1993. Workbook.	106	206 208	304 306
	This workbook will guide the student step-by-step through 74 caregiving skills. Please note that this workbook accompanies the text Foundations for Caregiving.		209 210	308

	This film describes how married Canadians try to keep their married love alive and their homes together. It defines the inevitable stresses that twist the foundations of all marriages: sex, children, money, envy and boredom.			
LRDC	Studying Children: Observing and Participating. (2 nd Edition.) Henry Draper, Wanda Draper, Lenorah Polk, Glencoe Publishing, 1988.	105	205 206	305
	The book is designed to help the learner develop skills for observing children and participating in their activities. A brief overview of child development is included.			
LRDC	Ultimate Human Body, The. A Multimedia Guide to the Body and How It Works (Windows Version, CD-ROM.) D. Kindersley Multimedia, Irwin Publishing, 1994. Courseware.		208 209 210	304 308 309
	An interactive journey through the human body to discover what every part of the body is called, see where it is situated, what it looks like and how it functions. "The Body Machine" illustrates how the body carries out complex processes and "The Body Organs" focus on the individual organs and then how "Body Systems" work together to perform essential functions.		213	313
MLC	Transplant Immunology. (Canadian Women in Science Series.) Magic Lantern Communications Ltd., 1990. Video Cassette.			311
	Medical technologists employ the latest technology, working conditions in a very positive fashion are explained. Encourages students to enter a challenging career in the sciences.			

CSB: 96 06 07

Distributor	Resources	Leve	l/Modul	e No.
Code		1	2	3
MLC	What of Tomorrow?. National Video Communications; Magic Lantern Communication Ltd., 1990. Video Cassette. A realistic view of teens living with cerebral palsy. The video should spark interest and understanding as it shows the adaptations the teen and their families must make in order to lead full and productive lives.			301 302 307
MLC	Who's In Charge: Teens Talk About Diabetes. (Diabetes: Balance and Control Series.) Artschul Corporation; Magic Lantern Communications Ltd., 1994. Video Cassette.		201 206	301 309
	Teenagers discuss the challenges of living with diabetes. Coping with diabetes as a teenager takes good communication skills, being assertive and support from family and friends.			
MEC	Working Marriage Partners. Meridian Education Corporation, Glencoe Macmillan/McGraw-Hill Ryerson Ltd., 1992. Video Cassette.		202	301
,	A successful marriage is structured around a partnership - balancing of personal needs, strengths, weaknesses and skills that each partner brings to the marriage. This video shows how a successful marriage partnership can help a couple cope with a wide range of financial, family, occupational and emotional strains.			

TEACHING RESOURCES

The following teaching resources are authorized by Alberta Education to assist teachers in the instructional process.

Distributor	Resources	Level/Module No.			
Code		1	2	3	
LRDC	Anatomy and Physiology Learning System, The. E. Applegate. W.B. Saunders Company, Harcourt Brace and Company Canada, 1995.		209 210	302 308	
	The textbook is designed to prepare students entering a health related profession. The clear, concise presentation of information and concepts, applications for aging, suggested clinical applications, and colourful illustrations increase interest and comprehension for the senior student.				
CRC	Babysitter's Course. Canadian Red Cross Society, 1995. Facilitators Guide.				
	See Basic Learning Resources for annotation and module correlation.				
LRDC	Cross-Cultural Caring: A Handbook for Health Professionals. Waxler-Morrison, Anderson & Richardson. UBC Press, 1990.	all	all	all	
	This handbook describes several recent immigrant groups in Western Canada. It provides conformation not only about the health beliefs and practices of these communities but also the social content of each group. The immigrant groups included are: Vietnamese, South and Southeast Asians, Chinese, Japanese, Central Americans, West Indians and Iranians. An excellent resource for the Community Health strand.				
LRDC	Developing Child, The. Alfred, Couch, Glossom, Mendiola. McGraw-Hill Ryerson, 1994. Teacher's Wraparound Edition and Student Workbook Teacher's Annotated Edition.				
	See Basic Learning Resources for annotation and module correlation.				
CRC	Emergency Child Care for Child Care Workers Canadian Red Cross Society, 1990. Instructor's Guide and Reference.				
	See Basic Learning Resources for annotation and module correlation.

LRDC	Families in Canadian Society. (2 nd Edition.) Maureen Baker, Janet Dryden. McGraw-Hill Ryerson, 1993. Student Text and Teacher's Resource Manual. An excellent teaching resource that supports Family Dynamics, Perspectives	101	202	301 302 303
	of Marriage, Family Issues, Parenting and Aging modules. The text introduces the reader to family studies and continues with an in-depth look at the stages of the life cycle from <i>The Single Life</i> to <i>Later Life</i> . Current research, cultural diversities and Canadian statistics make this a valuable teaching resource. Activities and issues for discussion are a definite bonus for the classroom teacher.			
LRDC	Families Today. Connie R. Sasse. Glencoe Macmillan/McGraw-Hill, 1994. Teacher's Wraparound Edition and Student Workbook Teacher's Annotated Edition.			
	See Basic Learning Resources for annotation and module correlation.			
SJA	First Aid in Child Care. St. John Ambulance, Canadian Cataloguing in Publication Data, 1993. Instructor's Guide.	-		
	See Basic Learning Resources for annotation and module correlation.			
CRC	First Aid: The Vital Link. Canadian Red Cross, Mosby Lifeline 1993/94. Instructor's Manual and Coloured Transparencies (accompanies course text book).			
	See Basic Learning Resources for annotation and module correlation.			
SJA	First Aid: First on the Scene. Emergency and Standard Levels. St. John Ambulance, Canadian Cataloguing in Publication Data, 1994. Instructor's Guide and Video Cassettes (Vol. I-IV).			
	See Basic Learning Resources for annotation and module correlation.			
LRDC	Glencoe Health - A Guide to Wellness. (4th Edition.) Mary Bronson Merki, Don Merki. Glencoe McGraw-Hill Ryerson Ltd., 1994. Teacher's Wraparound Edition.			
	See Basic Learning Resources for annotation and module correlation.			
LRDC	Just Ask! A Handbook for Instructors of Students Being Treated for Mental Disorders. H. Davidson. Detselig Enterprises Ltd., Distributor, Temeron Books, 1993.			310
	This book covers major mental health conditions, the symptoms, treatments and impact of learning. A good resource to initiate discussions in this module.

Parenting: Rewards and Responsibilities. (4th Edition.) Dr. Verna Hildebrand. Glencoe Macmillan/McGraw-Hill, 1994. Teacher's Annotated Edition.	101 105		301 302 304
The teacher's manual, bound in the front of the teacher's annotated edition, includes a multitude of effective teaching strategies. The detailed lesson plans for every chapter provide multi-level and cross-curricular activities. Answers to the chapter reviews are included.			
Self- Study Orientation Course For Day Care Staff. Alberta Family and Social Services, Grant MacEwan Community College, 1993.		205	305
This is the required curriculum for certification (Day Care Level One). It is a self-study curriculum covering all components of the orientation course. The student investigates the roles and responsibilities of day care workers, develop communication and observation skills as they develop skills to assist in the physical, social, emotional and intellectual development of children from birth to six years of age.			
Skills for Caring Series. Churchill Livingstone, Copp Clark Longman Ltd., 1992/93. Booklets.	all	all	all
A interesting, relevant informative set of resources. Easy to use format but in British publication with spelling and terminology differences.			
Caring in Emergencies - deals with physical emergencies when a care worker is faced with someone who needs immediate help. Caring Services, The - emphasizes the importance of the client and the community, to the care worker, throughout health service changes. Healthy Living - raises important questions about healthy living and its implication to the student. Home Care Services - discusses home care provision and the promotion of client choice and independence. Human Development - will help to gain knowledge and understanding of the human development process.			
Sports First Aid – A Guide to Sports Injuries. Sports Medicine Council of British Columbia, Interprovincial Sports Medicine Network, 1992. (Reprinted in 1995.)		213	313
This guide follows through specific course content for certification including: • role of the sports aider • body basics • injury prevention • on the sidelines • life threatening injuries • assessment and management • common injuries

LRDC	Today's Family: A Critical Focus. Meiklejohn, Yeager, Kuch. Maxwell Macmillan Canada, 1990. Resource Book.	101		301
	A critical focus provides ideas on how families live within a variety of contemporary cross-cultural and historical settings. This book of readings is from a Canadian viewpoint and is divided into five themes. The themes include: Ways of Knowing About Families, Family as a System, Family Systems Through Time, The Emerging Family and The Enduring Family. The materials provide well supplemented other resources used in the study of the family.

A Handbook for Instructors of Students Being Treated for Mental Disorders	Parenting: Reward and Responsibilities - Teacher's Annotated Edition	Self Study Orientation Course for Day Care Staff - Curriculum	Skills for Caring Series - 4 Booklets	Sports First Aid - A Guide to Sports Injuries	Foday's Family: A Critical Focus - Text	Dad Film, The - Film	Finding Out: Incest and Family Sexual Abuse	One Hit I eads to Another

OTHER RESOURCES

These titles are provided as a service only to assist local jurisdictions to identify resources that contain potentially useful ideas for teachers. Alberta Education has done a preliminary review of the resources. However, the responsibility to evaluate these resources prior to selection rests with the user, in accordance with any existing local policy.

Distributor	Resources	Leve	l/Modul	e No.
Code		1	2	3
FWA	Dad Film, The. 1991.		201 202	301 302
	A collection of thought provoking and illuminating interviews with four first-time dads. This film will give the dad-to-be information of what it would be like to be a father, the changes, trials, tribulations and joys of fatherhood are expressed through the interviews.			304
KIN	Finding Out: Incest and Family Sexual Abuse			301
	While the topic of incest and family sexual abuse is not pleasant it receives a positive perspective in this film as is shows many people working together to provide support.			302
KIN	One Hit Leads To Another A realistic look (examples of profane language and physical violence) of abusive relationships to educate the viewers about physical abuse. Viewing and discussion of the film could be catalysts to promote tolerance and understanding.			301 302

ADDITIONAL SOURCES

Available to Community Health teachers, both locally and provincially, are many resources that can be used to enhance Career and Technology Studies courses. These resources can be accessed through the community, government agencies, resource centres and organizations. Some of these sources, e.g., government departments, undergo frequent name and/or telephone number changes. Please check your telephone directory or an appropriate government directory.

The following is a partial list of sources to consider:

TEACHER-LIBRARIANS

Planned and purposeful use of library resources helps students grow in their ability to gather, process and share information. Research activities require access to an adequate quantity and variety of appropriate, up-to-date print and non-print resources from the school library, other libraries, the community and additional sources. Some techniques to consider are:

- planning together
- establishing specific objectives
- integrating research skills into planning.

Cooperation between the teacher—librarian and the subject area teacher in the development of effectively planned resource-based research activities ensures that students are taught the research skills as well as the subject content.

Also see Focus on Research: A Guide to Developing Student's Research Skills referenced in the Alberta Education Resources section.

ALBERTA EDUCATION SOURCES

The following monographs are available for purchase from:

Learning Resources Distributing Centre 12360 – 142 Street Edmonton, AB T5L 4X9 Telephone: 427–2767

Fax: 422-9750

Please consult the "Support Documents" section or the "Legal, Service and Information Publications" section in the *Buyers Guide* for ordering information and costs.

Developmental Framework Documents

• The Emerging Student: Relationships Among the Cognitive, Social and Physical Domains of Development, 1991

This document looks at the whole child, or student, as a productive learner, integrating all the domains of development: cognitive, social and physical. It emphasizes the need for providing balanced curriculum and instruction.

 Students' Interactions Developmental Framework: The Social Sphere, 1988

This document focuses on the student as a social being. It looks at the student's affective or emotional growth and examines moral development. These three domains make up the social sphere.

- Students' Physical Growth: Developmental Framework Physical Dimension, 1988
- This document examines children's normal physical growth in three areas: perceptual, structural and motor development. In none of these areas is the child's growth in a single continuous curve throughout the first two decades of life. Physical growth is characterized by periods of rapid growth and periods of slower growth. Consequently, differences and changes in growth patterns may affect the timing of certain learning processes.
- Students' Thinking: Developmental Framework Cognitive Domain, 1987

This document explores children's cognitive development from infancy to adolescence. The Piagetian stages of pre-operational, concrete operational and formal operational thinking are explained. Suggestions for improving the learning process are also presented.

Others

• Focus on Research: A Guide to Developing Students' Research Skills, 1990

This document outlines a resource-based research model that helps students manage information efficiently and effectively, and in this process, to gain skills that are transferable to all school and work situations. This model provides a developmental approach to teaching students how to do research.

• Teaching Thinking: Enhancing Learning, 1990

Principles and guidelines for cultivating thinking, ECS to Grade 12, have been developed in this resource. It offers a definition of thinking, describes nine basic principles on which the suggested practices are based, and discusses possible procedures for implementation in schools and classrooms.

OTHER GOVERNMENT SOURCES

ACCESS: The Education Station

ACCESS: The Education Station offers a variety of resource and services to teachers. For a nominal dubbing and tape fee, teachers may have ACCESS: The Education Station audio and video library tapes copied.

ACCESS: The Education Station publishes a listing of audio and video cassettes as well as a comprehensive programming schedule.

Of particular interest are the Career and Technology Studies videos that are available with teacher utilization guides. The guides outline key points in each video and suggest questions for discussion, classroom projects and other activities. Video topics are listed in the Support Learning Resources section of this Guide. The videos listed and accompanying support material can be obtained from:

ACCESS: The Education Station 3720 – 76 Avenue Edmonton, AB T5B 2N6

SECTION J: SAMPLE STUDENT LEARNING GUIDES

(INTERIM)

TABLE OF CONTENTS

A student learning guide presents information and direction to help students attain the expectations defined in a specified CTS module. It is designed to be used by students under the direction of a teacher.

The student learning guides included in this section are organized as follows:

- Why take this module?
- What do you need to know before you start?
- What will you know and be able to do when you finish?
- When should your work be done?
- How will your mark for this module be determined?
- Which resources may you use?
- Activities/Worksheets

A student learning guide is <u>not</u> a self-contained learning package (e.g., Distance Learning Module), such as you might receive from the Alberta Distance Learning Centre (ADLC) or Distance Learning Options South (DLOS).

SAMPLE STUDENT LEARNING GUIDES	
Child Development (CMH105)	J.1
* * *	
Anatomy, Physiology, Pathology (Nervous/Endocrine) (CMH309)	J.7

Child Development (CMH105)

TAKE THIS MODULE?

☑ T.I.P.S. (Toddlers, Infants, Pre-schoolers and School-aged Children)

Interested? In this module you will discover that those *Terrible Twos* and *Ferocious Four* year old children are really quite normal. Students interested in a childrelated career will enjoy this activity-filled module.

DO YOU NEED TO KNOW BEFORE YOU START?

No previous experience is required for this module. Enthusiasm and a willingness to learn about children and their development will ensure success.

CSB: 96 06 07

Child Development (CMH105)

WILL YOU KNOW AND BE ABLE TO DO WHEN YOU FINISH?

- ☑ Identify the various development stages of children and the care required at each stage.
- ☑ Identify solutions to problems in child care
- ☑ Practical activities demonstrating care required for developing children
- ☑ Identify the various community childcare resources and compare the programs based on individual child and family needs
- ☑ Identify a career in the area of child care.
- ☑ Demonstrate basic competencies.

SHOULD YOUR WORK BE DONE?

Work should be completed by_____

See Page 4 and complete the Time Management Planning Chart.

Child Development (CMH105)

WILL YOUR MARK FOR THIS MODULE BE DETERMINED?

	PERCENTAGE
You must first demonstrate all of the competencies required for this module.	
When you have done this, your percentage mark will be determined as follows:	
 ✓ presentation on child development ✓ solving scenarios ✓ practical activities ✓ identify and evaluate community resources ✓ a career profile. 	25% 20% 35% 10% 10%

RESOURCES MAY YOU USE?

- ☑ The Developing Child (print)
- ☑ Families Today (print)
- ☑ Skills for Caring (print)
- ☑ Baby Owner's Manual (video)
- ☑ The Developing Child (video)
- ☑ Studying Children: Observing and Participating (print)
- ☑ Lily Series (videos)
- ☐ Parenting: Rewards and Responsibilities (print)
- ☑ Canada's Guide to Health Eating

CSB: 96 06 07

Child Development (CMH105)

Name_

Time Management Planning Chart

Using the chart below, pre-plan the work that needs to be done in this module. Plan on how you will use your class time as well as extra time that you will need to complete the assignments in this module. The chart below will help you develop a 5-week plan.

· Month				
Monday	Tuesday	Wednesday	Thursday	Friday

Child Development (CMH105)

- 1. View a video on child development. Participate in the group discussion.
- 2. Create a bulletin board for the class. (Each student brings a baby picture.) Indicate:
 - when you first walked
 - when you got your first tooth
 - what was your birth weight and length
 - what was you weight and height at one year.
- 3. Using resources in the classroom, develop a chart identifying the physical, mental and social development of:
 - infants
 - toddlers
 - pre-schoolers
 - school-aged children.
- 4. Observe a toddler and a pre-schooler in a specific situation and record your observations. Give your reactions to your observations based on your knowledge of child development. Locations might include a mall, playground, day care or at home. Compare development stages of these two children.
- 5. In small groups, brainstorm to identify basic needs of children. Complete worksheets on basic needs of children. Discuss the importance of providing love and security. Be prepared to present your ideas to the class.
- 6. Routines and boundaries must be set and maintained. In your notebook, give possible solutions to the scenarios involving routines and boundaries when you are the caregiver.
- 7. A clean, safe environment is important. List ten safety-related practises to be adhered to to ensure the children in your care are safe. Review emergency procedures and provide solutions to the emergency scenarios.?
- 8. Why is play important? Bring toys from home or cut out pictures of toys and evaluate using the form provided. Determine if they help children develop mentally, physically or socially.
- 9. Prepare a game, an activity or toy suitable for a young child. Explain:
 - how the game is played
 - why the child might like it
 - what they might learn from playing it
 - the age of the child for which it is appropriate.
- 10. Following Canada's Guide for Healthy Eating and information related to feeding children, plan a one day's menu. Prepare and present a meal suitable for one age group. When you present your meal be prepared to explain your choice in regards to nutrition, age suitability, child appeal, ease of preparation.
- 11. You have one hundred dollars to buy clothing for a child for one year. Read information on children's clothing. Choose an age group and outline clothing items, store, size, cost and reason for buying.

Child Development (CMH105)

- 12. Participate in a discussion on the importance of and the ways and means of meeting the needs of special children.
- 13. Brainstorm to identify the variety of community child care resources. Consider:
 - types
 - describe how they meet physical, social and/or mental needs of children
 - advantages and disadvantages

and complete the form Community Resource Assessment for two community resources.

14. Choose a career associated with working with young children. Complete the career profile included on the *Community Resources Assessment*.

Community Health /J.6 (Interim 1996)

Anatomy, Physiology, Pathology (Nervous/Endocrine) (CMH309)

TAKE THIS MODULE?

☑ So you want to be a neurosurgeon or find a cure for diabetes! Learn more about nervous/endocrine conditions as they affect the individuals, family and friends.

DO YOU NEED TO KNOW BEFORE YOU START?

You need to have completed the Community Health modules Perspectives on Health, Respiratory, Circulatory, Muscular/Skeletal and Digestion/Elimination.

CSB: 96 06 07

Anatomy, Physiology, Pathology (Nervous/Endocrine) (CMH309)

WILL YOU KNOW AND BE ABLE TO DO WHEN YOU FINISH?

- ☑ demonstrate an understanding of the anatomy, physiology and pathology of the nervous and endocrine systems
- ☑ demonstrate an understanding of the pathology, treatment and impact of conditions and emergencies of the nervous and endocrine systems on the individual, family and community.
- ☑ outline factors that promote personal health and wellbeing
- ☑ inventory community resources and support systems available
- ☑ identify career opportunities related to the nervous endocrine systems
- demonstrate basic competencies (managing learning, resources, demonstrating responsibility, teamwork and leadership).

SHOULD YOUR WORK BE DONE?

Work should be completed by		
See page 4 and		
complete the time management planning chart.		

Anatomy, Physiology, Pathology (Nervous/Endocrine) (CMH309)

WILL YOUR MARK FOR THIS MODULE BE DETERMINED?

	PERCENTAGE
You must first demonstrate all of the competencies required for this module.	
When you have done this, your percentage mark will be determined as follows:	
☑ Nervous/Endocrine Concept Test	30%
☑ Presentation/report on Nervous/Endocrine conditions	30%
☑ Practical activities for treating nervous/endocrine emergencies	20%
☑ Developing a Personal Action Plan	10%
☑ Career profiles.	10%

RESOURCES MAY YOU USE?

- ☑ Human Body in Health and Disease (print)
- ☐ Anatomy and Physiology Learning Systems (print)
- ☑ Diabetes: Balance and Control (video)
- ☑ How It Works Series Body, Immune System, Brain (print)
- ☐ Anatomy and Physiology Coloring Workbook and Study Guide

Anatomy, Physiology, Pathology (Nervous/Endocrine) (CMH309)

Name

Time Management Planning Chart

Using the chart below, pre-plan the work that needs to be done in this module. Plan on how you will use your class time as well as extra time that you will need to complete the assignments in this module. The chart below will help you develop a 5-week plan.

- Month				
Monday	Tuesday	Wednesday	Thursday	Friday

Anatomy, Physiology, Pathology (Nervous/Endocrine) (CMH309)

- 1. With a partner, use the classroom resources to research a condition which may affect the endocrine system. Hand in a one page summary of your research and eight suggested exam questions. Your report will be presented to the class and must include:
 - location and function of the endocrine gland affected. (Locate on diagram on the bulletin board.)
 - pathology and treatment for the condition
 - impact of the condition on the individual, family members and the community
 - suggestions to help the individual live with the condition
 - community support resources available.

Schedule your presentation time on the master calendar

- 2. View the video Diabetes: Balance and Control and complete the evaluation.
- 3. Using classroom resources, complete the diagram and worksheet on the brain.
- 4. Complete the worksheets showing the components and functions of the central and peripheral nervous systems.
- 5. Following the instructor's demonstration, be prepared to demonstrate first-aid procedures for neurological and endocrine emergencies.
- 6. With a partner, choose and research a condition which may affect the nervous system. Your report must include:
 - the pathology, signs, symptoms, prevention and treatment of this condition
 - the social, emotional and economic impact of the condition on individual, family members and the community
 - suggestions to reduce the impact of this condition on the individual
 - a list of community support resources available.
- 7. Complete a written test on the structure, function and pathology of the endocrine and nervous systems. See master calendar for the date.
- 8. Complete your Personal Action Plan, outlining your plans to promote and maintain a healthy nervous/endocrine system throughout your life.
- 9. Job Shadow and report, interview and report, or arrange for a guest speaker to attend class and speak on a career related to the nervous/endocrine system. Be sure the following information is presented:
 - personal characteristics necessary
 - training/education required
 - employment and entrepreneurial opportunities
 - working conditions
 - salary and benefits.

Schedule this presentation on the master calendar.
